

Nutrient Regulation of Insulin Secretion

Edited by P R Flatt

The mechanism of insulin release in response to the body's intake of nutrients is a problem at the centre of research into diabetes. **Nutrient Regulation of Insulin Secretion** is a comprehensive review of the mechanisms by which nutrients, such as glucose, and neurohormonal stimuli generated by feeding, control pancreatic B-cell function in health and disease.

"...an excellent collection of authoritative reviews. I was particularly impressed with the up-to-date feeling which was present throughout the book."

K Docherty, The Biochemist

"...a major work which will be a standard reference on the subject for some years.... It is extensively cross-referenced and despite the multiple authorship, it reads as a single volume. Flatt has done well to bring it all together so effectively. Anyone with even a vague interest in insulin secretion will find much of value."

D G Johnston, The Endocrinologist

ISBN 1 85578 004 6 Hardback 415 pages £60.00/US\$111.00 February 1992

27 Essays in Biochemistry

Just
Published

Volume 27

Edited by K F Tipton

27

Successfully relaunched by Portland Press in 1991 with a new format, each issue of **Essays in Biochemistry** contains more articles than before, carefully edited to provide information which can be assimilated by advanced undergraduates and are ideal as background to teaching notes.

27

Contents

27

The collagen superfamily - diverse structures and assemblies, *D J S Hulmes*

27

Towards an understanding of C3-C4 photosynthesis, *S Rawsthorne*

27

The biochemistry of blood clotting: the digestion of a liquid to form a solid, *M F Scully*
Endothelins, *T Masaki* and *M Yanagisawa*

27

Wither PQQ, *W S McIntire*

Ubiquitin, *R J Mayer* and *F J Doherty*

The repair of DNA Alkylation damage by methyltransferases and glycosylases, *L D Samson*

Roles of protein phosphorylation in synaptic transmission, *R Rodnight* and *S T Wofchuk*

Biosensors: principles and practice, *J D Newman* and *A P F Turner*

Cell death in Parkinson's disease, *S A Greenfield*

How groups of proteins titrate - a new approach, *H B F Dixon*

Proteolysis is a key process in virus replication, *G Kemp*, *A Webster* and *W C Russell*

ISBN 1 85578 015 1 Paperback 178 pages £15.00/US\$30.00 July 1992

Orders* and enquiries should be sent to: Portland Press Ltd,
Commerce Way, Colchester CO2 8HP, UK Tel: (0206) 796351 Fax: (0206) 799331

* Payment should accompany order and can be made by cheque or credit card.

The Biology of Nitric Oxide

Edited by **S Moncada, M A Marletta, J B Hibbs Jr. and E A Higgs**

The proceedings of the Second International Meeting on the Biology of Nitric Oxide brings together for the first time investigations from very different areas of research with a common interest in the newly discovered pathway synthesising nitric oxide from L-arginine in mammalian cells.

Part I - Physiological and Clinical Aspects

ISBN 1 85578 012 7 Hardback £87.50/US\$160.00 420 pages

Part II - Enzymology, Biochemistry and Immunology

ISBN 1 85578 013 5 Hardback £57.50/US\$110.00 230 pages

Parts I and II purchased together £140.00/US\$260.00

The Archaeobacteria: Biochemistry and Biotechnology

Edited by **M J Danson, D W Hough and G G Lunt**

This Biochemical Society Symposium drew together acknowledged international experts on archaeobacteria. They explored the biochemistry and molecular biology of these unusual organisms and examined how we might use these cells and their uniquely stable constituents to meet the demands of industry's biotechnological future.

"This is an excellent book, always interesting, very readable, state of the art and a significant potential addition to any library."

The Annexins

Edited by **S E Moss**

The annexin family presently consists of some 13 members expressed in organisms as widely diverse as higher plants, slime moulds, metazoans, insects, birds and mammals. This book reviews the major proposed functions of the annexins, including inhibition of phospholipase A₂ and of blood coagulation, exocytosis and calcium-channel activity.

The Archaeobacteria: Biochemistry and Biotechnology

Edited by M J Danson, D W Hough and G G Lunt

The tools of biotechnology are often living organisms and cell constituents which have to survive extremely challenging environments. Archaeobacteria may provide some of the answers to many of the problems of using biotechnological techniques under industrial conditions.

The Biochemical Society Symposium drew together acknowledged international experts on archaeobacteria. They explored the biochemistry and molecular biology of these unusual organisms, and then examined how we might use these cells and their uniquely stable constituents to meet the demands of industry's biotechnological future.

The book is divided into five sections:

- * The archaeobacteria
- * Biochemical features of archaeobacteria
- * Molecular biological features of archaeobacteria
- * Proteins in extreme environments
- * Biotechnological potential of the archaeobacteria

Contents

What are the archaeobacteria and why are they important?	W F Doolittle
The enzymology of archaeobacterial pathways of central metabolism	M J Danson and D W Hough
Bioenergetics and autotrophic carbon metabolism of chemolithotrophic archaeobacteria	G Fuchs <i>et al</i>
Biochemistry of methanogenesis	R S Wolfe
Archaeobacterial lipids: structure, biosynthesis and function	M Kates
Progress in developing the genetics of the halobacteria	W F Doolittle <i>et al</i>
RNA polymerases and transcription in archaeobacteria	W Zillig <i>et al</i>
Structure, function and evolution of the archaeal ribosome	A T Matheson
Chromosome structure and DNA topology in extremely thermophilic archaeobacteria	P Forterre <i>et al</i>
Halophilic malate dehydrogenase - a case history of biophysical investigations	H Eisenberg
Proteins from hyperthermophilic archaea	R Hensel <i>et al</i>
Biotechnological potential of halobacteria	F Rodriguez-Valera
Enzymes from thermophilic archaeobacteria: current and future applications in biotechnology	D A Cowan
Thermoacidophilic archaeobacteria: potential applications	P R Norris
Biotechnological potential of methanogens	L Daniels
Where next with archaeobacteria?	O Kandler

ISBN 1 85578 010 0 Hardback 207 pages plus index £45.00/US\$90.00 July 1992
