REVIEW ARTICLE
Regulation of protein turnover in skeletal and cardiac muscle

P. H. Sugden & S. J. Fuller

RESEARCH PAPERS

Proteins
The mechanism of sunlight-mediated inactivation of Bacillus thuringiensis crystals
M. PusztaI, P. Fast, L. Gringorten, H. Kaplan, T. Lessard & P. R. Carey

Turnover and phosphorylation dynamics of connexin43 gap junction protein in cultured cardiac myocytes
D. W. Laird, K. L. Puranam & J.-P. Revel

Tau in Alzheimer neurofibrillary tangles. N- and C-terminal regions are differentially associated with paired helical filaments and the location of a putative abnormal phosphorylation site

Some properties of duck gizzard caldesmon
A. V. Vorotnikov & N. B. Gusev

A three-disulphide derivative of hen lysozyme. Structure, dynamics and stability
S. E. Radford, D. N. Woolfson, S. R. Martin, G. Lowe & C. M. Dobson

Enzymes
A monoclonal antibody distinguishes two types of phosphatidylinositol 4-kinase
G. C. Endemann, A. Graziani & L. C. Cantley

Selective modification by transglutaminase of a glutamine side chain in the hinge region of the histidine-388→glutamine mutant of yeast phosphoglycerate kinase
P. J. Coussons, S. M. Kelly, N. C. Price, C. M. Johnson, B. Smith & L. Sawyer

Inactivation of the RTEN-l cysteine β-lactamase by iodoacetate. The nature of active-site functional groups and comparisons with the native enzyme
A. K. Knap & R. F. Pratt

Comparison of benzyl alcohol dehydrogenases and benzaldehyde dehydrogenases from the benzyl alcohol and mandelate pathways in Acinetobacter calcoaceticus and from the TOL-plasmid-encoded toluene pathway in Pseudomonas putida. N-Terminal amino acid sequences, amino acid compositions and immunological cross-reactions
R. M. Chalmers, J. N. Keen & C. A. Fewson

Purification of a new peroxidase catalysing the formation of lignan-type compounds

Specificity of two genetically related cell-envelope proteinases of Lactococcus lactis subsp. cremoris towards αs1-casein-(1–23)-fragment
F. A. Exterkate, A. C. Alting & C. J. Slangen

Carbohydrates and lipids
Synthesis of phosphatidylethanolamine and ethanolamine plasmalogen by the CDP-ethanolamine and decarboxylase pathways in rat heart, kidney and liver
G. Arthur & L. Page

An unsulphated region of the rat chondrosarcoma chondroitin sulphate chain and its binding to monoclonal antibody 3B3
J. R. Baker, J. E. Christner & S. L. Ekborg

Gene structure and expression
Isolation of cDNAs encoding the complete sequence of bovine type X collagen. Evidence for the condensed nature of mammalian type X collagen genes
J. T. Thomas, A. P. L. Kwan, M. E. Grant & R. P. Boot-Handford

Abundance of hepatic metallothionein mRNA is increased by protein-synthesis inhibitors. Evidence for transcriptional activation and post-transcriptional regulation
C. C. McCormick, L. M. Salati & A. G. Goodridge

A rapid method for the isolation of genomic DNA from citrated whole blood
S. Parzer & C. Mannhalter

Regulation of metabolism
Comparison of the effects of various amino acids on glycogen synthesis, lipogenesis and ketogenesis in isolated rat hepatocytes
A. Baquet, A. Lavoinne & L. Hue
Effects of dexamethasone on lung protein turnover  
J. C. Fussell & F. J. Kelly  
93–97

L-Lactate uptake by rat liver. Effect of food deprivation and substrate availability  
A. Felipe, X. Remesar & M. Pastor-Anglada  
195–198

Products and intermediates of the β-oxidation of [U-14C]hexadecanediol-monoc-A by rat liver peroxisomes and mitochondria  
M. Pourfarzam & K. Bartlett  
205–210

Glucose utilization and membranes  
M. J. Holness, Y.-L. Liu, J. S. Beech & M. C. Sugden  
233–235

Membranes and bioenergetics  
J.-F. Coquil, B. Berthon, N. Chomiki, L. Combettes, P. Jourdon, C. Schteingart, S. Erlinger & M. Claret  
153–160

Receptors and signal transduction  
39–42

Chronic control of the β- and α2-adrenergic systems of sheep adipose tissue by growth hormone and insulin  
E. R. Mortensen, J. G. Drachman & G. Guidotti  
49–56

The αβ monomer of the insulin receptor has hormone-responsive tyrosine kinase activity  
R. Horuk  
79–83

Differences in internalization and intracellular processing of interleukin-1 associated with the two forms of interleukin-1 receptor found in B-cells and T-cells  
G. van Willigen & J.-W. N. Akkerman  
115–120

Protein kinase C and cyclic AMP regulate reversible exposure of binding sites for fibrinogen on the glycoprotein IIb-IIIa complex of human platelets  
S. R. Gray, F. R. Batstone, N. F. Santiapillai & P. J. Richardson  
165–171

Solubilization and purification of a putative quisqualate-sensitive glutamate receptor from crustacean muscle  
179–184

Reversible calcitonin binding to solubilized sheep brain binding sites  
Z. Kiss, J. Chattapodhyay & G. R. Pettit  
189–194

Stimulation of phosphatidylycerol synthesis by activators of protein kinase C is dissociable from increased phospholipid hydrolysis  
H. De Smedt, J. B. Parys, B. Himpens, L. Missiaen & R. Borghgraef  
219–224

Changes in the mechanism of Ca2+ mobilization during the differentiation of BC3H1 muscle cells  
N. J. P. Ryba, J. D. D. Pottinger, J. N. Keen & J. B. C. Findlay  
225–228

Sequence of the β-subunit of the phosphatidylinositol-specific phospholipase C-directed GTP-binding protein from squid (Loligo forbesi) photoreceptors  
O.-B. Tynes, E. Johannesen & V. M. Steen  
241–243

Neomycin does not interfere with the inositol phospholipid metabolism, but blocks binding of α-thrombin to intact human platelets  
A. R. Pösö & P. Hirsimäki  
149–152

Cell biology and development  
A. Persson, B. Johansson, H. Olsson & B. Jergil  
173–177

Inhibition of proteolysis in the liver by chronic ethanol feeding  
J. Pfeilschifter, J. Leighton, W. Pignat, F. Märki & K. Vosbeck  
199–204

Purification of rat liver plasma membranes by wheat-germ-agglutinin affinity partitioning  
F. Ogata  
245

Cyclic AMP mimics, but does not mediate, interleukin-1- and tumour-necrosis-factor-stimulated phospholipase A2 secretion from rat renal mesangial cells  
A. Kurlandzka, T. Zoládek, J. Rytka & R. Labbe-Bois  
246–247

Heterogeneity of serum amyloid A with respect to molecular mass  
S. N. J. Labbe-Bois  
205–210

The alternative pathway of haem synthesis via dehydroisocoprotoporphyrinogen in mutants of Saccharomyces cerevisiae partially deficient in uroporphyrinogen decarboxylase activity  
B. J. Leumann & J. H. G. Drachman  
205–210

Effects of tauroliothocholate, a Ca2+-mobilizing agent, on cell Ca2+ in rat hepatocytes, human platelets and neuroblastoma NG108-15 cell line  
E. R. Mortensen, J. G. Drachman & G. Guidotti  
49–56

Sequence of the β-subunit of the phosphatidylinositol-specific phospholipase C-directed GTP-binding protein from squid (Loligo forbesi) photoreceptors  
O.-B. Tynes, E. Johannesen & V. M. Steen  
241–243

Neomycin does not interfere with the inositol phospholipid metabolism, but blocks binding of α-thrombin to intact human platelets  
A. R. Pösö & P. Hirsimäki  
149–152

Cell biology and development  
A. Persson, B. Johansson, H. Olsson & B. Jergil  
173–177

Inhibition of proteolysis in the liver by chronic ethanol feeding  
J. Pfeilschifter, J. Leighton, W. Pignat, F. Märki & K. Vosbeck  
199–204

Purification of rat liver plasma membranes by wheat-germ-agglutinin affinity partitioning  
F. Ogata  
245

Cyclic AMP mimics, but does not mediate, interleukin-1- and tumour-necrosis-factor-stimulated phospholipase A2 secretion from rat renal mesangial cells  
A. Kurlandzka, T. Zoládek, J. Rytka & R. Labbe-Bois  
246–247

Heterogeneity of serum amyloid A with respect to molecular mass  
S. N. J. Labbe-Bois  
205–210

The alternative pathway of haem synthesis via dehydroisocoprotoporphyrinogen in mutants of Saccharomyces cerevisiae partially deficient in uroporphyrinogen decarboxylase activity  
B. J. Leumann & J. H. G. Drachman  
205–210
