

Four firsts from **BIOS** SCIENTIFIC PUBLISHERS

Oncogenes and Tumor Suppressor Genes *F. Macdonald and C.H.J. Ford*

This book is the first in a new series called "Medical Perspectives", devised specifically for non-specialists working in medicine and the medical sciences. Medical students in particular will find these concise texts useful. Primarily intended to inform and explain, each book in the series examines the fascinating developments now occurring in the life sciences which are having, or which are likely to have, a major impact on human medicine and medical practice.

In this book, the authors use the most up-to-date laboratory and clinical data to summarize our present understanding of the roles of oncogenes and tumor suppressor genes in cancer. They also describe techniques for studying these genes, their clinical relevance for diagnosis and prognosis, and ideas for turning this knowledge into useful clinical treatments.

ISBN 1 872 748 55 4 paperback published May 1991, price £11.95/US\$24.00

Abscisic Acid: Physiology and Biochemistry *Edited by W. J. Davies and H. G. Jones*

The first volume in this new series of high-quality, carefully edited, and topic-oriented reviews comprises an up-to-date survey of the state of our knowledge concerning the plant growth regulator, abscisic acid. Leading experts from the USA, Europe and Australia emphasise recent advances and the application of molecular techniques.

ISBN 1 872748 65 1 hardback to be published in October 1991, price provisionally £39.95/US\$80.00

An Introduction to Centrifugation *T.C. Ford and J.M. Graham*

"Introduction to Biotechniques" is a new series which gives the novice an introduction to basic techniques. Each book covers both the theory and the practical applications of a key technique. This first book explains what centrifugation is, what it does, how it does it, and the types of centrifuges, rotors, techniques, and density gradient media currently available. It is also useful for the more experienced worker who needs a better grasp of the theory to modify or design new separation methods.

ISBN 1 872748 40 6 paperback published February 1991, price £12.95/US\$25.00

Molecular Biology LABFAX *T.A. Brown*

Tracking down useful data is time-consuming and frustrating. Now, a new series of books provides the data you need ... quickly and accurately. Labfax is the most comprehensive, easy-to-use, best value for money laboratory companion yet conceived.

ISBN 1 872748 00 7, spiral bound in hard case published January 1991, price £21.95

The LABFAX series is co-published in North America with Academic Press, Inc., and in the rest of the world with Blackwell Scientific Publications Ltd. Orders from North America to Academic Press Inc.

Orders to:

Portland Press Ltd, Commerce Way, Whitehall Industrial Estate, Colchester CO2 8HP, UK

Two review compendia from Portland Press

Biochemical Journal Reviews 1990

edited by P.J. England and W.H. Evans

Review articles which were published in **The Biochemical Journal** in 1990 are now available in this invaluable compilation. They provide an important source of teaching material and give research workers an overview of areas outside their own particular speciality. **Biochemical Journal Reviews 1990** gives new insights on the wide range of topics now subject to biochemical investigation.

Topics reviewed include: the glyoxalase system, histone acetylation, DNA methylation, eukaryotic transcription factors, Interleukin-6, transferrin and cellular iron uptake, the prolamin storage proteins of cereal seeds, the molecular design of receptor-selective peptides, protein folding, human IgA, hepatic very-low-density lipoprotein, prion liposomes, transmembrane signalling, nitrogen metabolism in liver, phosphatidylcholine hydrolysis and drug resistance.

Paperback, ISBN 1 8 5578 00 62, 238 pages, price £9.50/US\$20.00

The Journal of Biological Chemistry

1990 MINIREVIEW COMPENDIUM

Published by the American Society for Biochemistry and Molecular Biology

The Journal of Biological Chemistry 1990 Minireview Compendium

The Journal of Biological Chemistry is one of the world's leading journals of biological chemistry; it publishes over 1000 research articles each year. It also publishes review articles on selected topics of scientific importance. This is the annual compendium of reviews published during 1990. The 36 reviews published in 1990 covered a wide range of topics and will supply invaluable material for lecturers and students.

Topics reviewed include: protein kinase regulation; glycogen phosphorylase; ribonuclease P; islet amyloid polypeptide; ribonucleotide reductases; telomeres; epidermal growth factor; sliding filaments and molecular motile systems; calcium oscillations; the genes of hepatic glucose metabolism; the protonmotive Q cycle; heat shock proteins; molecular-scanning methods of mutation detection; structure of transglutaminases; regulation of cell cycle-dependent gene expression in yeast; protein-protein recognition sites; enzyme-inhibition by fluoro compounds.

Published by the American Society for Biochemistry and Molecular Biology. Paperback, ISBN 0 9621 688 2 3, 144 pages, price £5.00/US\$10.00
