

Review

- Comparative anatomy of the aldo-keto reductase superfamily** **625–636**
 by J.M. Jez, M.J. Bennett, B.P. Schlegel, M. Lewis and T.M. Penning

Research Communication

- Nitrogenase of *Klebsiella pneumoniae*: kinetics of formation of the transition-state complex, evidence for an altered conformation of MoFe protein lacking a FeMoco centre **637–640**
 F.K. Yousafzai and R.R. Eady

Research Papers

Proteins

- Interaction of platelet-derived growth factor with thrombospondin 1 **709–716**
 P.J. Hogg, K.A. Hotchkiss, B.M. Jiménez, P. Stathakis and C.N. Chesterman
- Functional and biophysical characterization of recombinant human hepatocyte growth factor isoforms produced in *Escherichia coli* **763–772**
 S.J. Stahl, P.T. Wingfield, J.D. Kaufman, L.K. Pannell, V. Cioce, H. Sakata, W.G. Taylor, J.S. Rubin and D.P. Bottaro
- Reverse-phase HPLC of the hydrophobic pulmonary surfactant proteins: detection of a surfactant protein C isoform containing N⁶-palmitoyl-lysine **799–806**
 M. Gustafsson, T. Curstedt, H. Jörnvall and J. Johansson
- Binding of perlecan to transthyretin *in vitro* **829–836**
 S. Smeland, S.O. Kolset, M. Lyon, K.R. Norum and R. Blomhoff
- Biochemical characterization and pharmacological properties of a phospholipase A₂ myotoxin inhibitor from the plasma of the snake *Bothrops asper* **853–859**
 S. Lizano, B. Lomonte, J.W. Fox and J.M. Gutiérrez
- Diversity of the third form of complement, C3, in fish: functional characterization of five forms of C3 in the diploid fish *Sparus aurata* **877–881**
 J.O. Sunyer, L. Tort and J.D. Lambris

Enzymes

- Association of purified skeletal-muscle AMP deaminase with a histidine-proline-rich-glycoprotein-like molecule **641–648**
 M. Ranieri-Raggi, U. Montali, F. Ronca, A. Sabbatini, P.E. Brown, A.J.G. Moir and A. Raggi
- Re-activation of *Clostridium symbiosum* glutamate dehydrogenase from subunits denatured by urea **649–655**
 S. Aghajanian and P.C. Engel
- Purification and properties of DNase γ from apoptotic rat thymocytes **675–681**
 D. Shiokawa, H. Ohyama, T. Yamada and S.-I. Tanuma
- NAD(P)H-dependent aldose reductase from the xylose-assimilating yeast *Candida tenuis*. Isolation, characterization and biochemical properties of the enzyme **683–692**
 W. Neuhauser, D. Haltrich, K.D. Kulbe and B. Nidetzky
- Characterization and comparison of four serine- and arginine-rich (SR) protein kinases **693–700**
 O. Nayler, S. Stamm and A. Ullrich
- Biophysical and mutagenic analysis of *Thermoanaerobacter ethanolicus* secondary-alcohol dehydrogenase activity and specificity **717–724**
 D.S. Burdette, F. Secundo, R.S. Phillips, J. Dong, R.A. Scott and J.G. Zeikus
- Allosteric control of *Zymomonas mobilis* glucose-6-phosphate dehydrogenase by phosphoenolpyruvate **731–735**
 R.K. Scopes
- The integrity of the RRGDL sequence of the proprotein convertase PC1 is critical for its zymogen and C-terminal processing and for its cellular trafficking **737–744**
 J. Lusson, S. Benjannet, J. Hamelin, D. Savaria, M. Chrétien and N.G. Seidah
- α -1,4-D-Glucan phosphorylase of gram-positive *Corynebacterium callunae*: isolation, biochemical properties and molecular shape of the enzyme from solution X-ray scattering **773–783**
 A. Weinhäusel, R. Griessler, A. Krebs, P. Zipper, D. Haltrich, K.D. Kulbe and B. Nidetzky

Removal of hydrogen peroxide by the 29 kDa protein of <i>Entamoeba histolytica</i>	I. Bruchhaus, S. Richter and E. Tannich	785–789
Crystal structure of fibrinogen-A α peptide 1–23 (F8Y) bound to bovine thrombin explains why the mutation of Phe-8 to tyrosine strongly inhibits normal cleavage to Arg-16	M.G. Malkowski, P.D. Martin, S.T. Lord and B.F.P. Edwards	815–822
Evidence that human class Theta glutathione S-transferase T1-1 can catalyse the activation of dichloromethane, a liver and lung carcinogen in the mouse. Comparison of the tissue distribution of GST T1-1 with that of classes Alpha, Mu and Pi GST in human	P.J. Sherratt, D.J. Pulford, D.J. Harrison, T. Green and J.D. Hayes	837–846
A ^{13}C -NMR study of the role of Asn-155 in stabilizing the oxyanion of a subtilisin tetrahedral adduct	T.P. O'Connell, R.M. Day, E.V. Torchilin, W.W. Bachovchin and J.P.G. Malthouse	861–866
Molecular cloning of cDNA species for rat and mouse liver α -methylacyl-CoA racemases	W. Schmitz, H.M. Helander, J.K. Hiltunen and E. Conzelmann	883–889
Carbohydrates and lipids		
Mucus glycoproteins from pig gastric mucosa: identification of different mucin populations from the surface epithelium	H. Nordman, J.R. Davies, A. Herrmann, N.G. Karlsson, G.C. Hansson and I. Carlstedt	903–910
Glycosylation differences between pig gastric mucin populations: a comparative study of the neutral oligosaccharides using mass spectrometry	N.G. Karlsson, H. Nordman, H. Karlsson, I. Carlstedt and G.C. Hansson	911–917
Gene structure and expression		
Cloning and expression analysis of murine phospholipase D1	W.C. Colley, Y.M. Altshuller, C.K. Sue-Ling, N.G. Copeland, D.J. Gilbert, N.A. Jenkins, K.D. Branch, S.E. Tsirka, R.J. Bollag, W.B. Bollag and M.A. Frohman	745–753
Nuclear factor κB is required for the transcriptional control of type II NO synthase in regenerating liver	M.J.M. Díaz-Guerra, M. Velasco, P. Martín-Sanz and L. Boscá	791–797
Targeting of the HIV-1 long terminal repeat with chromomycin potentiates the inhibitory effects of a triplex-forming oligonucleotide on Sp1–DNA interactions and <i>in vitro</i> transcription	N. Bianchi, C. Rutigliano, M. Passadore, M. Tomassetti, L. Pippo, C. Mischiati, G. Ferriotto and R. Gambari	919–927
Regulation of metabolism		
Role of ATP and P_i in the mechanism of insulin secretion in the mouse insulinoma βTC3 cell line	K.K. Papas, R.C. Long, Jr., I. Constantinidis and A. Sambanis	807–814
Fructose-induced increase in intracellular free Mg^{2+} ion concentration in rat hepatocytes: relation with the enzymes of glycogen metabolism	V. Gaussin, P. Gailly, J.-M. Gillis and L. Hue	823–827
Two forms of Wilson disease protein produced by alternative splicing are localized in distinct cellular compartments	X.-L. Yang, N. Miura, Y. Kawarada, K. Terada, K. Petrukhin, T.C. Gilliam and T. Sugiyama	897–902
Membranes and bioenergetics		
Modulation of mitochondrial electrical potential: a candidate mechanism for drug resistance in African trypanosomes	J.M. Wilkes, W. Mulugeta, C. Wells and A.S. Peregrine	755–761
Receptors and signal transduction		
Heparin inhibits the binding of basic fibroblast growth factor to cultured human aortic smooth-muscle cells	F. Bono, P. Rigon, I. Lamarche, P. Savi, V. Salel and J.-M. Herbert	661–668
Synthetic peptides containing a BXBXBX(B) motif activate phospholipase C- β1	A. Piiper, D. Stryjek-Kaminska, D. Illenberger, R. Klengel, J.M. Schmidt, P. Gierschik and S. Zeuzem	669–674
G-protein $\beta\gamma$ subunits antagonize protein kinase C-dependent phosphorylation and inhibition of phospholipase C- β1	I. Litosch	701–707
Direct modulation of G-proteins by polyunsaturated fatty acids: a novel eicosanoid-independent regulatory mechanism in the developing lung	S. Mukhopadhyay, S.J. Ramminger, M. McLaughlin, L. Gambling, R.E. Olver and P.J. Kemp	725–730
Pharmacological distinction between dantrolene and ryanodine binding sites: evidence from normal and malignant hyperthermia-susceptible porcine skeletal muscle	S.S. Palnitkar, J.R. Mickelson, C.F. Louis and J. Parness	847–852

Cytosolic phospholipase A ₂ and its mode of activation in human neutrophils by opsonized zymosan. Correlation between 42/44 kDa mitogen-activated protein kinase, cytosolic phospholipase A ₂ and NADPH oxidase	I. Hazan, R. Dana, Y. Granot and R. Levy	867–876
Interaction of Ras with phosphoinositide 3-kinase γ	I. Rubio, P. Rodriguez-Viciana, J. Downward and R. Wetzker	891–895
Cell biology and development		
Absorption of kininogen from human plasma by <i>Streptococcus pyogenes</i> is followed by the release of bradykinin	A. Ben Nasr, H. Herwald, U. Sjöbring, T. Renné, W. Müller-Esterl and L. Björck	657–660
BJ Letters		
A classification of nucleotide-diphospho-sugar glycosyltransferases based on amino acid sequence similarities	J.A. Campbell, G.J. Davies, V. Bulone and B. Henrissat	929–939
The Factor I and follistatin domain families: the return of a prodigal son	C.G. Ullman and S.J. Perkins	939–941
Correction		
Interaction of polyamines with ion channels by K. Williams (volume 325, pages 289–297, 1997)		943
