Cover illustration: Similarity between the modelled structure of chymopapain M-and the crystal structure of papain. For details of differences with kinetic consequences, notably the Glu-23–Arg-65 interaction unique to chymopapain M, see the paper by M. P. Thomas et al. on pp. 805–820 of this issue. Illustration reproduced by permission of Professor K. Brocklehurst.
Instructions to Authors

General policy

The Biochemical Journal publishes papers in English in all fields of biochemistry, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally or new interpretations of existing results. Theoretical contributions will be considered equally with papers dealing with experimental work. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Preliminary, confirmatory or inconclusive work will not be published. The Biochemical Journal will not publish material that has been wholly or largely published elsewhere, even as a preliminary communication or an unrefereed symposium paper. Authors are expected to submit their papers in English.

The submission of a paper implies that it has been approved by all the named authors, that all persons entitled to authorship have been so named, that it reports unpublished work that is not under consideration elsewhere, and that if the paper is accepted for publication the authors will transfer to the Biochemical Society the copyright in the paper, which will then not be published elsewhere in the same form, in any language, in a similar or identical format. Authors are expected to submit their papers in English.

Authors may suggest potential reviewers for their paper. Such suggestions are under no obligation to follow such suggestions. Authors may also specify the names of those they wish to be excluded from the review process, and such wishes are usually respected unless, in the opinion of the journal, such a request unreasonably excludes all the expertise available to it in that scientific area.

To allow the referees to assess possible overlap with previous work, all submitted papers must be accompanied by duplicate copies of the author's relevant published work and of all related papers in press or under editorial consideration in this or other journals.

The paragraphs below are a summarized version of the journal's complete Instructions to Authors [Biochem. J. (1994) 297, 1–15], of which copies are available free of charge from the editorial office.

The following types of paper are included in the journal:

Research Papers. The normal form of publication, and may be of any length that is justified by their content. However, because of the rapid turnover of the journal, the length of a paper is subject to change depending on the current backlog.

Reviews. Short reviews will be written in formal style, allowing the presentation of new and significant work in a concise manner.

Communications. These are short (maximum four printed pages) papers bringing particular novel and significant findings to the attention of the research community. It is intended that a decision on acceptance or rejection will be made within two weeks of receipt, and publication of accepted Communications will follow within 2 months. Research Communications receive full but accelerated review and the criteria of "novelty and significance" are strictly enforced. Communications are not a path to accelerated publication of sound but non-urgent material. Authors must include in their letter of submission a brief statement of why they believe their Communication merits accelerated treatment.

BJ Letters. BJ Letters are brief (two printed pages or less) items of scientific correspondence intended to provide an opportunity to discuss or comment on particular points made in published work, to comment on or criticize work previously published in the Biochemical Journal, to discuss features of novel nucleotide and/or amino acid sequence data of particular biological significance, or to present a new hypothesis. They should not contain extensive new data (which would best be placed in a regular paper) and are subject to page restrictions. If a letter is polemical in nature, a reply will be solicited from other interested parties.

Reviews will usually be solicited, although unsolicited reviews will be considered for publication. Prospective writers of reviews should first consult the Reviews Editor, via the editorial office, and should encouage publication of preliminary or preliminary results. If a letter is polemical in nature, a reply will be solicited from other interested parties.

Procedure for submission

Before preparing papers for the journal, authors should consult with their colleagues to ensure that the typescript is familiar with the general format, such as the use of cross-headings, layout of tables and figures and citation of references. Typescripts should be double-spaced throughout (particularly references and table and figure legends) on numbered sheets of uniform size (preferably ISO A4) with wide margins. Output of low-quality dot matrix printers is not acceptable. A full page of text in the Biochemical Journal contains approximately 1200 words; when calculating the printed page, allowance must be made for the space occupied by tables and figures and the number of text words reduced accordingly.

Either the Harvard system or the numerical system of references may be used. A reference to "unpublished work" should be accompanied by the names of all persons concerned; a reference to a "personal communication" must be supported by written permission; the quotation from the person or persons concerned; both of these types of citation are permitted in the text only, not in the list of references.

Three copies of the typescript (four copies for Research Communications), with a brief covering letter to which should be attached an additional copy of the synopsis, should be sent to:

The Managing Editor
Biochemical Journal
59 Portland Place
London W1N 3AJ
U.K.

(phone number 071-637 5873; fax 071-323 1136; from overseas the international code for the U.K. is 44 and the leading 0 should be omitted).

The typescript should indicate the name, address, telephone number and fax number of the person to whom correspondence should be addressed. The top copy of the typescript should be marked as such and should have attached to it the original figures; for the other copies of the typescript, glossy prints (not photocopies) of the half-tone figures should be provided, but photocopies of line drawings will suffice. A short (page-heading) title of not more than 75 characters should be provided, and authors should indicate the preferred section in the table of contents for their paper:

- Proteins
- Enzymes
- Carbohydrates and lipids
- Gene structure and expression
- Regulation of metabolism
- Membranes and bioenergetics
- Receptors and signal transduction
- Cell biology and development

Submission by fax

Research Communications and BJ Letters that do not contain half-tone figures may be submitted by fax to the number above. Only one copy of the typescript need be transmitted to the editorial office. Every effort will be made to use the diskette during typesetting, but this cannot be guaranteed. Authors must ensure that files have been updated to incorporate all revisions, and hence that the diskette and the review decision will be returned by fax to the author. The current Instructions to Authors contains full details of this procedure.

Submission on diskette

The journal encourages authors to submit diskettes of accepted articles to the editorial office. Every effort will be made to use the diskette during typesetting, but this cannot be guaranteed. Authors must ensure that files have been updated to incorporate all revisions, and hence that the diskette and the review decision will be returned by fax to the author. The current Instructions to Authors contains full details of this procedure.

Other information

The Biochemical Journal is published and distributed by Portland Press Ltd on behalf of the Biochemical Society. It is published twice monthly; in 1994 volumes 297–304 (three parts each) will appear. The subscription also includes the annual compendium of Biochemical Journal Reviews and an author and key-index.

Subscription rates

Institutional subscription rates for 1994 are shown below. Subscribers to the Biochemical Journal can subscribe additionally to Biochemical Society Transactions at a reduced rate. Terms are cash with order (£ sterling for subscribers other than in North America, or US$ equivalent at current rate of exchange), or against proforma invoice. Orders should be sent to the address below, or through your usual agent.

The subscription rates for North America and Japan include elements for airfreight and Accelerated Surface Post respectively. Subscribers may opt for air-mail delivery at additional cost; details are available on application.

Microfiche and back issues

Volumes 102–296 of the Biochemical Journal are available on microfiche. Back issues are also available. Further details may be obtained from the address below.

Subscription department

Portland Press Ltd
P.O. Box 32, Commerce Way
