

Review

Calcium: its modulation in liver by cross-talk between the actions of glucagon and calcium-mobilizing agonists
by F.L. Bygrave and A. Benedetti

1-14

Research Communications

Inactivation of glycogen synthase kinase-3 β by phosphorylation: new kinase connections in insulin and growth-factor signalling

C. Sutherland, I. Leighton and P. Cohen

15-19

Synthetic RGD peptides derived from the adhesive domains of snake-venom proteins: evaluation as inhibitors of platelet aggregation

X. Lu, J.J. Deadman, J.A. Williams, V.V. Kakkar and S. Rahman

21-24

Research Papers**Proteins**

Isolation and characterization of phosphorylated bovine prolactin

B.G. Kim and C.L. Brooks

41-47

Affinity labelling of smooth-muscle myosin light-chain kinase with 5'-[p-(fluorosulphonyl)benzoyl]adenosine

H. Komatsu and M. Ikebe

53-58

2',5'-Oligoadenylate-dependent RNAase located in nuclei: biochemical characterization and subcellular distribution of the nuclease in human and murine cells

B.A. Bayard and J.B. Gabrion

155-160

Expression of functional human retinol-binding protein in *Escherichia coli* using a secretion vector

A. Sivaprasadarao and J.B.C. Findlay

209-215

Enzymes

Mechanism-based inactivation of gastric peroxidase by mercaptomethylimidazole

U. Bandyopadhyay, D. Kr. Bhattacharyya and R.K. Banerjee

79-84

Kinetic mechanism of activation by cardiolipin (diphosphatidylglycerol) of the rat liver multicatalytic proteinase

I. Ruiz de Mena, E. Mahillo, J. Arribas and J.G. Castaño

93-97

Studies of the active site of m-calpain and the interaction with calpastatin

C. Crawford, N.R. Brown and A.C. Willis

135-142

Construction of a cDNA encoding the multifunctional animal fatty acid synthase and expression in *Spodoptera frugiperda* cells using baculoviral vectors

A.K. Joshi and S. Smith

143-149

Reversible modification of rat liver glutathione S-transferase 3-3 with 1-chloro-2,4-dinitrobenzene: specific labelling of Tyr-115

L.-F. Liu, J.-L. Hong, S.-P. Tsai, J.-C. Hsieh and M.F. Tam

189-197

Cloning, characterization and import studies on protochlorophyllide reductase from wheat (*Triticum aestivum*)

G.R. Teakle and W.T. Griffiths

225-230

Mode of action, kinetic properties and physicochemical characterization of two different domains of a bifunctional (1 \rightarrow 4)- β -D-xylanase from *Ruminococcus flavefaciens* expressed separately in *Escherichia coli*

V. Garcia-Campayo, S.I. McCrae, J.-X. Zhang, H.J. Flint and T.M. Wood

235-243

Carbohydrates and lipids

Sulphation of proteochondroitin and 4-methylumbelliferyl β -D-xyloside-chondroitin formed by mouse mastocytoma cells cultured in sulphate-deficient medium

J.E. Silbert, G. Sugumaran and J.N. Cogburn

119-126

Lipoxin synthase activity of human platelet 12-lipoxygenase

M. Romano, X.-S. Chen, Y. Takahashi, S. Yamamoto, C.D. Funk and C.N. Serhan

127-133

Rapid induction of microsomal $\Delta^{12}(\omega 6)$ -desaturase activity in chilled *Acanthamoeba castellanii*

A.L. Jones, D. Lloyd and J.L. Harwood

183-188

Lamp-1 does not acquire the large polylectosaminoglycans characteristic of F9 cells

P.A. Romero, T. Way and A. Herscovics

253-257

A novel ganglioside with a free amino group in bovine brain	K.I.-P.J. Hidari, F. Irie, M. Suzuki, K. Kon, S. Ando and Y. Hirabayashi	259–263
Activation of a peroxisome-proliferating catabolite of cholic acid to its CoA ester	T. Nishimaki-Mogami, A. Takahashi and Y. Hayashi	265–270
Gene structure and expression		
Induction of germ-cell alkaline phosphatase by butyrate and cyclic AMP in BeWo choriocarcinoma cells	J.F. Telfer and C.D. Green	59–65
Retinoic acid and cyclic AMP synergistically induce the expression of liver/bone/kidney-type alkaline phosphatase gene in L929 fibroblastic cells	M. Gianni, M. Terao, S. Sozzani and E. Garattini	67–77
The developmental profile of lactoferrin in mouse epididymis	L.-C. Yu and Y.-H. Chen	107–111
Effects of cold environment on mitochondrial genome expression in the rat: evidence for a tissue-specific increase in the liver, independent of changes in mitochondrial gene abundance	I. Martin, O. Viñas, T. Mampel, R. Iglesias and F. Villarroya	231–234
Regulation of metabolism		
Insulin secretion, insulin content and glucose phosphorylation in RINm5F insulinoma cells after transfection with human GLUT2 glucose-transporter cDNA	M. Tiedge, M. Höhne and S. Lenzen	113–118
Inhibition of glutathione synthesis increases the toxicity of oxidized low-density lipoprotein to human monocytes and macrophages	N. Gotoh, A. Graham, E. Niki and V.M. Darley-Usmar	151–154
Modulation of iron metabolism in monocyte cell line U937 by inflammatory cytokines: changes in transferrin uptake, iron handling and ferritin mRNA	M. Fahmy and S.P. Young	175–181
Effects of glucose starvation on the oxidation of fatty acids by maize root tip mitochondria and peroxisomes: evidence for mitochondrial fatty acid β -oxidation and acyl-CoA dehydrogenase activity in a higher plant	M. Dieuaide, I. Couée, A. Pradet and P. Raymond	199–207
The regulation of hepatic carbon flux by pyruvate dehydrogenase and pyruvate dehydrogenase kinase during long-term food restriction	M.C. Sugden, R.M. Grimshaw and M.J. Holness	217–223
Membranes and bioenergetics		
Ionomycin activates electrogenic Ca^{2+} influx in rat thymic lymphocytes	M.J. Mason and S. Grinstein	33–39
Modulation by fatty acids of Ca^{2+} fluxes in sarcoplasmic-reticulum vesicles	C.M. Cardoso and L. de Meis	49–52
Receptors and signal transduction		
Dual phosphorylation and autophosphorylation in mitogen-activated protein (MAP) kinase activation	J.-H. Her, S. Lakhani, K. Zu, J. Vila, P. Dent, T.W. Sturgill and M.J. Weber	25–31
β_3 -adrenergic receptors are responsible for the adrenergic inhibition of insulin-stimulated glucose transport in rat adipocytes	C. Carpené, E. Chalaux, M. Lizarbe, A. Estrada, C. Mora, M. Palacin, A. Zorzano, M. Lafontan and X. Testar	99–105
<i>In vitro</i> translation of androgen receptor cRNA results in an activated androgen receptor protein	G.G.J.M. Kuiper, P.E. de Ruiter, J. Trapman, G. Jenster and A.O. Brinkmann	161–167
Lipopeptides activate G_i -proteins in dibutyl cyclic AMP-differentiated HL-60 cells	J.F. Klinker, A. Höer, I. Schwaner, S. Offermans, K. Wenzel-Seifert and R. Seifert	245–251
Cell biology and development		
Developmentally regulated transcription of the four liver-specific genes for inter- α -inhibitor family in mouse	J.-P. Salier, P. Chan, G. Raguenez, T. Zwingman and R.P. Erickson	85–91
Stimulation of secretion in permeabilized PC12 cells by adenosine 5'-[γ -thio]triphosphate: possible involvement of nucleoside diphosphate kinase	N.-D. Vu and P.D. Wagner	169–174

BJ Letters

Clarification of the nucleotide sequence at the 5'-end of the cDNA
for rat liver carnitine palmitoyltransferase II

B.C. Weis, D.W. Foster and J.D. McGarry

271–272
