

**Review**

Cation- $\pi$  bonding and amino-aromatic interactions in the biomolecular recognition of substituted ammonium ligands  
by N.S. Scrutton and A.R.C. Raine

1-8

**Research Communications**

Fibroblast growth factor-1 stimulation of quiescent NIH 3T3 cells increases G/T mismatch-binding protein expression

P.J. Donohue, S.-L.Y. Feng, G.F. Alberts, Y. Guo, K.A. Peifley, D.K.W. Hsu and J.A. Winkles **9-12**

Attenuation of oxidation and nitration reactions of peroxynitrite by selenomethionine, selenocystine and ebselen

K. Briviba, I. Roussyn, V.S. Sharov and H. Sies **13-15**

Tumour necrosis factor- $\alpha$ -induced phosphorylation and activation of cytosolic phospholipase  $A_2$  are abrogated by an inhibitor of the p38 mitogen-activated protein kinase cascade in human neutrophils

W.H. Waterman, T.F.P. Molski, C.-K. Huang, J.L. Adams and R.I. Sha'afi **17-20**

**Research Papers****Proteins**

Inhibition of hsc70-catalysed clathrin uncoating by HSP70 proteins

M.E. Cheetham, B.H. Anderton and A.P. Jackson **103-108**

Reconstitution of mammalian pyruvate dehydrogenase and 2-oxoglutarate dehydrogenase complexes: analysis of protein X involvement and interaction of homologous and heterologous dihydrolipoamide dehydrogenases

S.J. Sanderson, S.S. Khan, R.G. McCartney, C. Miller and J.G. Lindsay **109-116**

Heterogeneity in utilization of N-glycosylation sites Asn<sup>624</sup> and Asn<sup>138</sup> in human lactoferrin: a study with glycosylation-site mutants

P.H.C. van Berkel, H.A. van Veen, M.E.J. Geerts, H.A. de Boer and J.H. Nuijens **117-122**

Structural requirements for annexin I-S100C complex-formation

J. Seemann, K. Weber and V. Gerke **123-129**

Time-course studies by synchrotron X-ray solution scattering of the structure of human low-density lipoprotein during  $Cu^{2+}$ -induced oxidation in relation to changes in lipid composition

D.F. Meyer, A.S. Nealis, C.H. MacPhee, P.H.E. Groot, K.E. Suckling, K.R. Bruckdorfer and S.J. Perkins **217-227**

Predicted  $\alpha$ -helix/ $\beta$ -sheet secondary structures for the zinc-binding motifs of human papillomavirus E7 and E6 proteins by consensus prediction averaging and spectroscopic studies of E7

C.G. Ullman, P.I. Haris, D.A. Galloway, V.C. Emery and S.J. Perkins **229-239**

**Enzymes**

Role of lysine, tryptophan and calcium in the  $\beta$ -elimination activity of a low-molecular-mass pectate lyase from *Fusarium moniliformae*

M.N. Rao, A.A. Kembhavi and A. Pant **159-164**

Conformational changes and the role of metals in the mechanism of type II dehydroquinase from *Aspergillus nidulans*

J.R. Bottomley, A.R. Hawkins and C. Kleanthous **269-278**

Mutagenesis of the active site of the human Theta-class glutathione transferase GSTT2-2: catalysis with different substrates involves different residues

K.-L. Tan, G. Chelvanayagam, M.W. Parker and P.G. Board **315-321**

**Carbohydrates and lipids**

Post-translational processing of the phosphatidylserine decarboxylase gene product in Chinese hamster ovary cells

O. Kuge, K. Saito, M. Kojima, Y. Akamatsu and M. Nishijima **33-38**

Characterization of a non-reducing terminal fragment from bovine articular cartilage keratan sulphates containing  $\alpha$ (2-3)-linked sialic acid and  $\alpha$ (1-3)-linked fucose. A sulphated variant of the VIM-2 epitope

G.M. Brown, T.N. Huckerby, B.L. Abram and I.A. Nieduszynski **137-141**

Characterization of a rat liver Golgi sulphotransferase responsible for the 6-O-sulphation of <i>N</i> -acetylglucosamine residues in $\beta$ -linkage to mannose: role in assembly of sialyl-galactosyl- <i>N</i> -acetylglucosamine 6-sulphate sequence of N-linked oligosaccharides	R.G. Spiro, Y. Yasumoto and V. Bhoyroo	<b>209–216</b>
<b>Gene structure and expression</b>		
Molecular cloning of a cDNA coding for GTP cyclohydrolase I from <i>Dictyostelium discoideum</i>	K. Witter, D.J. Cahill, T. Werner, I. Ziegler, W. Rödl, A. Bacher and M. Gütllich	<b>27–32</b>
The gene <i>G13</i> in the class III region of the human MHC encodes a potential DNA-binding protein	A. Khanna and R.D. Campbell	<b>81–89</b>
Cloning and expression of a new HOXC6 transcript encoding a repressing protein	A. Chariot, V. Castronovo, P. Le, C. Gillet, M.E. Sobel and J. Gielen	<b>91–97</b>
Isolation and characterization of the gene encoding an aminopeptidase involved in the selective toxicity of ascamycin toward <i>Xanthomonas campestris</i> pv. <i>citri</i>	T. Sudo, K. Shinohara, N. Dohmae, K. Takio, R. Usami, K. Horikoshi and H. Osada	<b>99–102</b>
Lipid mediators of insulin resistance: ceramide signalling down-regulates GLUT4 gene transcription in 3T3-L1 adipocytes	S.D. Long and P.H. Pekala	<b>179–184</b>
Post-transcriptional regulation of H-ferritin gene expression in human monocytic THP-1 cells by protein kinase C	J.-H.S. Pang, C.-J. Wu and L.-Y. Chau	<b>185–189</b>
High-yield production of functionally active human serum transferrin using a baculovirus expression system, and its structural characterization	S.A. Ali, H.C. Joao, R. Csonga, F. Hammerschmid and A. Steinkasserer	<b>191–195</b>
Molecular cloning and expression in COS-1 cells of pig kidney aminopeptidase P	R.J. Hyde, N.M. Hooper and A.J. Turner	<b>197–201</b>
Y-box proteins interact with the S1 nuclease-sensitive site in the chicken $\alpha 2(I)$ collagen gene promoter	D. Bayarsaihan, B. Enkhmandakh and L.N. Lukens	<b>203–207</b>
Thyromimetic mode of action of peroxisome proliferators: activation of 'malic' enzyme gene transcription	R. Hertz, V. Nikodem, A. Ben-Ishai, I. Berman and J. Bar-Tana	<b>241–248</b>
Transfection of human topoisomerase II $\alpha$ into etoposide-resistant cells: transient increase in sensitivity followed by down-regulation of the endogenous gene	T. Asano, T. An, J. Mayes, L.A. Zwelling and E.S. Kleinerman	<b>307–313</b>
<b>Regulation of metabolism</b>		
Alterations in nutritional status regulate acetyl-CoA carboxylase expression in avian liver by a transcriptional mechanism	F.B. Hillgartner, T. Charron and K.A. Chesnut	<b>263–268</b>
<b>Membranes and bioenergetics</b>		
Substrate protection against inactivation of the mammalian polyamine-transport system by 1-ethyl-3-(3-dimethylaminopropyl)carbodi-imide	K. Torossian, M. Audette and R. Poulin	<b>21–26</b>
The catalytic activity of the endoplasmic reticulum-resident protein microsomal epoxide hydrolase towards carcinogens is retained on inversion of its membrane topology	T. Friedberg, R. Holler, B. Löllmann, M. Arand and F. Oesch	<b>131–136</b>
Theoretical studies on the control of oxidative phosphorylation in muscle mitochondria: application to mitochondrial deficiencies	B. Korzeniewski and J.-P. Mazat	<b>143–148</b>
<b>Receptors and signal transduction</b>		
Pervanadate activation of intracellular kinases leads to tyrosine phosphorylation and shedding of syndecan-1	J. Reiland, V.L. Ott, C.S. Lebakken, C. Yeaman, J. McCarthy and A.C. Rapraeger	<b>39–47</b>
Purification and biochemical characterization of $\alpha$ -amino-3-hydroxy-5-methyl-4-isoxazolepropionic acid/kainate-sensitive L-glutamate receptors of pig brain	Y.-C. Chang, T.-Y. Wu, B.-F. Li, L.-H. Gao, C.-I. Liu and C.-L. Wu	<b>49–57</b>
Early response gene signalling in bryostatin-stimulated primary B chronic lymphocytic leukaemia cells <i>in vitro</i>	Z.-Q. Ning, T. Hirose, R. Deed, J. Newton, J.J. Murphy and J.D. Norton	<b>59–65</b>
Biochemical isolation of a membrane microdomain from resting platelets highly enriched in the plasma membrane glycoprotein CD36	D.J. Dorahy, L.F. Lincz, C.J. Meldrum and G.F. Burns	<b>67–72</b>
Transformation of Rat-1 fibroblasts with the <i>v-src</i> oncogene induces inositol 1,4,5-trisphosphate 3-kinase expression	P.J. Woodring and J.C. Garrison	<b>73–80</b>

---

Distinct biochemical properties of the native members of the G <sub>12</sub> G-protein subfamily. Characterization of G $\alpha_{12}$ purified from rat brain	R. Harhammer, B. Nürnberg, C. Harteneck, D. Leopoldt, T. Exner and G. Schultz	<b>165–171</b>
G-protein inhibition of phospholipase C- $\beta_1$ in membranes: role of G-protein $\beta\gamma$ subunits	I. Litosch	<b>173–178</b>
Molecular cloning and characterization of PTP $\pi$ , a novel receptor-like protein-tyrosine phosphatase	S. Crossland, P.D. Smith and M.R. Crompton	<b>249–254</b>
Distinct inhibitory ATP-regulated modulatory domain (ARM <sub>1</sub> ) in membrane guanylate cyclases	T. Duda, R. Goraczniak and R.K. Sharma	<b>279–283</b>
Tissue-specific distribution and subcellular distribution of phospholipase D in rat: evidence for distinct RhoA- and ADP-ribosylation factor (ARF)-regulated isoenzymes	J.J. Provost, J. Fudge, S. Israelit, A.R. Siddiqi and J.H. Exton	<b>285–291</b>
<b>Cell biology and development</b>		
Association of insulin-degrading enzyme with a 70 kDa cytosolic protein in hepatoma cells	F. Authier, P.H. Cameron and V. Taupin	<b>149–158</b>
Localization and targeting of isocitrate lyases in <i>Saccharomyces cerevisiae</i>	K.M. Taylor, C.P. Kaplan, X. Gao and A. Baker	<b>255–262</b>
The CDC2-related kinase PITALRE is the catalytic subunit of active multimeric protein complexes	J. Garriga, X. Mayol and X. Graña	<b>293–298</b>
Nitric oxide-induced apoptosis: p53-dependent and p53-independent signalling pathways	U.K. Messmer and B. Brüne	<b>299–305</b>
An increase in cytosolic Ca <sup>2+</sup> delays cAMP oscillations in <i>Dictyostelium</i> cells	D. Malchow, R. Schaloske and C. Schlatterer	<b>323–327</b>
