

**Research Communications**

Radical-induced chain oxidation of proteins and its inhibition by chain-breaking antioxidants	J. Neužil, J.M.Gebicki and R. Stocker	<b>601–606</b>
Interactions between active-site-serine $\beta$ -lactamases and compounds bearing a methoxy side chain on the $\alpha$ -face of the $\beta$ -lactam ring: kinetic and molecular modelling studies	A. Matagne, J. Lamotte-Brasseur, G. Dive, J.R. Knox and J.-M. Frère	<b>607–611</b>
Biotin binders selected from a random peptide library expressed on phage	I. Saggio and R. Laufer	<b>613–616</b>

**Research Papers**

**Proteins**

Characterization of a new oriental mustard ( <i>Brassica juncea</i> ) allergen, <i>Bra j</i> I E: detection of an allergenic epitope	R.I. Monsalve, M.A. Gonzalez de la Peña, L. Menendez-Arias, C. Lopez-Otin, M. Villalba and R. Rodriguez	<b>625–632</b>
A mobile element on a virus particle surface identified by nuclear magnetic resonance spectroscopy	K.M. Brierley, B.A. Goodman and M.A. Mayo	<b>657–659</b>
Non-enzymic glycation of collagen inhibits binding of oxidized low-density lipoprotein	N. Kalant, S. McCormick and M.A. Parniak	<b>661–666</b>
Insulin-like growth factor (IGF)-II binding to IGF-binding proteins and IGF receptors is modified by deletion of the N-terminal hexapeptide or substitution of arginine for glutamate-6 in IGF-II	G.L. Francis, S.E. Aplin, S.J. Milner, K.A. McNeil, F.J. Ballard and J.C. Wallace	<b>713–719</b>
Processing of chimeric mammalian cytochrome $b_5$ precursors in <i>Escherichia coli</i> : reaction specificity of signal peptidase and identification of an aminopeptidase in post-translocational processing	V. Harding, A. Karim, N. Kaderbhai, A. Jones, A. Evans and M.A. Kaderbhai	<b>751–756</b>
Nuclear import of the human androgen receptor	G. Jenster, J. Trapman and A.O. Brinkmann	<b>761–768</b>
Reduced sulphhydryl groups are required for DNA binding of Ku protein	W.-W. Zhang and M. Yaneva	<b>769–774</b>
Definition of the EGTA-independent interface involved in the serum gelsolin–actin complex	J. Feinberg, J.-P. Capony, Y. Benyamin and C. Roustan	<b>813–817</b>

**Enzymes**

Properties of the pyridoxalimine form of glutamate semialdehyde aminotransferase (glutamate-1-semialdehyde 2,1-aminomutase) and analysis of its role as an intermediate in the formation of aminolaevulinate	R.J. Tyacke, J.L. Harwood and R.A. John	<b>697–701</b>
Purification and properties of the uroporphyrinogen decarboxylase from <i>Rhodobacter sphaeroides</i>	R.M. Jones and P.M. Jordan	<b>703–710</b>
New families in the classification of glycosyl hydrolases based on amino acid sequence similarities	B. Henrissat and A. Bairoch	<b>781–788</b>
Developmental and biochemical characteristics of the cardiac membrane-bound arginine-specific mono-ADP-ribosyltransferase	K.K. McMahon, K.J. Piron, V.T. Ha and A.T. Fullerton	<b>789–793</b>
Developmental changes in the isoelectric variants of rat hepatic hydroxysteroid sulphotransferase	M. Takahashi, H. Homma and M. Matsui	<b>795–800</b>
Common sequence motifs coding for higher-plant and prokaryotic O-acetylserine (thiol)-lyases: bacterial origin of a chloroplast transit peptide?	N. Rolland, D. Job and R. Douce	<b>829–833</b>
Oxygen Michaelis constants for tyrosinase	J.N. Rodríguez-López, J.R. Ros, R. Varón and F. García-Cánovas	<b>859–866</b>

**Carbohydrates and lipids**

- Structure of the CAMPATH-1 antigen, a glycosylphosphatidylinositol-anchored glycoprotein which is an exceptionally good target for complement lysis **633–640**  
M.-Q. Xia, G. Hale, M.R. Lively, M.A.J. Ferguson, D. Campbell, L. Packman and H. Waldmann
- A glycosulphatase that removes sulphate from mucus glycoprotein **683–689**  
A.M. Robertson, C.G. McKenzie, N. Sharpe and L.B. Stubbs
- Plasma activities of lecithin:cholesterol acyltransferase, lipid transfer proteins and post-heparin lipases in inbred strains of rabbits hypo- or hyper-responsive to dietary cholesterol **729–734**  
G.W. Meijer, P.N.M. Demacker, A. Van Tol, J.E.M. Groener, J.G.P. Van Der Palen, A.F.H. Stalenhoef, L.M.F. Van Zutphen and A.C. Beynen
- N.m.r. and molecular-modelling studies of the solution conformation of heparin **849–858**  
B. Mulloy, M.J. Forster, C. Jones and D.B. Davies
- Characterization of quail intestinal mucin as a ligand for endogenous quail lectin **867–872**  
R. Fang, M. Mantle and H. Ceri
- Studies on the carbohydrate-binding characteristics of human pulmonary surfactant-associated protein A and comparison with two other collectins: mannan-binding protein and conglutinin **873–878**  
J.S. Haurum, S. Thiel, H.P. Haagsman, S.B. Laursen, B. Larsen and J.C. Jensenius

**Gene structure and expression**

- DNA substrate specificity of pea DNA methylase **617–624**  
C.E. Houlston, H. Lindsay, S. Pradhan and R.L.P. Adams
- The role of the 5'-flanking region in the cell-specific transcription of the human von Willebrand factor gene **641–648**  
V. Ferreira, Z. Assouline, J.-L. Schwachtgen, B.R. Bahnak, D. Meyer and D. Kerbiriou-Nabias
- Retinoic acid receptor  $\gamma 2$  gene expression is up-regulated by retinoic acid in 3T3-L1 preadipocytes **807–812**  
Y. Kamei, T. Kawada, R. Kazuki and E. Sugimoto
- Kinetics and mechanism of DNA repair: an automated programmable apparatus for fast time-resolved studies of the repair of mammalian DNA after u.v. irradiation **825–828**  
C.W. Wharton, R.A. Meldrum, C. Reason, J. Boone and W. Lester
- Functional analysis of the human somatic angiotensin I-converting enzyme gene promoter **843–848**  
P. Testut, F. Soubrier, P. Corvol and C. Hubert

**Regulation of metabolism**

- $\text{NH}_4^+$  metabolism and the intracellular pH in isolated perfused rat liver **667–673**  
J. Zange, J. Gronczewski and A.W.H. Jans
- Biosynthesis of 3,4-didehydroretinol from retinol by human skin keratinocytes in culture **675–682**  
O. Rollman, E.J. Wood, M.J. Olsson and W.J. Cunliffe
- Phorbol myristate acetate stimulates [ $^3\text{H}$ ]choline incorporation into phosphatidylcholine independently of the 'de novo' pathway in Krebs-II ascitic cells: a unique effect of phorbol ester on choline uptake **739–744**  
H. Tronchère, F. Tercé, M. Record and H. Chap
- Hepatic lipase function and the accumulation of  $\beta$ -very-low-density lipoproteins in the plasma of cholesterol-fed rabbits **745–750**  
S. Chang and J. Borensztajn
- DNA precursors are channelled to nuclear matrix DNA replication sites **775–779**  
P.L. Panzeter and D.P. Ringer
- Phenylalaninylargininylarginine: a novel tripeptide exerting  $\text{Zn}^{2+}$ -dependent, insulin-mimetic inhibitory action on myocardial proteolysis **801–805**  
L. Zhang and T.D. Lockwood

**Membranes and bioenergetics**

- L-Alanine uptake by rat liver parenchymal and haematopoietic cells during the perinatal period **819–824**  
J.V. Martinez-Mas, J. Casado, A. Felipe, J.J.G. Marin and M. Pastor-Anglada

**Receptors and signal transduction**

- Correlation between secretion and phospholipase D activation in differentiated HL60 cells **649–655**  
J. Stutchfield and S. Cockcroft
- $\beta$ -Adrenergic mobilization of  $\text{Ca}^{2+}$  from an intracellular store in rat submandibular acini **691–695**  
C. Lloyd Mills, M.B. Hallett, M.A. McPherson and R.L. Dormer
- Cross-talk between muscarinic- and adenosine-receptor signalling in the regulation of cytosolic free  $\text{Ca}^{2+}$  and insulin secretion **721–728**  
T.J. Biden and C.L. Browne
- Adenosine 5'-[ $\alpha\beta$ -methylene]triphosphate potentiates the oscillatory cytosolic  $\text{Ca}^{2+}$  responses of hepatocytes to ATP, but not to ADP **757–760**  
C.J. Dixon, P.H. Cobbold and A.K. Green

Signalling through CD28 T-cell activation pathway involves an inositol phospholipid-specific phospholipase C activity	J. Nunes, S. Klasen, M.-D. Franco, C. Lipcey, C. Mawas, M. Bagnasco and D. Olive	<b>835–842</b>
<b>Cell biology and development</b>		
Cloning of the gene for glutamate decarboxylase and its expression during conidiation in <i>Neurospora crassa</i>	R. Hao and J.C. Schmit	<b>735–738</b>
<b>Corrections</b>		
Characterization of a DNA-damage-recognition protein from F9 teratocarcinoma cells, which is inducible by retinoic acid and cyclic AMP by C.C.-K. Chao, N.-K. Sun and S. Lin-Chao (volume 290, pages 129–134, 1993)		<b>879</b>
