Research Communications
The effect of calcium-store depletion and refilling with various bivalent cations on tyrosine phosphorylation and Mn2+ entry in fura-2-loaded human platelets
Evidence against involvement of the acid lysosomal sphingomyelinase in the tumour-necrosis-factor- and interleukin-1-induced sphingomyelin cycle and cell proliferation in human fibroblasts
N. Andrieu, R. Salvayre and T. Levade 341–345
Identification of a phosphatidylinositol 3-hydroxy kinase in plant cells: association with the cytoskeleton

Research Papers
Proteins
Site-directed mutagenesis of proposed active-site residues of penicillin-binding protein 5 from Escherichia coli
M.P.G. van der Linden, L. de Haan, O. Dideberg and W. Keck 357–362
Characterization of two serpins from bovine plasma and milk
S. Christensen and L. Sottrup-Jensen 383–390
NF-kB/Rel family members are physically associated phosphoproteins
Effects of site-specific mutagenesis of tyrosine 105 in a Class A β-lactamase
W.A. Escobar, J. Miller and A.L. Fink 555–558

Enzymes
3H-n.m.r. studies of multiple conformations and dynamic processes in complexes of folate and methotrexate with Lactobacillus casei dihydrofolate reductase
N. Curtis, S. Moore, B. Birdsall, J. Bloxsidge, C.L. Gibson, J.R. Jones and J. Feeney 401–405
Ligand binding on to maize (Zea mays) malate synthase: a structural study
S. Beeckmans, A.S. Khan, L. Kanarek and E.V. Driessche 413–421
The role of tryptophan 97 of cytochrome P450 BM3 from Bacillus megaterium in catalytic function. Evidence against the "covalent switching" hypothesis of P-450 electron transfer
A.W. Munro, K. Malarek, J. McKnight, A.J. Thomson, S.M. Kelly, N.C. Price, J.G. Lindsay, J.R. Coggins and J.S. Miles 423–428
Kinetics of an enzyme reaction in which both the enzyme–substrate complex and the product are unstable or only the product is unstable
C. Garrido-Del Solo, F. Garcia-Cánovas, B.H. Havsteen, E. Valero and R. Varón 435–440
A study on the functional subunits of phospholipases A2 by enzyme immobilization
J.P.M. Ferreira, R. Sasisekharan, O. Louie and R. Langer 527–530
Possible role of protein kinase C-ε isoenzyme in inhibition of interleukin 1β induction of nitric oxide synthase in rat renal mesangial cells
H. Mühl and J. Pfeilschifter 607–612
Activation of the glycosyl-phosphatidylinositol-anchored membrane dipeptidase upon release from pig kidney membranes by phospholipase C
I.A. Brewis, A.J. Turner and N.M. Hooper 633–638

Carbohydrates and lipids
Analysis of glucocerebrosidase activity using N-(1-[14C]hexanoyl)-α-erythro-glucosylphosphoglycerol demonstrates a correlation between levels of residual enzyme activity and the type of Gaucher disease
I. Meivar-Levy, M. Horowitz and A.H. Futerman 377–382
Binding of surfactant protein A to the lipid A moiety of bacterial lipopolysaccharides
Different effects of mucosal, bovine lung and chemically modified heparin on selected biological properties of basic fibroblast growth factor
D. Coltrini, M. Rusnati, G. Zoppetti, P. Oreste, G. Grazioleti, A. Naggi and M. Presta 583–590
Regulation of glycosylation of Lamp-1 in the bovine renal epithelial cell line NBL-1 by changes in the concentration of extracellular phosphate

C.R. Helps and J.D. McGivan 613–618

Gene structure and expression

Expression of mouse phosphofructokinase-M gene alternative transcripts: evidence for the conserved two-promoter system

Translation initiation on the insulin-like growth factor II leader 1 is developmentally regulated

Archaebacterial histone-like protein MC1 can exhibit a sequence-specific binding to DNA

C. Teyssier, B. Laine, A. Gervais, J.-C. Maurizot and F. Culard 567–573

Glucose modulates the binding activity of the β-cell transcription factor IUF1 in a phosphorylation-dependent manner

W.M. MacFarlane, M.L. Read, M. Gilligan, I. Bujalska and K. Docherty 625–631

Regulation of metabolism

The role of hypusine depletion in cytostasis induced by S-adenosyl-L-methionine decarboxylase inhibition: new evidence provided by 1-methylisopropylamine and 1,12-dimethylisopropamine

T.L. Byers, J.R. Lakanen, J.K. Coward and A.E. Pegg 363–368

Comparison of the effects of Ca++, adenine nucleotides and pH on the kinetic properties of mitochondrial NAD+-isocitrate dehydrogenase and oxoglutarate dehydrogenase from the yeast Saccharomyces cerevisiae and rat heart

Kinetics of creatine uptake in the perfused mouse liver: a 31P-n.m.r. study of transgenic mice expressing creatine kinase (CKbb) in the liver

S. Masson and B. Quistorff 531–538

Membranes and bioenergetics

The hydrophilic domain of phospholamban inhibits the Ca++ transport step of the Ca++-ATPase

G. Hughes, J.M. East and A.G. Lee 511–516

ATP synthase from bovine heart mitochondria: identification by proteolysis of sites in F1/F0 exposed by removal of F0, and the oligomycin-sensitivity conferral protein

A spectroscopic study of the mitochondrial transit peptide of rat malate dehydrogenase

Receptors and signal transduction

Evidence from studies with hepatocyte suspensions that store-operated Ca++ inflow requires a pertussis toxin-sensitive trimeric G-protein

K.C. Fernando and G.J. Barritt 351–356

Inhibition of adenylate cyclase activity by galanin in rat insulinoma cells is mediated by the G-protein G3

P. de Mazancourt, P.K. Goldsmith and L.S. Weinstein 369–375

Thrombin-receptor agonist peptides, in contrast to thrombin itself, are not full agonists for activation and signal transduction in human platelets in the absence of platelet-derived secondary mediators

L.-F. Lau, K. Pumiglia, Y.P. Côté and M.B. Feinstein 391–400

Rapid stimulation of mitogen-activated protein kinase of rat liver by prolactin

Co-purification of a protein tyrosine phosphatase with activated somatostatin receptors from rat pancreatic acinar membranes

Transforming growth factor-α increases tyrosine phosphorylation of microtubule-associated protein kinase in a small intestinal crypt cell line (IEC-6)

B.L. Oliver, R.I. Sha’afi and J.-J. Hajjar 455–460

Lysophosphatidic acid inhibits gap-junctional communication and stimulates phosphorylation of connexin-43 in WB cells: possible involvement of the mitogen-activated protein kinase cascade

C.S.T. Hii, S.-Y. Oh, S.A. Schmidt, K.J. Clark and A.W. Murray 475–479

Neutrophil proteinase cathepsin G is proteolytically active on the human platelet glycoprotein Ib-IX receptor: characterization of the cleavage sites within the glycoprotein Ibα subunit
