

Research Communications

cDNA cloning and amino acid sequence of human mitochondrial $\Delta^3\Delta^2$ -enoyl-CoA isomerase: comparison of the human enzyme with its rat counterpart, mitochondrial short-chain isomerase

J.M. Kilponen, H.M. Häyrynen, M. Rehn and J.K. Hiltunen 1–5

Research Papers

Proteins

Regulation of fibrinolysis by non-esterified fatty acids

A.A.-R. Higazi, R. Aziza, A.A.-R. Samara and M. Mayer 251–255

Enzymes

Investigation of the cofactor-binding site of *Zymomonas mobilis* pyruvate decarboxylase by site-directed mutagenesis

J.M. Candy and R.G. Duggleby 7–13

Identification, purification and partial characterization of a carboxypeptidase from the matrix of rat liver mitochondria: a novel metalloenzyme

E. Figueiredo and M.C. Duque-Magalhães 15–19

Probing the active site of cytoplasmic aldehyde dehydrogenase with a chromophoric reporter group

T.M. Kitson and K.E. Kitson 25–30

NN-Dimethyl-1,4-phenylenediamine as an alternative reductant for peptidylglycine α -amidating mono-oxygenase catalysis

C. Li, C.D. Oldham and S.W. May 31–36

Expression of rat endopeptidase-24.18 in COS-1 cells: membrane topology and activity

P.-E. Milhiet, D. Corbeil, V. Simon, A.J. Kenny, P. Crine and G. Boileau 37–43

Structural requirements for the utilization of ascorbate analogues in the prolyl 4-hydroxylase reaction

G. Tschank, J. Sanders, K.-H. Baringhaus, F. Dallacker, K.I. Kivirikko and V. Günzler 75–79

Inactivation of yeast hexokinase by Cibacron Blue 3G-A: spectral, kinetic and structural investigations

R.N. Puri and R. Roskoski, Jr. 91–97

Circular dichroism of stem bromelain: a third spectral class within the family of cysteine proteinases

A. Arroyo-Reyna, A. Hernandez-Arana and R. Arreguin-Espinosa 107–110

Site-directed mutagenesis of rat muscle 6-phosphofructo-2-kinase/fructose-2,6-bisphosphatase: role of Asp-130 in the 2-kinase domain

M.H. Rider, K.M. Crepin, M. De Cloedt, L. Bertrand and L. Hue 111–115

Regulation of aflatoxin B₁-metabolizing aldehyde reductase and glutathione S-transferase by chemoprotectors

L.I. McLellan, D.J. Judah, G.E. Neal and J.D. Hayes 117–124

Synthesis, purification and kinetic properties of fluorescein-labelled penicillins

B. Lakaye, C. Damblon, M. Jamin, M. Galleni, S. Lepage, B. Joris, J. Marchand-Brynaert, C. Frydrych and J.-M. Frere 141–145

The actin-activated ATPase of co-polymer filaments of myosin and myosin-rod

D. Stepkowski, A.A. Orlova and C. Moos 153–158

Replacement of enzyme-bound calcium with strontium alters the kinetic properties of methanol dehydrogenase

T.K. Harris and V.L. Davidson 175–182

The green alga *Scenedesmus obliquus* contains both diadenosine 5',5''-P¹,P⁴-tetraphosphate (asymmetrical) pyrophosphohydrolase and phosphorylase activities

A.G. McLennan, E. Mayers, S. Hankin, N.M.H. Thorne, M. Prescott and R. Powls 183–189

Carbohydrates and lipids

Glucose oxidation and low-density lipoprotein-induced macrophage ceroid accumulation: possible implications for diabetic atherosclerosis

J.V. Hunt, M.A. Bottoms, K. Clare, J.T. Skamarauskas and M.J. Mitchinson 243–249

Gene structure and expression

A new alternative transcript encodes a 60 kDa truncated form of integrin β_3

I. Djaffar, Y.-P. Chen, C. Creminon, J. Maclouf, A.-M. Cieutat, O. Gayet and J.-P. Rosa 69–74

Evidence for a cell-specific negative regulatory element in the first intron of the gene for bovine elastin

A. Manohar and R.A. Anwar 147–152

Localized chemical reactivity in DNA associated with the sequence-specific bisintercalation of echinomycin	C. Bailly, D. Gentle, F. Hamy, M. Purcell and M.J. Waring	165–173
Human glutathione S-transferase Theta (GSTT1): cDNA cloning and the characterization of a genetic polymorphism	S. Pemble, K.R. Schroeder, S.R. Spencer, D.J. Meyer, E. Hallier, H.M. Bolt, B. Ketterer and J.B. Taylor	271–276
Regulation of metabolism		
Increase in retinyl palmitate concentration in eyes and livers and the concentration of interphotoreceptor retinoid-binding protein in eyes of vitiligo mutant mice	S.B. Smith, T. Duncan, G. Kutty, R.K. Kutty and B. Wiggert	63–68
Gene expression of GLUT3 glucose transporter regulated by glucose <i>in vivo</i> in mouse brain and <i>in vitro</i> in neuronal cell cultures from rat embryos	S. Nagamatsu, H. Sawa, N. Inoue, Y. Nakamichi, H. Takeshima and T. Hoshino	125–131
The analysis of rate limitation within enzymes: relations between flux control coefficients of rate constants and unidirectional rates, rate constants and thermodynamic parameters of single isolated enzymes	G.C. Brown and C.E. Cooper	159–164
Regulation of rat mammary-gland uptake of orally administered [¹⁴ C]triolein by insulin and prolactin: evidence for bihormonal control of lipoprotein lipase activity	T.H.M. Da Costa and D.H. Williamson	257–262
A structure–effect study of the induction by polyamines of the transport <i>in vitro</i> of the precursor of ornithine transcarbamylase	M ^a J. Marcoté, D. Corella, C. González-Bosch and J. Hernández-Yago	277–280
Membranes and bioenergetics		
Osmotically inducible uptake of betaine via amino acid transport system A in SV-3T3 cells	P.G. Petronini, E. De Angelis, A.F. Borghetti and K.P. Wheeler	45–50
Actions of the creatine analogue β -guanidinopropionic acid on rat heart mitochondria	J.F. Clark, Z. Khuchua, A.V. Kuznetsov, E. Vassil'eva, E. Boehm, G.K. Radda and V. Saks	211–216
Use of glycyl-L-phenylalanine 2-naphthylamide, a lysosome-disrupting cathepsin C substrate, to distinguish between lysosomes and prelysosomal endocytic vacuoles	T.O. Berg, P.E. Strømhaug, T. Løvdaal, P.O. Seglen and T. Berg	229–235
Receptors and signal transduction		
Carbachol activates protein kinase C in dispersed gastric chief cells	R.D. Raffaniello and J.-P. Raufman	21–24
Membrane-associated diacylglycerol kinase activity is increased by noradrenaline, but not by angiotensin II, in arterial smooth muscle	J. Ohanian and A.M. Heagerty	51–56
Inhibition of inositol trisphosphate-induced calcium release by caffeine is prevented by ATP	L. Missiaen, J.B. Parys, H. De Smedt, B. Himpens and R. Casteels	81–84
Cloning and expression in <i>Escherichia coli</i> of a dog thyroid cDNA encoding a novel inositol 1,4,5-trisphosphate 5-phosphatase	B. Verjans, F. De Smedt, R. Lecocq, V. Vanweyenberg, C. Moreau and C. Erneux	85–90
ADP-ribosylation of Rho proteins by <i>Clostridium botulinum</i> exoenzyme C3 is influenced by phosphorylation of Rho-associated factors	G. Fritz and K. Aktories	133–139
Exocytosis in chromaffin cells: evidence for a MgATP-independent step that requires a pertussis toxin-sensitive GTP-binding protein	N. Vitale, D. Thiersé, D. Aunis and M.-F. Bader	217–227
Surfactant protein D binding to alveolar macrophages	K. Miyamura, L.E.A. Leigh, J. Lu, J. Hopkin, A. López Bernal and K.B.M. Reid	237–242
Regulation of <i>fos-lacZ</i> fusion gene expression in primary mouse epidermal keratinocytes isolated from transgenic mice	W.B. Bollag, Y. Xiong, J. Ducote and C.S. Harmon	263–270
Cell biology and development		
Levels of the conversion endoproteases PC1 (PC3) and PC2 distinguish between insulin-producing pancreatic islet β cells and non- β cells	M. Neerman-Arbez, V. Cirulli and P.A. Halban	57–61
Selective inhibition of adenylate cyclase in bovine cortex by quinones: a novel cellular substrate for quinone cytotoxicity	O. Moullet and J.-L. Dreyer	99–105
Targeting of passenger protein domains to multiple intracellular membranes	F. Janiak, J.R. Glover, B. Leber, R.A. Rachubinski and D.W. Andrews	191–199
Regulation of heat shock protein synthesis by quercetin in human erythroleukaemia cells	G. Elia and M.G. Santoro	201–209
