
Review

Sodium ion-dependent transporters for neurotransmitters: a review of recent developments
by D. Margaret Worrall and D. Clive Williams

425–436

Biochemical Journal**Volume 297, part 3****1 February 1994**

Research Communications

- Capacitative Ca²⁺ entry regulates Ca²⁺-sensitive adenylyl cyclases D.M.F. Cooper, M. Yoshimura, Y. Zhang, M. Chiono and R. Mahey **437–440**
- Chromosomal localization of human genes for arylamine N-acetyltransferase D. Hickman, A. Risch, V. Buckle, N.K. Spurr, S.J. Jeremiah, A. McCarthy and E. Sim **441–445**
- Full activation of a nuclear species of protein phosphatase-1 by phosphorylation with protein kinase A and casein kinase-2 A. Van Eynde, M. Beullens, W. Stalmans and M. Bollen **447–449**
- Some taste substances are direct activators of G-proteins M. Naim, R. Seifert, B. Nürnberg, L. Grünbaum and G. Schultz **451–454**

Research Papers**Proteins**

- Biosynthesis of two distinct types of mucin in HM3 human colon cancer cells S. Ohara, J.C. Byrd, J.R. Gum, Jr. and Y.S. Kim **509–516**
- Turnover of acyl-CoA-binding protein in four different cell lines measured by using two-dimensional polyacrylamide-gel electrophoresis C.L. Buus, K. Kristiansen and J. Knudsen **555–560**
- Purification and characterization of a cadmium-induced metallothionein from the shore crab *Carcinus maenas* (L.) K.L. Pedersen, S.N. Pedersen, P. Højrup, J.S. Andersen, P. Roepstorff, J. Knudsen and M.H. Depledge **609–614**

Enzymes

- The core-specific lysosomal α (1-6)-mannosidase activity depends on aspartamidohydrolase activity J.-F. Haeuw, T. Grard, C. Alonso, G. Strecker and J.-C. Michalski **463–466**
- Phosphorylation of adenosine in renal brush-border membrane vesicles by an exchange reaction catalysed by adenosine kinase J. Sayós, C. Solsona, J. Mallol, C. Lluís and R. Franco **491–496**
- Purification and characterization of phosphatidylinositol synthase from human placenta B.E. Antonsson **517–522**
- NADPH-cytochrome *c* reductase from human neutrophil membranes: purification, characterization and localization Y. Nisimoto, H. Otsuka-Murakami and S. Iwata **585–593**
- The amino acid sequence of the small monomeric phosphoglycerate mutase from the fission yeast *Schizosaccharomyces pombe* J. Nairn, N.C. Price, L.A. Fothergill-Gilmore, G.E. Walker, J.E. Fothergill and B. Dunbar **603–608**
- Substrate analogues as probes of the catalytic mechanism of L-mandelate dehydrogenase from *Rhodotorula graminis* O. Smékal, G.A. Reid and S.K. Chapman **647–652**

Carbohydrates and lipids

- Cellular uptake and catabolism of high-density-lipoprotein triacylglycerols in human cultured fibroblasts: degradation block in Neutral Lipid Storage Disease N. Hilaire, A. Nègre-Salvayre and R. Salvayre **467–473**
- Functional compartments of sulphatide metabolism in cultured living cells: evidence for the involvement of a novel sulphatide-degrading pathway M.-C. Tempesta, R. Salvayre and T. Levade **479–489**
- Altered hepatic catabolism of low-density lipoprotein subjected to lipid peroxidation *in vitro* W.L. Stone, M. Heimberg, R.L. Scott, I. LeClair and H.G. Wilcox **573–579**

Gene structure and expression

- Phorbol esters inhibit the glucocorticoid-mediated stimulation of cytosolic aspartate aminotransferase gene transcription S. Feilleux-Duché, M. Garlatti, M. Aggerbeck, J. Bouguet, J. Hanoune and R. Barouki **497–502**
- Expression of multiple γ -glutamyltransferase genes in man C. Courtay, N. Heisterkamp, G. Siest and J. Groffen **503–508**
- Possible role for mRNA stability in the ammonium-controlled regulation of nitrate reductase expression A.C. Cannons and L.C. Pendleton **561–565**

Regulation of metabolism

- Isolation of *S*-[2-carboxy-1-(1*H*-imidazol-4-yl)ethyl]-3-thiolactic acid, a new metabolite of histidine, from normal human urine and its formation from *S*-[2-carboxy-1-(1*H*-imidazol-4-yl)ethyl]cysteine M. Kinuta, T. Ubuka, W.-B. Yao, Y.-Q. Zhao and H. Shimizu **475–478**
- Regulation of hepatic level of fatty-acid-binding protein by hormones and clofibric acid in the rat S. Nakagawa, Y. Kawashima, A. Hirose and H. Kozuka **581–584**

Membranes and bioenergetics

- Two sites of glucose control of insulin release with distinct dependence on the energy state in pancreatic B-cells P. Detimary, P. Gilon, M. Nenquin and J.-C. Henquin **455–461**
- The effects of muscle contraction and insulin on glucose-transporter translocation in rat skeletal muscle J.T. Brozinick, Jr., G.J. Etgen, Jr., B.B. Yaspelkis, III and J.L. Ivy **539–545**
- Binding of Ca^{2+} to the $(\text{Ca}^{2+}\text{-Mg}^{2+})\text{-ATPase}$ of sarcoplasmic reticulum: equilibrium studies I.M.J. Henderson, Y.M. Khan, J.M. East and A.G. Lee **615–624**
- Binding of Ca^{2+} to the $(\text{Ca}^{2+}\text{-Mg}^{2+})\text{-ATPase}$ of sarcoplasmic reticulum: kinetic studies I.M.J. Henderson, A.P. Starling, M. Wictome J.M. East and A.G. Lee **625–636**

Receptors and signal transduction

- Rate of calcium entry determines the rapid changes in protein kinase C activity in angiotensin II-stimulated adrenal glomerulosa cells I. Kojima, N. Kawamura and H. Shibata **523–528**
- The inhibition of phosphoinositide synthesis and muscarinic-receptor-mediated phospholipase C activity by Li^+ as secondary, selective, consequences of inositol depletion in 1321N1 cells I.H. Batty and C.P. Downes **529–537**
- Phenylarsine oxide and phorbol myristate acetate inhibit the CD3-induced rise of cytosolic Ca^{2+} in Jurkat cells by refilling internal Ca^{2+} stores M. Deckert, C. Aussel, A. Bernard and J.-P. Breittmayer **567–572**
- Characterization of receptor-mediated and store-regulated Ca^{2+} influx in human neutrophils N. Demaurex, A. Monod, D.P. Lew and K.-H. Krause **595–601**
- Bovine testis and human erythrocytes contain different subtypes of membrane-associated $\text{Ins}(1,4,5)\text{P}_3/\text{Ins}(1,3,4,5)\text{P}_4$ 5-phosphomonoesterases M. Hodgkin, A. Craxton, J.B. Parry, P.J. Hughes, B.V.L. Potter, R.H. Michell and C.J. Kirk **637–645**

Cell biology and development

- Expression and secretion of glycosylphosphatidylinositol-specific phospholipase D by myeloid cell lines M. Xie and M.G. Low **547–554**

BJ Letters

- α -Crystallin: chaperoning and aggregation M.J.C. Crabbe and D. Goode **653–654**

Corrections

- DNA substrate specificity of pea DNA methylase by C.E. Houlston, M. Cummings, H. Lindsay, S. Pradhan and R.L.P. Adams (volume 293, pages 617–624, 1993) **655**
