

Review

Biochemistry and pathology of radical-mediated protein oxidation
by R.T. Dean, S. Fu, R. Stocker and M.J. Davies 1–18

Research Communications

Deletion of 24 amino acids from the C-terminus of phosphatidylinositol transfer protein causes loss of phospholipase C-mediated inositol lipid signalling

S. Prosser, R. Sarra, P. Swigart, A. Ball and S. Cockcroft 19–23

Glutathione transferases catalyse the detoxication of oxidized metabolites (*o*-quinones) of catecholamines and may serve as an antioxidant system preventing degenerative cellular processes

S. Baez, J. Seguar-Aguilar, M. Widersten, A.-S. Johansson and B. Mannervik 25–28

Evidence against an early signalling role for ceramide in Fas-mediated apoptosis

D.J. Sillence and D. Allan 29–32

Research Papers**Proteins**

α -Glucosidase and *N*-acetylglucosamine-6-sulphatase are the major mannose-6-phosphate glycoproteins in human urine

D.E. Sleat, S.R. Kraus, I. Sohar, H. Lackland and P. Lobel 33–39

Structural characterization of the products of hydroxyl-radical damage to leucine and their detection on proteins

S.-L. Fu and R.T. Dean 41–48

von Willebrand factor binds to native collagen VI primarily via its A1 domain

M.F. Hoylaerts, H. Yamamoto, K. Nuyts, I. Vreys, H. Deckmyn and J. Vermynen 185–191

TFIIIF, a basal eukaryotic transcription factor, is a substrate for poly(ADP-ribosyl)ation

J.M. Rawling and R. Alvarez-Gonzalez 249–253

Mapping of contact sites in the caldesmon–calmodulin complex

M.V. Medvedeva, E.A. Kolobova, P.A.J. Huber, I.D.C. Fraser, S.B. Marston and N.B. Gusev 255–262

Identification of the cleavage sites in the α 6A integrin subunit: structural requirements for cleavage and functional analysis of the uncleaved α 6A β 1 integrin

G.O. Delwel, I. Kuikman, R.C. van der Schors, A.A. de Melker and A. Sonnenberg 263–272

Differential modulation of cell adhesion by interaction between adhesive and counter-adhesive proteins: characterization of the binding of vitronectin to osteonectin (BM40, SPARC)

S. Rosenblatt, J.A. Bassuk, C.E. Alpers, E.H. Sage, R. Timpl and K.T. Preissner 311–319

Effect of temperature on the secondary structure of β -lactoglobulin at pH 6.7, as determined by CD and IR spectroscopy: a test of the molten globule hypothesis

X.L. Qi, C. Holt, D. McNulty, D.T. Clarke, S. Brownlow and G.R. Jones 341–346

Enzymes

Cloning and characterization of two glutathione S-transferases from a DDT-resistant strain of *Anopheles gambiae*

H. Ranson, L. Prapanthadara and J. Hemingway 97–102

Protein kinase C isoenzymes in airway smooth muscle

B.L.J. Webb, M.A. Lindsay, P.J. Barnes and M.A. Giembycz 167–175

Glutathione S-transferases from the white-rot fungus, *Phanerochaete chrysosporium*

C.A. Dowd, C.M. Buckley and D. Sheehan 243–248

Recombinant human *O*⁶-alkylguanine-DNA alkyltransferase (AGT), Cys¹⁴⁵-alkylated AGT and Cys¹⁴⁵ → Met¹⁴⁵ mutant AGT: comparison by isoelectric focusing, CD and time-resolved fluorescence spectroscopy

M. Federwisch, U. Hassiepen, K. Bender, M. Dewor, M.F. Rajewsky and A. Wollmer 321–328

Gene structure and expression

Transcriptional and post-transcriptional mechanisms can regulate cell-specific expression of the human Pi-class glutathione S-transferase gene

G.J. Moffat, A.W. McLaren and C.R. Wolf 91–95

Regulatory elements in the first intron of the rat fatty acid synthase gene

B. Oskouian, V.S. Rangan and S. Smith 113–121

Transcriptional activation of human 12-lipoxygenase gene promoter is mediated through Sp1 consensus sites in A431 cells

Y.-W. Liu, T. Arakawa, S. Yamamoto and W.-C. Chang 133–140

Chromosomal organization and expression analysis of two distinct genes encoding glutamine/glutamic acid-rich proteins	K.G. Ten Hagen, T.M. Beres, J. Szpirer, C. Szpirer and L.A. Tabak	177–184
Rat hepatic glutaminase: identification of the full coding sequence and characterization of a functional promoter	M.-I. Chung-Bok, N. Vincent, U. Jhala and M. Watford	193–200
Developmental regulation of mRNA species for types II, IX and XI collagens during mouse embryogenesis	M. Perälä, M. Savontaus, M. Metsäranta and E. Vuorio	209–216
Tissue-specific regulation of medium-chain acyl-CoA dehydrogenase gene by thyroid hormones in the developing rat	F. Djouadi, B. Riveau, C. Merlet-Benichou and J. Bastin	289–294
Molecular cloning of a major human gall bladder mucin: complete C-terminal sequence and genomic organization of MUC5B	A.C. Keates, D.P. Nunes, N.H. Afdhal, R.F. Troxler and G.D. Offner	295–303
Molecular cloning and expression of the <i>Candida albicans</i> TOP2 gene allows study of fungal DNA topoisomerase II inhibitors in yeast	B.A. Keller, S. Patel and L.M. Fisher	329–339
Regulation of metabolism		
Gene expression of mitochondrial 3-hydroxy-3-methylglutaryl-CoA synthase in a poorly ketogenic mammal: effect of starvation during the neonatal period of the piglet	S.H. Adams, C.S. Alho, G. Asins, F.G. Hegardt and P.F. Marrero	65–73
Network organization of cell metabolism: monosaccharide interconversion	J.C. Nuño, I. Sánchez-Valdenebro, C. Pérez-Iratxeta, E. Meléndez-Hevia and F. Montero	103–111
Nitric oxide inhibits the synthesis of type-II collagen without altering Col2A1 mRNA abundance: prolyl hydroxylase as a possible target	M. Cao, A. Westerhausen-Larson, C. Niyibizi, K. Kavalkovich, H.I. Georgescu, C.F. Rizzo, P.A. Hebda, M. Stefanovic-Racic and C.H. Evans	305–310
Membranes and bioenergetics		
Identification of membrane dipeptidase as a major glycosyl-phosphatidylinositol-anchored protein of the pancreatic zymogen granule membrane, and evidence for its release by phospholipase A	N.M. Hooper, S. Cook, J. Lainé and D. LeBel	151–157
Two distinct uptake mechanisms for ascorbate and dehydroascorbate in human lymphoblasts and their interaction with glucose	F.C. Ngkeekwong and L.L. Ng	225–230
Receptors and signal transduction		
Differential regulation of natriuretic peptide receptors on ciliary body epithelial cells	R.B. Crook and A.T. Chang	49–55
Involvement of the N-terminal region of the human mineralocorticoid receptor hormone-binding domain in agonist and antagonist binding as revealed by a new monoclonal antibody	S. Jalaguier, B. Lupo, G. Hugon, M.-E. Rafestin-Oblin and G. Auzou	57–63
Bcl-2 does not require Raf kinase activity for its death-protective function	R. Olivier, I. Otter, L. Monney, M. Wartmann and C. Borner	75–83
Metabolic evidence for PtdIns(4,5) P_2 -directed phospholipase C in permeabilized plant protoplasts	C.A. Brearley, P.N. Parmar and D.E. Hanke	123–131
Identification of integrin-stimulated sites of serine phosphorylation in FRNK, the separately expressed C-terminal domain of focal adhesion kinase: a potential role for protein kinase A	A. Richardson, J.D. Shannon, R.B. Adams, M.D. Schaller and J.T. Parsons	141–149
Growth hormone and phorbol esters require specific protein kinase C isoforms to activate mitogen-activated protein kinases in 3T3-F442A cells	S. MacKenzie, I. Fleming, M.D. Houslay, N.G. Anderson and E. Kilgour	159–165
Functional studies in 3T3L1 cells support a role for SNARE proteins in insulin stimulation of GLUT4 translocation	S.L. Macaulay, D.R. Hewish, K.H. Gough, V. Stoichevska, S.F. Macpherson, M. Jagadish and C.W. Ward	217–224
Prolactin stimulates the JAK2 and focal adhesion kinase pathways in human breast carcinoma T47-D cells	E. Canby, M. Norman, E. Kilic, V. Goffin and I. Zachary	231–236
Biochemical characteristics of a rice (<i>Oryza sativa</i> L., IR36) G-protein α -subunit expressed in <i>Escherichia coli</i>	H.S. Seo, C.H. Choi, S.Y. Lee, M.J. Cho and J.D. Bahk	273–281

Chemoattractants induce tyrosine phosphorylation of ERK2 in <i>Dictyostelium discoideum</i> by diverse signalling pathways	C. Kosaka and C.J. Pears	347–352
Cell biology and development		
Characterization of Rab3A, Rab3B and Rab3C: different biochemical properties and intracellular localization in bovine chromaffin cells	C.-G. Lin, Y.-C. Lin, H.-W. Liu and L.-S. Kao	85–90
Expression of the calcium-independent cytokine-inducible (iNOS) isoform of nitric oxide synthase in rat placenta	M. Casado, M.J.M. Díaz-Guerra, J. Rodrigo, A.P. Fernández, L. Boscá and P. Martín-Sanz	201–207
NF- κ B-dependent expression of nitric oxide synthase is required for membrane fusion of chick embryonic myoblasts	K.H. Lee, D.G. Kim, N.Y. Shin, W.K. Song, H. Kwon, C.H. Chung and M.-S. Kang	237–242
Thrombin activation of human platelets dissociates a complex containing gelsolin and actin from phosphatidylinositide-specific phospholipase C γ_1	J.J. Baldassare, P.A. Henderson, A. Tarver and G.J. Fisher	283–287
