REVIEW ARTICLE
Molecular mechanisms of drug resistance

J. D. Hayes & C. R. Wolf 281–295

RESEARCH PAPERS

Proteins
Stoichiometry and stability of caldesmon in native thin filaments from sheep aorta smooth muscle
S. Marston 305–310

Molecular-mass heterogeneity of Griffonia simplicifolia lectin IV subunits. Differences in the oligosaccharide moieties in the N-terminal region

Propeptide recognition by the vitamin K-dependent carboxylase in early processing of prothrombin and factor X
R. Wallin & R. Turner 473–478

Enzymes
Cyclic AMP agonists induce the phosphorylation of phospholipase C-γ and of a 76 kDa protein co-precipitated by anti-(phospholipase C-γ) monoclonal antibodies in BALB/c-3T3 cells. Relationship to inositol phosphate formation
T. Ha, S. L. Morgan, W. H. Vaughn, I. Eto & J. E. Baggott 339–342

Detection of inhibition of 5-aminomimidazole-4-carboxamide ribotide transformylase by thioinosinic acid and azathioprine by a new colorimetric assay

Isocitrate lyase from Phycomyces blakesleeanus. The role of Mg2+ ions, kinetics and evidence for two classes of modifiable thiol groups
J. Rúa, D. de Arriaga, F. Busto & J. Soler 359–367

Effect of temperature and chloride on steady-state inhibition of angiotensin I-converting enzyme by enalaprilat and ramiprilat
A. Skoeglőf, P.-O. Göthe & J. Deinum 415–419

Effect of pH on the oxidation pathway of α-methyl dopa catalysed by tyrosinase
P. Serna Rodríguez, J. N. Rodríguez López, J. Tudela, R. Varón & F. García Cánovas 459–463

Limited proteolysis and 'in vitro' mutagenesis of bovine brain inositol monophosphatase identifies an N-terminal region important for activity
P. Whiting, N. S. Gee, J. Potter, S. Howell & C. I. Ragan 465–468

Chemical modification of rat liver microsomal glutathione transferase defines residues of importance for catalytic function
C. Andersson & R. Morgenstern 479–484

Elimination of a reactive thiol group from the active site of chloramphenicol acetyltransferase
A. Lewendon & W. V. Shaw 499–504

Nucleotide sequences of genes encoding the type II chloramphenicol acetyltransferases of Escherichia coli and Haemophilus influenzae, which are sensitive to inhibition by thiol-reactive reagents
I. A. Murray, J. V. Martinez-Suarez, T. J. Close & W. V. Shaw 505–510

Hepatic iodothyronine 5’-deiodinase. The role of selenium
J. R. Arthur, F. Nicol & G. J. Beckett 537–540

Spectroscopic, thermodynamic and kinetic properties of Candida nitratophila nitrate reductase
C. J. Kay, M. J. Barber, L. P. Solomonson, D. Kau, A. C. Cannons & C. R. Hipkin 545–548

Carbohydrates
Structures of the asparagine-linked oligosaccharides of guinea-pig Factor B of the alternative complement pathway
T. Mizuochi, J. Hamako, K. Titani, M. Matsushita & H. Okada 533–535

Lipids
Effect of lovastatin on acyl-CoA:cholesterol O-acyltransferase (ACAT) activity and the basolateral-membrane secretion of newly synthesized lipids by CaCo-2 cells
N. T. P. Kam, E. Albright, S. Mathur & F. J. Field 427–433

Gene structure and expression
Xylanase B and an arabinofuranosidase from Pseudomonas fluorescens subsp. cellulosa contain identical cellulose-binding domains and are encoded by adjacent genes
CONTENTS (continued)

Expression and routeing of human lysosomal α-glucosidase in transiently transfected mammalian cells

Characterization of the human lysosomal α-glucosidase gene

A requirement for Zn²⁺ for the induction of thymidine kinase but not ornithine decarboxylase in 3T3 cells stimulated from quiescence

Induction of carcinoembryonic-antigen-gene expression in human colorectal carcinoma by sodium butyrate

A novel product of the Duchenne muscular dystrophy gene which greatly differs from the known isoforms in its structure and tissue distribution

Synthesis and degradation of macromolecules

Recombinant human interferon-γ. Differences in glycosylation and proteolytic processing lead to heterogeneity in batch culture

Possible role and mechanism of action of dissolved calcium in the degradation of bone collagen by lysosomal cathepsins and collagenase

Intermediary metabolism and metabolic control

Hyperammonaemia causes many of the changes found after portacaval shunting

Effects of hyperthyroidism and hypothyroidism on glutamine metabolism by skeletal muscle of the rat

Activation of Factor V during intrinsic and extrinsic coagulation. Inhibition by heparin, hirudin and d-Phe-Pro-Arg-CH₂Cl

Sensitivity of inhibition of rat liver mitochondrial outer-membrane carnitine palmitoyltransferase by malonyl-CoA to chemical- and temperature-induced changes in membrane fluidity

Lactate production is the major metabolic fate of glucose in splenocytes and is altered in spontaneously diabetic BB rats

Changes in the properties of cytosolic acetyl-CoA carboxylase studied in cold-clamped liver samples from fed, starved and starved-refed rats

Acetazolamide-insensitive carbonic anhydrase activities in liver and tonic skeletal muscle of adult male rats with streptozotocin-induced diabetes mellitus

Bioenergetics and transport

Neutral-sugar transport by rat liver lysosomes

MgATP-dependent accumulation of calcium ions and inorganic phosphate in a liver reticular pool

Membranes and receptors

Effect of aluminium on iron uptake and transferrin-receptor expression by human erythroleukaemia K562 cells

Purification and characterization of the inositol 1,4,5-trisphosphate receptor protein from rat vas deferens

Ligand specificities of recombinant retinoic acid receptors RARα and RARβ

Arachidonic acid-induced calcium influx in human platelets. Comparison with the effect of thrombin

A novel 100 kDa protein localized to receptor-enriched endosomes is immunologically related to the signal-transducing guanine-nucleotide-binding proteins Gᵢ and Gₛ

Comparison of extracellular ATP and UTP signalling in rat renal mesangial cells. No indications for the involvement of separate purino- and pyrimidino-ceptors

J. K. Chesters, L. Petrie & A. J. Travis 525–527

K. Saini, G. Steele & P. Thomas 541–544
