The Biology of Nitric Oxide

Part 1 - Physiological and Clinical Aspects

Edited by S Moncada, M A Marletta, J B Hibbs Jr. and E A Higgs

It is now widely recognised that nitric oxide acts as a signal transduction mechanism in many biological systems. Understanding the molecular mechanisms of this compound, its distribution and its relation to other important agents will be of vital physiological significance. Research in this area is expanding rapidly and has many implications for our understanding of the cardiovascular system, the central and peripheral nervous systems and host defence mechanisms.

The proceedings of the Second International Meeting on the Biology of Nitric Oxide brings together for the first time investigations from very different areas of research with a common interest in the newly discovered pathway synthesising nitric oxide from L-arginine in mammalian cells.

The proceedings are being published in two volumes, and Part I reports the aspects of nitric oxide research relating to the cardiovascular, central and peripheral nervous systems, as well as clinical data. Part II entitled Enzymology, Biochemistry and Immunology will be published in December 1992.

ISBN 1 85578 012 7 Hardback  £87.50/US$160.00
420 pages  October 1992

Part II - Enzymology, Biochemistry and Immunology

ISBN 1 85578 013 5 Hardback  £57.50/US$110.00
230 pages  97 papers  December 1992

Parts I and II purchased together  £140.00/US$260.00

Nutrient Regulation of Insulin Secretion

Edited by P R Flatt

The mechanism of insulin release in response to the body's intake of nutrients is a problem at the centre of research into diabetes. Nutrient Regulation of Insulin Secretion is a comprehensive review of the mechanisms by which nutrients, such as glucose, and neurohormonal stimuli generated by feeding, control pancreatic B-cell function in health and disease.

"...an excellent collection of authoritative reviews. I was particularly impressed with the up-to-date feeling which was present throughout the book."

K Docherty, The Biochemist

"...a major work which will be a standard reference on the subject for some years.... It is extensively cross-referenced and despite the multiple authorship, it reads as a single volume. Flatt has done well to bring it all together so effectively. Anyone with even a vague interest in insulin secretion will find much of value."

D G Johnston, The Endocrinologist

ISBN 1 85578 004 6 Hardback 415 pages £60.00/US$111.00 February 1992

Orders* and enquiries should be sent to: Portland Press Ltd., Commerce Way, Colchester CO2 8HP, UK Tel: (0206) 796351 Fax: (0206) 799331

* Payment should accompany order and can be made by cheque or credit card.

Essays in Biochemistry

Volume 27

Edited by K F Tipton

Successfully relaunched by Portland Press in 1991 with a new format, each issue of Essays In Biochemistry contains more articles than before, carefully edited to provide information which can be assimilated by advanced undergraduates and are ideal as background to teaching notes.

Contents

The collagen superfamily - diverse structures and assemblies, D J S Hulmes
Towards an understanding of C3-C4 photosynthesis, S Rawsthorne
The biochemistry of blood clotting; the digestion of a liquid to form a solid, M F Scully
Endothelins, T Masaki and M Yanagisawa
Wither PQQ, W S McIntire
Ubiquitin, R J Mayer and F J Doherty
The repair of DNA Alkylation damage by methyltransferases and glycosylases, L D Samson
Roles of protein phosphorylation in synaptic transmission, R Rodnight and S T Wofchuk
Biosensors: principles and practice, J D Newman and A P F Turner
Cell death in Parkinson's disease, S A Greenfield
How groups of proteins titrate - a new approach, H B F Dixon
Proteolysis is a key process in virus replication, G Kemp, A Webster and W C Russell

ISBN 1 85578 015 1 Paperback 178 pages £15.00/US$30.00 July 1992

Orders* and enquiries should be sent to: Portland Press Ltd., Commerce Way, Colchester CO2 8HP, UK Tel: (0206) 796351 Fax: (0206) 799331

* Payment should accompany order and can be made by cheque or credit card.
Four firsts from BIOS
Scientific Publishers

Oncogenes and Tumor Suppressor Genes
F. Macdonald and C.H.J. Ford

This book is the first in a new series called "Medical Perspectives", devised specifically for non-specialists working in medicine and the medical sciences. Medical students in particular will find these concise texts useful. Primarily intended to inform and explain, each book in the series examines the fascinating developments now occurring in the life sciences which are having, or which are likely to have, a major impact on human medicine and medical practice.

In this book, the authors use the most up-to-date laboratory and clinical data to summarize our present understanding of the roles of oncogenes and tumor suppressor genes in cancer. They also describe techniques for studying these genes, their clinical relevance for diagnosis and prognosis, and ideas for turning this knowledge into useful clinical treatments.

Abscisic Acid: Physiology and Biochemistry
Edited by W. J. Davies and H. G. Jones

The first volume in this new series of high-quality, carefully edited, and topic-oriented reviews comprises an up-to-date survey of the state of our knowledge concerning the plant growth regulator, abscisic acid. Leading experts from the USA, Europe and Australia emphasise recent advances and the application of molecular techniques.

ISBN 1 872748 65 1 hardback to be published in October 1991, price provisionally £39.95/US$80.00

An Introduction to Centrifugation
T.C. Ford and J.M. Graham

"Introduction to Biotechniques" is a new series which gives the novice an introduction to basic techniques. Each book covers both the theory and the practical applications of a key technique. This first book explains what centrifugation is, what it does, how it does it, and the types of centrifuges, rotors, techniques, and density gradient media currently available. It is also useful for the more experienced worker who needs a better grasp of the theory to modify or design new separation methods.

Molecular Biology LABFAX
T.A. Brown

Tracking down useful data is time-consuming and frustrating. Now, a new series of books provides the data you need ... quickly and accurately. Labfax is the most comprehensive, easy-to-use, best value for money laboratory companion yet conceived.

ISBN 1 872748 00 7, spiral bound in hard case published January 1991, price £21.95

The LABFAX series is co-published in North America with Academic Press, Inc., and in the rest of the world with Blackwell Scientific Publications Ltd. Orders from North America to Academic Press Inc.
