The Biochemical Journal is published and distributed by Portland Press on behalf of the Biochemical Society, and appears twice monthly.

Subscriptions Department: Portland Press, P.O. Box 32, Commerce Way, Colchester CO2 8HP, U.K.

All rights reserved. Apart from any fair dealing for the purposes of research or private study, or criticism or review, as permitted under the Copyright, Designs and Patents Act, 1988, this publication may be reproduced, stored or transmitted, in any forms or by any means, only with the prior permission in writing of the publishers, or in the case of reprographic reproduction in accordance with the terms of licences issued by the Copyright Licensing Agency. Inquiries concerning reproduction outside those terms should be sent to the publishers at the abovementioned address.

Copies of articles in this journal may be made in the U.S.A. for personal or internal use, or for the personal or internal use of specific clients, on the condition, however, that the copier pay the stated per-copy fee through the Copyright Clearance Center Inc. (P.O. Box 765, Schenectady, New York 12301, U.S.A.) for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. The Copyright Clearance Center code for this journal is 0264-6021/91/$02.00 + 0.00.

Although, at the time of going to press, the information contained in this publication is believed to be correct, neither the authors nor the editors nor the publisher assume any responsibility for any errors or omissions herein contained.

Second-class postage paid at Rahway, NJ, U.S.A.

INSTRUCTIONS TO AUTHORS

General policy

The Biochemical Journal publishes papers in English in all fields of biochemistry, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. Theoretical contributions will be considered equally with papers dealing with experimental work. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Preliminary, confirmatory or inconclusive data will not be published.

Papers are accepted from non-members and members of the Biochemical Society. Prospective authors should note that the Biochemical Journal offers rapid publication and makes no manuscript handling charges, no page charges and no charges for plates (except colour). Fifty reprints are provided free of charge; further copies are available at modest cost.

The paragraphs below are a summarized version of information provided in the complete Policy of the Journal and Instructions to Authors [Biochem. J. (1991) 273, 1 - 19]. Copies are available free of charge from the editorial office.

The Biochemical Journal will not publish material that has been wholly or largely published elsewhere, even as a preliminary communication or in unrefereed proceedings; equally, fragmentation of research into the "least publishable unit" is discouraged. In order that the reviewers may review observations, all submitted papers must be accompanied by duplicate copies of the author's relevant published work and of all related papers in press or under editorial consideration elsewhere or in other journals.

Authors may suggest potential reviewers for their papers, but the journal is under no obligation to follow such suggestions. Authors may also specify the names of those they wish to be excluded from the review process, and such wishes are usually respected if in North America, the journal, in such a request unreasonably excludes all the expertise available to it in that scientific area.

Scope of articles

The following types of article are included in the journal.

1. Full-length papers may be of any length that is justified by their content. Authors should, however, note that because of pressure for space in the journal no paper, whatever its scientific merits, will be accepted if it exceeds the minimum length required for precision in describing the experiments and clarity in interpreting them. As a guide, most papers published in the Biochemical Journal are of between six and eight printed pages. A concise well-written paper tends to be published more rapidly.

2. Rapid Papers. Papers occupying not more than four printed pages will be treated as Rapid Papers if this is requested at the time of submission. Rapid Papers offer authors the opportunity of publication in a significantly shorter time than the average for Full Papers, but the criteria for acceptance are otherwise the same as for Full Papers. Rapid papers are not regarded as preliminary communications but as complete and final accounts.

3. BJ Letters are intended to provide an opportunity to discuss, criticize or expand particular points made in published work, or to present a new hypothesis. They should not contain comments on general aspects of the scientific world, should not contain extensive new data (which would best be placed in a Rapid Paper) and are not a vehicle for publication of preliminary or inconclusive results. If a letter is polemical in nature, a reply may be solicited from other interested parties before publication. Letters should not exceed two printed pages.

4. Reviews will usually be solicited, although unsolicited reviews will be considered for publication. Prospective writers of reviews should first consult the journal's reviews editor, via the editorial office, and should enclose a short (one typed page) summary of the area they propose to cover.

Procedure for submission

Before preparing papers for the journal, authors should consult a current issue to make themselves familiar with the general format, such as the use of cross-headings, layout of tables and figures and citation of references. A full page of text in the Biochemical Journal contains approximately 1200 words; when calculating the printed length of papers, allowance must be made for the space occupied by tables and figures and the number of text words reduced accordingly. Typescripts should be double-spaced throughout (particularly references and table and figure legends) on numbered sheets of uniform size (preferably ISO A4) with wide margins. Output from low-quality dot matrix printers is not acceptable.

Either the Harvard system or the numerical system of references may be used. A reference to "unpublished work" should be accompanied by the names of all persons concerned; a reference to a "personal communication" must be supported by written permission for the quotation from the person or persons concerned; both of these types of citation are permitted in the text only, not in the list of references.

Three copies of the typescript, with a brief covering letter to which should be attached an additional copy of the synopsis, should be sent to:

The Managing Editor
The Biochemical Journal
59 Portland Place
London WIN 3AJ
U.K.

(phone 071-637 5873; fax 071-323 1136; from overseas the international code for the U.K. is 44 and the leading 0 should be omitted).

The typescript should contain the name, address, telephone number and fax number of the person to whom correspondence should be addressed. The top copy of the typescript should be marked as such and should have attached to it the original figures; for the other two copies of the typescript, glossy prints (not photocopies) of the half-tone figures should be provided, but photocopies of line drawings will suffice. A single figure of not more than 75 characters should be provided, and authors should indicate the preferred section in the table of contents for their paper:

Proteins
Enzymes
Carbohydrates and lipids
Gene structure and expression
Regulation of metabolism
Membranes and bioenergetics
Receptors and signal transduction
Cell biology and development

Submission by fax

Rapid Papers and BJ Letters that do not contain half-tone figures may be submitted by fax to the number above. Only one copy of the typescript need be transmitted. Acknowledgement of receipt and the review decision will be returned by fax to the author. The current Instructions to Authors contains full details of this procedure.

Submission on diskette

Authors may submit a diskette containing the final version of the text; this should be in addition to, not as a replacement for, the required number of copies. If the paper is accepted, every effort will be made to use the diskette during typesetting, but this cannot be guaranteed. Authors wishing to submit their text in this way should consult the editorial office for advice before preparation of their paper.

OTHER INFORMATION

The Biochemical Journal is published and distributed by Portland Press Ltd on behalf of the Biochemical Society. It is published twice monthly; in 1991 volumes 273 - 280 (thirty parts each) will appear. The subscription also includes the annual compendium of Biochemical Journal Reviews and an author and keyword index.

Subscription rates

For non-members of the Biochemical Society the subscription rates for 1991 are shown below. Subscribers to the Biochemical Journal can subscribe additionally to Biochemical Society Transactions on a joint subscription, saving £15.00 (U.K. and overseas) or $25.00 (North America). The methods of despatch of both publications are shown below.

Terms are cash with order (sterling for subscribers other than in North America, or U.S. equivalent at current rate of exchange) or against proforma invoice. Orders should be sent to the address below, or through your usual agent.

U.K. & U.S.A.,
overseas
Canada & Mexico

One year (8 volumes) £720 US$ 1360
Single issues £30 US$ 57

The subscription rates for North America and Japan include elements for airfreight and Accelerated Surface Post respectively. Subscribers may opt for air-mail delivery at additional cost; details are available on application.

Microfiche

Volumes 102 - 272 of the Biochemical Journal are available on microfiche. Further details are available from the address below.

Advertisements

Information on advertising in the Biochemical Journal is available from the Advertising Department, Portland Press Ltd, 59 Portland Place, London WIN 3AJ, U.K. (telephone 071-637 5873; fax 071-323 1136). Copy is required 5 weeks before publication date. Rates cards are available on request.

Preliminary pages

 Institutions wishing to bind issues of the Biochemical Journal will find that the preliminary pages from the three issues of each volume can be used to form a set of preliminary pages for the bound set. Pages (i) and (ii) are the volume title pages supplied with part 1 of each volume; pages (iii) - (vi), (vii) - (x) and (xi) - (xiv) are the contents pages from parts 1, 2 and 3 respectively, and pages (xv) and (xvi) are the volume author index supplied in part 3 of each volume.
