

Research Communications

- Neuropathy target esterase and a homologous *Drosophila* neurodegeneration-associated mutant protein contain a novel domain conserved from bacteria to man
M.J. Lush, Y. Li, D.J. Read, A.C. Willis and P. Glynn 1–4
- Rac1, and not Rac2, is involved in the regulation of the intracellular hydrogen peroxide level in HepG2 cells
R.H. Cool, E. Merten, C. Theiss and H. Acker 5–8

Research Papers**Proteins**

- Structural and spectroscopic studies of azide complexes of horse heart myoglobin and the His-64→Thr variant
R. Maurus, R. Bogumil, N.T. Nguyen, A.G. Mauk and G. Brayer 67–74
- Spectrin self-association site: characterization and study of β -spectrin mutations associated with hereditary elliptocytosis
G. Nicolas, S. Pedroni, C. Fournier, H. Gautero, C. Craescu, D. Dhermy and M.C. Lecomte 81–89
- Polyclonal antibody catalytic variability
D.B. Stephens, R.E. Thomas, J.F. Stanton and B.L. Iverson 127–134
- Differential expression of selenoproteins by human skin cells and protection by selenium from UVB-radiation-induced cell death
T.S. Rafferty, R.C. McKenzie, J.A.A. Hunter, A.F. Howie, J.R. Arthur, F. Nicol and G.J. Beckett 231–236

Enzymes

- Molecular cloning, expression and catalytic activity of a human AKR7 member of the aldo–keto reductase superfamily: evidence that the major 2-carboxybenzaldehyde reductase from human liver is a homologue of rat aflatoxin B₁-aldehyde reductase
L.S. Ireland, D.J. Harrison, G.E. Neal and J.D. Hayes 21–34
- An esterase from *Escherichia coli* with a sequence similarity to hormone-sensitive lipase
S. Kanaya, T. Koyanagi and E. Kanaya 75–80
- Reactivation of triosephosphate isomerase from three trypanosomatids and human: effect of Suramin
X.-G. Gao, G. Garza-Ramos, E. Saavedra-Lira, N. Cabrera, M.T. de Gómez-Puyou, R. Perez-Montfort and A. Gómez-Puyou 91–96
- Phospholipid hydroperoxide glutathione peroxidase activity of human glutathione transferases
R. Hurst, Y. Bao, P. Jemth, B. Mannervik and G. Williamson 97–100
- Characterization and sequence of the *Chryseobacterium (Flavobacterium) meningosepticum* carbapenemase: a new molecular class B β -lactamase showing a broad substrate profile
G.M. Rossolini, N. Franceschini, M.L. Riccio, P.S. Mercuri, M. Perilli, M. Galleni, J.-M. Frere and G. Amicosante 145–152
- Platelet sarco/endoplasmic reticulum Ca²⁺ATPase isoform 3b and Rap 1b: interrelation and regulation in physiopathology
C. Lacabartz-Porret, E. Corvazier, T. Kovács, R. Bobe, R. Bredoux, S. Launay, B. Papp and J. Enouf 173–181
- Nitroarginine and tetrahydrobiopterin binding to the haem domain of neuronal nitric oxide synthase using a scintillation proximity assay
W.K. Alderton, A. Boyhan and P.N. Lowe 195–201
- Overexpression and properties of a new thermophilic and thermostable esterase from *Bacillus acidocaldarius* with sequence similarity to hormone-sensitive lipase subfamily
G. Manco, E. Adinolfi, F.M. Pisani, G. Ottolina, G. Carrea and M. Rossi 203–212
- Enzyme-mediated cytosine deamination by the bacterial methyltransferase *M.MspI*
J.-M. Zingg, J.-C. Shen and P.A. Jones 223–230
- The iron ligand sphere geometry of mammalian 15-lipoxygenases
R.J. Kuban, R. Wiesner, J. Rathman, G. Veldink, H. Nolting, V.A. Solé and H. Kühn 237–242
- Mutational analysis of the domain structure of mouse protein phosphatase 2C β
K. Kusuda, T. Kobayashi, S. Ikeda, M. Ohnishi, N. Chida, Y. Yanagawa, R. Shineha, T. Nishihira, S. Satomi, A. Hiraga and S. Tamura 243–250
- Biochemical characterization of selenium-containing catalytic antibody as a cytosolic glutathione peroxidase mimic
L. Ding, Z. Liu, Z. Zhu, G. Luo, D. Zhao and J. Ni 251–255

Carbohydrates and lipids

Isolation of a Chinese hamster fibroblast variant defective in dihydroxyacetonephosphate acyltransferase activity and plasmalogen biosynthesis: use of a novel two-step selection protocol

N. Nagan, A.K. Hajra, L.K. Larkins, P. Lazarow, P.E. Purdue, W.B. Rizzo and R.A. Zoeller **273–279**

Gene structure and expression

Structural/functional properties of a mammalian multi-component structure containing all major spliceosomal small nuclear ribonucleoprotein particles

M. Moraitou, M. Patrino-Georgoula and A. Guialis **135–144**

Characterization of the stress-inducing effects of homocysteine

P.A. Outinen, S.K. Sood, P.C.Y. Liaw, K.D. Sarge, N. Maeda, J. Hirsh, J. Ribau, T.J. Podor, J.I. Weitz and R.C. Austin **213–221**

Regulation of metabolism

Characterization of the UDP-glucuronosyltransferase isoenzyme expressed in rat ovary and its regulation by gonadotropins

L. Becedas, B. Lundgren and J.W. DePierre **51–55**

Enzymic, cysteine-specific ADP-ribosylation in bovine liver mitochondria

D. Jorcke, M. Ziegler, A. Herrero-Yraola and M. Schweiger **189–193**

Membranes and bioenergetics

Reactions of nitric oxide with mitochondrial cytochrome c: a novel mechanism for the formation of nitroxyl anion and peroxynitrite

M.A. Sharpe and C.E. Cooper **9–19**

Hydroxylated naphthoquinones as substrates for *Escherichia coli* anaerobic reductases

R.A. Rothery, I. Chatterjee, G. Kiema, M.T. McDermott and J.H. Weiner **35–41**

Release of the glycosylphosphatidylinositol-anchored enzyme ecto-5'-nucleotidase by phospholipase C: catalytic activation and modulation by the lipid bilayer

M.T. Lehto and F.J. Sharom **101–109**

Functional studies of the rabbit intestinal Na⁺/glucose carrier (SGLT1) expressed in COS-7 cells: evaluation of the mutant A166C indicates this region is important for Na⁺-activation of the carrier

S. Vayro, B. Lo and M. Silverman **119–125**

Saccharomyces cerevisiae *GPI10*, the functional homologue of human *PIG-B*, is required for glycosylphosphatidylinositol-anchor synthesis

C. Sütterlin, M.V. Escribano, P. Gerold, Y. Maeda, M.J. Mazon, T. Kinoshita, R.T. Schwarz and H. Riezman **153–159**

Complementation studies with co-expressed fragments of human red cell band 3 (AE1): the assembly of the anion-transport domain in *Xenopus* oocytes and a cell-free translation system

J.D. Groves, L. Wang and M.J.A. Tanner **161–171**

Molecular basis of bovine red-cell protein 4.2 polymorphism in Japanese black cattle

M. Matsumoto, M. Inaba and K.-i. Ono **183–187**

Receptors and signal transduction

Agonist-specific alterations in receptor–phospholipase coupling following inactivation of G₁₂α gene

R. Mattera, S. Hayek, B.A. Summers and D.L. Grove **263–271**

Cell biology and development

Molecular analysis of H₂O₂-induced senescent-like growth arrest in normal human fibroblasts: p53 and Rb control G₁ arrest but not cell replication

Q.M. Chen, J.C. Bartholomew, J. Campisi, M. Acosta, J.D. Reagan and B.N. Ames **43–50**

High-density lipoprotein (HDL₃)-associated α-tocopherol is taken up by HepG2 cells via the selective uptake pathway and resecreted with endogenously synthesized apo-lipoprotein B-rich lipoprotein particles

D. Goti, H. Reicher, E. Malle, G.M. Kostner, U. Panzenboeck and W. Sattler **57–65**

Proteasome and thiol involvement in quality control of glycosylphosphatidylinositol anchor addition

B. Wilbourn, D.N. Nesbeth, L.J. Wainwright and M.C. Field **111–118**

Bile salts stimulate mucin secretion by cultured dog gallbladder epithelial cells independent of their detergent effect

J.H. Klinkspoor, T. Yoshida and S.P. Lee **257–262**
