Research Communications

*Escherichia coli* chorismate synthase: a deuterium kinetic-isotope effect under single-turnover and steady-state conditions shows that a flavin intermediate forms before the C-(6proR)-H bond is cleaved

Different molecular forms of rat kidney gp330, the dominant autoantigen of active Heymann nephritis

Construction and characterization of a chimeric β-glucosidase

Vesicle-associated membrane protein-2 (synaptobrevin-2) forms a complex with synaptophysin

Research Papers

Proteins

Identification of a substrate site for transglutaminases on the human protein synthesis initiation factor 5A

Heterologous expression in *Escherichia coli* of native and mutant forms of the major intrinsic protein of rat eye lens (MIP26)

Isoform 1 (mdr3) is the major form of P-glycoprotein expressed in mouse brain capillaries. Evidence for cross-reactivity of antibody C219 with an unrelated protein

A gelsolin-related protein from lobster muscle: cloning, sequence analysis and expression

Cooperative interaction of oestrogen receptor ‘zinc finger’ domain polypeptides on DNA binding

Identification of a 23 kDa protein from maize photaffinity-labelled with 5-azido-[7-3H]indol-3-ylacetic acid

Measurement of the spin concentration of metalloprotein samples from saturation-magnetization data with particular reference to cytochrome c oxidase

Comparative study of the structural and functional properties of a bovine plasma C-type lectin, collectin-43, with other collectins

Increased response to cholesterol feeding in apolipoprotein C1-deficient mice

Conformational changes and in vitro core-formation modifications induced by site-directed mutagenesis of the specific N-terminus of pea seed ferritin

Enzymes

src-Homology 2 (SH2) domain ligation as an allosteric regulator: modulation of phosphoinositide-specific phospholipase Cy1 structure and activity

Regulatory effects of ATP and luciferin on firefly luciferase activity

Changes in the structure of bovine phospholipase A2 upon micelle binding

Glyoxalase III from *Escherichia coli*: a single novel enzyme for the conversion of methylglyoxal into α-lactate without reduced glutathione

A non-modular endo-β-1,4-mannanase from *Pseudomonas fluorescens* subspecies *cellulosa*
## Contents

### Gene structure and expression

Binding of histone H1e-c variants to CpG-rich DNA correlates with the inhibitory effect on enzymic DNA methylation

The effect of histone H1 and DNA methylation on transcription

Human eosinophil major basic protein, a mediator of allergic inflammation, is expressed by alternative splicing from two promoters

*In vitro* association between the Jun protein family and the general transcription factors, TBP and TFIIB
C.C. Franklin, A.V. McCulloch and A.S. Kraft 967–974

### Regulation of metabolism

Identification by photoaffinity labelling of a pyridine nucleotide-dependent tri-iodothyronine-binding protein in the cytosol of cultured astroglial cells
A. Beslin, M.-P. Vié, J.-P. Blondeau and J. Francon 729–737

Monoclonal antibodies that specifically recognize necepitope sequences generated by ‘aggrecanase’ and matrix metalloproteinase cleavage of aggrecan: application to catalolism *in situ* and *in vitro*
C.E. Hughes, B. Caterson, A.J. Fosang, P.J. Roughley and J.S. Mort 799–804

Tissue differences in the response of the pyruvate dehydrogenase complex to a glucose load during the development of obesity in gold–thioglucose-obese mice
J.M. Bryson, G.J. Cooney, V.R. Wensley, J.L. Phuyal and I.D. Caterson 811–816

Activation of hepatic glutaminase by spermine

The effect of increasing nucleotide-sugar concentrations on the incorporation of sugars into glycoconjugates in rat hepatocytes
W.R. Pels Rijcken, B. Overdijk, D.H. Van Den Eijnden and W. Ferwerda 865–870

Cell-type specificity of inhibition of glycolysis by 5-amino-4-imidazolecarboxamide riboside. Lack of effect in rabbit cardiomyocytes and human erythrocytes, and inhibition in FTO-2B rat hepatoma cells
F. Javaux, M.F. Vincent, D.R. Wagner and G. Van den Bergh 913–919

Insulin-independent and extremely rapid switch in the partitioning of hepatic fatty acids from oxidation to esterification in starved-refed diabetic rats. Possible roles for changes in cell pH and volume
A.M.B. Moir and V.A. Zammit 953–958

Hepatic molecular conversion and detoxification of ferritin iron in adult lampreys (*Geotria australis*), following natural and induced iron loading
L.R. Harris, D.J. Macey, I.C. Potter and M.H. Cake 975–980

 Sulphation of L-tyrosine in mammalian cells: a comparative study
Y. Sakakibara, M. Suiko, H. Nakajima and M.C. Liu 993–998

### Membranes and bioenergetics

Circular-dichroism and fluorescence studies on melittin: effects of C-terminal modifications on tetramer formation and binding to phospholipid vesicles
M. van Veen, G.N. Georgiou, A.F. Drake and R.J. Cherry 785–790

Topological organization of the Rieske iron-sulphur protein and subunit IV in the cytochrome bc, complex of *Rhodobacter sphaeroides*
J. Wu and R.A. Niederman 823–828

### Receptors and signal transduction

Platelet-derived growth factor and angiotensin II stimulate the mitogen-activated protein kinase cascade in renal mesangial cells: comparison of hypertrophic and hyperplastic agonists
A. Huwiler, S. Stabel, D. Fabbro and J. Pfeilschifter 777–784

Expression of human platelet-activating factor receptor gene in EoL-1 cells following butyrate-induced differentiation

Interleukin-3 facilitates glucose transport in a myeloid cell line by regulating the affinity of the glucose transporter for glucose: involvement of protein phosphorylation in transporter activation
M.V. Berridge and A.S. Tan 843–851

Arachidonic acid is functioning as a second messenger in activating the Ca\(^{2+}\) entry process on H\(_{1}\)-histaminceptor stimulation in DDT, MF-2 cells
L. van der Zee, A. Nelemans and A. den Hertog 859–864

Biphasic and differential modulation of Ca\(^{2+}\) entry by ATP and UTP in promyelocytic leukaemia HL60 cells
M. Montero, J. Garcia-Sancho and J. Alvarez 879–887
