The *Biochemical Journal* is conducted by the Biochemical Society and is published by the Cambridge University Press.

This Society has been instituted solely for the advancement of the Science of Biochemistry. Persons interested in Biochemistry are eligible for election.

Meetings are held at different centres for the communication of papers to the Society.

Members are entitled to receive a copy of the Journal. Further information as to the conditions of membership may be obtained on application to the Hon. Secs., Dr F. G. Young, National Institute for Medical Research, Hampstead, N.W. 3 or Dr W. T. J. Morgan, Lister Institute, Chelsea Bridge Road, S.W. 1, or to the Hon. Treas., Mr J. Addyman Gardner, 35 Bullingham Mansions, Church Street, London, W. 8, to whom subscriptions should be sent.

Papers for publication should be sent to Prof. C. R. Harington, F.R.S., University College Hospital Medical School, University Street, London, W.C. 1. Communications respecting the printing of the articles, or respecting the purchase of offprints should be addressed to the University Press, Cambridge.

The Journal is issued in monthly numbers and the date at which each paper is received is printed at the beginning of the paper.

All communications respecting the purchase of copies of the parts or volumes, whether current or back issues, or respecting subscriptions in the case of non-members of the Biochemical Society (£3, 10s. 6d. net per volume (post free) payable in advance) should be addressed to The Cambridge University Press, Bentley House, 200 Euston Road, London, N.W.1, or to the Hon. Treas., Mr J. Addyman Gardner, 35 Bullingham Mansions, Church Street, London, W. 8. For prices of back numbers and volumes see list on p. 4 of Wrapper.

Quotations can be given for Buckram binding cases and for binding Subscribers' Sets.

The Cambridge University Press has appointed the University of Chicago Press agent for the sale of the *Biochemical Journal* in the United States of America.

**Notice to Contributors**

1. Contributors who are members of the Biochemical Society receive 25 copies (without covers) of their papers free and can purchase additional copies if notice be given when their proofs are returned. Other contributors may purchase reprints but receive no free copies.

2. Papers submitted for publication are understood not to be offered to any other Journal for prior or simultaneous publication.

3. All communications intended for publication must be type-written.

4. Contributors residing outside Europe are requested to nominate someone resident in Great Britain to be responsible for the correction of the proofs of their papers. Papers from such contributors should be accompanied by a statement of the number of reprints required.

5. **References.** References to literature should be arranged alphabetically according to authors’ names at the end of the communication, each accompanied by the date, title of Journal, volume and page, thus: Ackermann, D. (1912). *Z. Biol.* 59, 17. Titles of Journals should be abbreviated in accordance with the “World List of Scientific Periodicals”. In the text the reference should be indicated by the author’s name and the date, enclosed in brackets, thus [Ackermann, 1912]. If reference is made to several papers published by one author in a single year, these should be numbered in sequence and the number quoted along with the year both in the text and in the collected references.

6. Chemical formulae should be written, as far as possible, in a single horizontal line.

7. Illustrations and curves accompanying the papers must be carefully drawn, about twice the size of the finished block, on smooth white Bristol boards or ordinary curve paper in Indian ink. Any lettering on these drawings should be lightly inserted in pencil. Legends should be typed on slips of paper attached to the drawings.

During 1942 the Journal will be issued at as frequent intervals as possible. MSS. for the successive numbers of Vol. 36 should be received by the first of each month. Contributors are specially requested to arrange references in the manner uniformly adopted in this Journal.
CONTENTS OF VOLUME 35, No. 12, 1941

(All rights reserved)

144. Investigations into the chemistry of the flue-curing of tobacco. By E. A. H. Roberts. (With two figures) .................................................. 1289

145. The specificity of arginase: action upon argininic acid. By A. Hunter and H. E. Woodward. (With one figure) .......................... 1298

146. Derivatives of sulphanilamide and cholic acid. By G. A. D. Haslewood 1307

147. A nutritional investigation of the antibacterial action of acriflavine. By H. McIlwain .......................................................... 1311

149. The influence of halides on the oxidation of ascorbic acid. By L. W. Mapson. (With eighteen figures) ............................... 1332

150. Effects of diets rich in protein upon rats deprived of vitamin B$_1$. By G. G. Banerji. (With five figures) .................. 1354

153. Surface chemistry of carotenoids. 1. Astaene. By J. F. Danielli and D. L. Fox. (With three figures) ............................... 1388

154. The ascorbic acid content of dried vegetables. By V. A. Beckley and V. E. Notley ..................................................... 1396

INDEX ............................................. 1405

INDEX OF SUBJECTS

Acetaldehyde and higher aldehydes from hydroxyamino-acids, liberation of, by periodic acid (Martin, Synge & Bell) 294
Acetic acid oxidation, bacterial, dependence of, on vitamin B1 (Quastel & Webley) 192
Acetone-butyl alcohol fermentation (Davies & Stephenson) 1320
Acriflavine, antibacterial action of (McIlwain) 1311
Adenylic deaminase activity in B1-avitaminosis and in starvation (Lu & Needham) 392
Adrenaline, protein catabolism and protein sparing under (Reid) 534
Albino rat, relation of unsaturated acids to tumour formation in the, on normal diet (Smedley-MacLean & Nunn) 983
Aldehydes from hydroxyamino-acids, liberation of, by periodic acid (Martin, Synge & Bell) 294
Aldoses, interaction of, with α-amino-acids or peptides (Katchalsky) 1024; (Frankel & Katchalsky) 1028, 1034
Alimentary tract, influence of dietary fibre on secretory activities of (Duckworth & Godden) 16
Aliphatic bases and muscle extracts in cancer (Boyland) 1283
Alkali, use of, in degradation of antigenic material (Morgan & Partridge) 1140
Amines, production of, by bacteria (Gale) 66
Amines, rate of removal of, from the blood (Richter, Lee & Hill) 1225
Amino-acid composition of wool (Martin & Synge) 91
Amino-acids and glucose, effect of, on bacterial formation of tryptophanase (Evans, Handley & Happold) 207
Amino-acids, decarboxylation of, by organisms of the groups Clostridium and Proteus (Gale) 66
Amino-acids, higher mono-, separation of, by counter-current liquid-liquid extraction (Martin & Synge) 91
α-Amino acids, interaction of aldoses with (Katchalsky) 1024; (Frankel & Katchalsky) 1028, 1034
Amino-acids, isolation of, from rubber latex (Whitby & Greenberg) 640
Amino-acids of casein phosphopeptone (Damaran & Ramachandran) 122
Amino-acids of phosphopeptone (Rimington) 321
Amino-acids, separation of, by means of their copper salts (Town) 417
Amino-acids, use of 3,5-dinitrobenzoyl derivatives in separating the isomers of leucine and valine (Town) 578
p-Aminophenol and p-hydroxyaminobenzensulphonamides, alleged formation of, from sulphanalimide in vivo (Thorpe, Williams & Shelswell) 52
Aminophenol sulphonamides, possible formation of, from sulphanalimide in vivo (Thorpe, Williams & Shelswell) 52
Amino-sugars, enzymic decomposition of (Lutwak-Mann) 610
Ammonia split from hydroxyamino-acids by periodic acid (Martin, Synge & Bell) 294
Anaerobic glycolysis in brain slices, changes in phosphate distribution during (Macfarlane & Well-Malherbe) 1
Analysis, sugar, use of micro-organisms in (Nicholson & Archibald) 721
Animal body, elimination of 3,4-benzpyrene from (Chalmers & Crowfoot) 1270
Animal tissues, citric acid content of (Dickens) 1011
Antibacterial action of acriflavine (McIlwain) 1311
Antigenic complex of Bact. typhosum Ty 2, hydrolytic degradation of the (Freeman & Anderson) 564
Antigenic material, use of phenol and alkali in the degradation of (Morgan & Partridge) 1140
Arginase, specificity of (Hunter & Woodward) 1298
Arginic acid, action of arginase upon (Hunter & Woodward) 1298
Arthropod cuticules, proteins of (Trim) 1088
l-Ascorbic acid, action of, on the in vitro respiration of liver tissue from guinea-pigs on a restricted diet (Kellie & Zilva) 783; (Kellie & Snow) 787
Ascorbic acid and haemoglobin, coupled oxidation of (Lemberg, Legge & Lockwood) 328
Ascorbic acid and some diazo compounds, reduction of the viscosity of vitreous humour preparations by (Madinaveitia & Quibell) 453
Ascorbic acid content of dried vegetables (Beckley & Notley) 1396
Ascorbic acid, degradation of mucins and polysaccharides by (Robertson, Ropes & Bauer) 903
Ascorbic acid, influence of halides on oxidation of (Mapson) 1332
Ascorbic acid oxidase from cucumber (Meiklejohn & Stewart) 755
Ascorbic acid oxidations and estimation of haemoglobin (Lemberg, Legge & Lockwood) 339
Assays, biological, comparisons of, with the thiochrome test for estimating vitamin B1 in foodstuffs and biological materials (Harris & Wang) 1050
Astacene. Surface chemistry of carotenoids (Danielli & Fox) 1388
Azotobacter, molecular H2 and the pN2 function of (Wysa, Lind, Wilson & Wilson) 845
B1-avitaminosis and starvation, adenylic deaminase activity in (Lu & Needham) 392
INDEX OF SUBJECTS

Bacteria, nitrogen-fixing, protein production by, under conditions of continuous aeration (Allem) 801
Bacteria, production of amines by (Gale) 66
Bacteria, propionic acid, mechanism of carbon dioxide fixation in (Krebs & Eggleston) 676
Bacterial culture filtrates, hyaluronidase activity of (McClean & Hale) 159
Bacterial oxidations, toxins
Bacterium coli, glyoxalase
Bacterial oxidations, toxins

INDEX OF SUBJECTS

Blood, 'labile iron' in, and its increase in choleglobin formation (Legge & Lemberg) 353
Blood lead, plasma-cell partition of (Tompsett & Anderson) 48
Blood phospholipins, analysis of (Ramsay & Stewart) 39
Blood, rate of removal of amines from the (Richter, Lee & Hill) 1225
Blood, vitamin A in, and its relation to body reserves (Leong) 806
Blood, whole, colorimetric estimation of total cholesterol in (Ireland) 283
Body fats, sheep (Hilditch & Pedelty) 932 ; (Hilditch & Zaky) 940
Bone, citric acid content of (Dickens) 1011
Bone growth, influence of rate of, on skeletal magnesium (Duckworth & Godden) 816
Bones, rachitic, healing of, by vitamin D (Coward & Kasserer) 979
Bones, retention and elimination of fluorine in (Glock, Lowater & Murray) 1235
Boron, absorption and retention of (Malpress & Still) 884
Bovine cervical mucus during the oestrous cycle (Scott Blair, Folley, Malpress & Coppin) 1039
Brain slices, changes in phosphate distribution during anaerobic glycolysis in (Macfarlane & Weil-Malherbe) 1
Bromide in organic material, gravimetric estimation of (Bhrman, Brinton & Waller) 967
Butter yellow, metabolism of rat liver during carcinogenesis by (Orr & Stickland) 479
Calcium and nitrogen balances of rats, and faecal phosphatase excretion (Duckworth & Godden) 16
Cancer, chemotherapy of (Boyland) 1283
Carbon dioxide and pyruvic acid, biological synthesis of oxaloacetic acid from (Krebs & Eggleston) 676
Carcinogenesis by butter yellow, metabolism of rat liver during (Orr & Stickland) 479
Carotene in human blood, estimation of (Yudkin) 551
Carotenoids, palm oil (Hunter & Scott) 31 ; (Wilkinson) 824
Carotenoids, surface chemistry of (Danielli & Fox) 1388
Casein phosphopeptone, amino-acids of (Damaran & Ramachandran) 122
Caseo-phosphopeptone (Lowndes, Macara & Plimmer) 315
Catabolism, protein, and protein sparing under adrenaline (Reid) 534
Catecholsulphonamide, synthesis and derivatives of (Williams) 1169
Catechol-4-sulphonamide, identification of, as metabolite of p-hydroxybenzenesulphonamide (Williams) 1169
Catenarin (1:4:5:7-tetrahydroxy-2-methylthraquinone), synthesis of (Anslow & Raistrick) 1006
Cattle, serum phosphatase of (Allcroft & Folley) 254
Cellulose, chlorination, and hemicellulose preparation (Preece) 659
INDEX OF SUBJECTS

Cervical mucus, bovine, during the oestrous cycle (Scott Blair, Folley, Malpress & Coppen) 1059
Ceylon tea, respiration and fermentation of (Sreeanagchar) 1106
Chemistry of the flue-curing of tobacco (Roberts) 1289
Chemistry, surface, of carotenoids (Danielli & Dogiel) 1598
Chemotherapy of cancer (Boyland) 1928
Chlorination cellulose and hemicellulose preparation (Freece) 659
Chlorophyll: iron ratio in plants (Hill & Lehmann) 1190
Choleglobin formation, in Cholic acid, nutritional organisms (Cl.) 1106
Coal wechii, Cobalt, absorption and Copper, blood, Copper salts, separation by Cozymase, nicotinamide (Mann & Quastel) 502
Coprosterol formation, Cow's milk, venom and testicular extracts, concentration of the mucinase from (Madinaveitia) 447
Crushing injury, myohaemoglobin in urine of air raid casualties with (Bywaters, Delory, Rimington & Smiles) 1164
Cucumber, ascobic acid oxidase from (Meiklejohn & Stewart) 755
Cuticle, arthropod, proteins of (Trim) 1088
Cystine in certain species of grassland herbage (Smith & Wang) 404
Cystine disulphide linkages in wool, action of sulphites on (Elsworth & Phillips) 135
Cytochrome system in Bacterium coli commune (Keilin & Harpley) 688
Deaminase activity, adenylc, in B1-avitaminosis and in starvation (Lu & Needham) 392
Death-watch beetle (Xestobium rufovillosum de G.) larval stage of, nitrogen metabolism in (Campbell) 1200
Decarboxylation, enzymic, of oxaloacetate (Krampetz & Werkman) 595
Decarboxylation of amino-acids by organisms of the groups of Clostridium and Proteus (Gale) 66
Dehydroascorbic acid-glutathione system (Crook) 226
Dehydrogenase, pyruvic, of Bacterium coli (Still) 380
Dermatophilus vulpinus Fabr., sterol requirements of the larva of (Fraenkel, Reid & Blewett) 712
Desoxytocicosterone, sex hormones and thyroid hormones, correlation between, (Korenchevsky & Hall) 726
Detoxication, studies in (Thorpe, Williams & Shelswell) 61
Detoxication, studies in (Sammons, Shelswell & Williams) 557; (Williams) 1169; (Sammons & Williams) 1175
Diazoo compounds and ascorbic acid, reduction of the viscosity of vitreous humour preparations by (Madinaveitia & Quibell) 453
1:2:5:6-Dibenzanthracene, metabolic production of a dihydroxy-1:2:5:6-dibenzanthracene from (Boyland, Levi, Mawson & Roe) 184
Dicarboxylate fraction of gliadin, isolation of r-glutamic acid from (Town) 417
Diet, fat-free, epidermis of the rat on a (Williamson) 1003
Diet, normal, relation of unsaturated acids to tumour formation in the albino rat on (Smedley-MacLean & Nunn) 983
Diet, restricted, action of L-ascorbic acid on the in vitro respiration of liver tissue from guinea-pigs on a (Kellie & Zilva) 783; (Kellie & Snow) 877
Dietary factor concerned in coprosterol formation (Rosenheim & Webster) 920
Dietary fibre, influence of, on secretory activities of the alimentary tract (Duckworth & Godden) 16
Diets, protein rich, effect of, on vitamin B1 deficient rats (Banerji) 1354
Diffusing factors (Madinaveitia) 447; (Madinaveitia & Quibell) 453, 456
Diffusing factors, bearing of ß-glucosaminase activity of testicular extracts on (East, Madinaveitia & Todd) 872
INDEX OF SUBJECTS

Diffusing factors, hyaluronidase activity of agents that increase tissue permeability (McClellan & Hale) 159
Dihydroxy-1:2:5:6-dibenzanthracene, metabolic production of, from 1:2:5:6-dibenanthra
cene (Boyland, Levi, Mawson & Roe) 184
3:5-Dinitrobenzoyl derivatives of the amino-acids and their use in separating the isomers of leucine and valine (Town) 578
Diphtheria toxin, effect of, upon tissue enzymes in vitro (Peters & Cunningham) 219
Disulphide, cystine, linkages in wool, action of sulphites on (Elsworth & Phillips) 135
Dusts, air-borne, from coal mines, and minerals in lung residues, isolation and identification of (Nagelschmidt & King) 152
Enzymes, tissue, in vitro, effect of diphtheria toxin upon (Peters & Cunningham) 219
Enzymic decarboxylation of oxaloacetate (Kramptiz & Werkman) 586
Enzymic decomposition of amino-sugars (Lutwak-Mann) 610
Epidermis of the rat on a fat-free diet (Williamson) 1003
Erythrocytes, formation of bile pigments from choleglobin and verdoahemochromogen and their isolation from (Lemberg, Lockwood & Legge) 363
E. coli, production of tryptophanase by (Evans, Handle & Hapgood) 207
Ewes, blood copper of, during pregnancy (Eden) 813
Excretion, faecal phosphatase, and calcium and nitrogen balances of rats (Duckworth & Godden) 16
Extraction, counter-current liquid-liquid, separation of the higher monoamino-acids by (Martin & Syng) 91
Faecal phosphatase excretion and calcium and nitrogen balances of rats (Duckworth & Godden) 16
Fat, cow's milk, component acids of phosphatides in (Hilditch & Madison) 24
Fat-deficiency disease of rats (Smedley-MacLean & Nunn) 983; (Smedley-MacLean & Hume) 996
Fat-free diet, epidermis of rat on a (Williamson) 1003
Fats, sheep body (Hilditch & Pedelty) 932; (Hilditch & Zaky) 940
Fatty acid and laevulose, conversion of, into glucose (Stewart & Thompson) 245
Fermentation, acetone-butyl alcohol (Davies & Stephenson) 1320
Fermentation and respiration of Ceylon tea (Seerungachar) 1106
Fermentation of yeast, effect of vitamin B1 on (Laser) 488
Fermentation process in tea manufacture, 7, 8, 9 (Roberts) 909, 1209
Fibre, dietary, influence of, on secretory activities of the alimentary tract (Duckworth & Godden) 16
Flue-curing of tobacco, chemistry of (Roberts) 1289
Fluorine in bones, retention and elimination of (Glock, Lowater & Murray) 1235
Foodstuffs, estimation of vitamin B1 in, by the thiochrome test (Harris & Wang) 1050
Formaldehyde liberated by periodic acid from hydroxyamino-acids, detection and isolation of (Martin, Syng & Bell) 294
Fowl bile, hydrocarbons in (Chalmers & Peacock) 1276
Fowl's excreta, colorimetric estimation of uric acid in (Hutchinson) 81
Gas gangrene, plasma histamine in (Brown, McIntosh & White) 79
Gas gangrene toxins, biochemistry of (van Heyningen) 1246, 1257
Germination, seed, protein metabolism in (Lugg & Well) 1099
Gland, human mammary, viscosity, protein distribution and 'gold number' of the anten
tal and postnatal secretions of (Waller, Aschaffenburg & Grant) 272
Gliadin, hydrolysis of (Town) 417
Glucolysis, inhibition of, by glyceroldehyde (Stickland) 839
β-Glucosaminase activity of testicular extracts (East, Madinaveitia & Todd) 872
Glucose and amino-acids, effect of presence of, on bacterial formation of tryptophanase (Evans, Handle & Hapgood) 207
Glucose, conversion of laevulose and fatty acid into (Stewart & Thompson) 245
Glucose, effects of various salts on the activity of Proteus vulgaris in removing (Nicholson & Archibald) 721
Glucurovanillic acid, structure of (Sammons & Williams) 1175
Glucurovanillicin, identification of (Sammons & Williams) 1175
α-Glutamic acid, isolation of, as an hydrolysisis product of gliadin (Town) 417
Glutathione-dehydroascorbic acid system (Crook) 226
Glycolaldehyde, inhibition of glycolysis by (Stickland) 859
Glycerides of perinephric and external tissue fats from the same animal (Hilditch & Zaky) 940
Glycolysis, anaerobic, in brain slices, changes in phosphate distribution during (Macfarlane & Well-Malherbe) 1
Glyoxalase of Bacterium coli (Still) 390
Gold, absorption and excretion of, by man (Kent & McCance) 837
‘Gold number’ of the antenatal and postnatal secretions of the human mammary gland (Waller, Aschaffenburg & Grant) 272
Gonadectomized rats, correlation between sex hormones, thyroid hormones and desoxy
corticosterone as judged by their effects on the weights of organs of (Korenchevsky & Hall) 726
Gonadotrophin, serum. 1. Preparation of a stable concentrate from pregnant mare’s serum (Rimington & Rowlands) 736
Grassland herbage, cystine and methionine in certain species of (Smith & Wang) 404
Guinea-pigs on a restricted diet, action of L-ascorbic acid on the in vitro respiration of
INDEX OF SUBJECTS

Haemoglobin and ascorbic acid, coupled oxidation of (Lemberg, Legge & Lockwood)
328
Haemoglobin, estimation of, and ascorbic acid oxidations (Lemberg, Legge & Lockwood)
338
Haemolysin, purification and properties of (Herbert & Todd)
1124
Haemolysin, a simple colorimetric estimation for (Herbert)
1116
Halides, influence of, on oxidation of ascorbic acid (Mapson)
1332
Healing of rachitic bones by vitamin D (Coward & Kasner)
979
Helminthosporium, catenarin from (Anslow & Raiselick)
1906
Hemicellulose preparation and chlorination cellulose (Preece)
659
Heparin, colorimetric standardization of preparations of (MacIntosh)
776
Heparin, estimation of potency of preparations of (MacIntosh)
770
Herbage, grassland, cystine and methionine in certain species of (Smith & Wang)
404
Hevea brasilienesis, proteins of (Tristram)
413
Histamine, plasma, in gas gangrene (Brown, MacIntosh & White)
79
Histidine in urine (Racker)
667
Histidine metabolism in toxaemia of pregnancy (Kapeller-Adler)
213
Hormones, intercellular, proliferation-promoting (Loofbourouw, Dwyer & Cronin)
603
Hormones, sex and thyroid, and desoxy cortico-sterone, correlation between (Korenchevsky & Hall)
755
Human blood, estimation of vitamin A and carotene in (Yudkin)
551
Human mammary gland, viscosity, protein distribution and 'gold number' of the antenatal and postnatal secretions of (Waller, Aschaffenburg & Grant)
272
Human milks and the prenatal secretions, viscosity of (Scott Blair)
267
Hyaluronidase activity of agents that increase tissue permeability (McClean & Hale)
159
Hydrocarbons, excretion of, in fowl bile (Chalmers & Peacock)
1276
Hydrogen peroxide, degradation of mucins and polysaccharides by (Robertson, Ropes & Bauer)
903
Hydrolases, protein, applications of periodic acid to the study of the hydroxymino-acids of (Martin, Synge & Bell)
294
Hydrolisis, partial acid, of some proteins, with reference to mode of linkage of basic amino-acids (Gordon, Martin & Synge)
1369
Hydroxymino-acids of protein hydrolysates, applications of periodic acid to the study of (Martin, Synge & Bell)
294
Hydroxymino-acids, phosphoryl (Plimmer)
461
p-Hydroxybenzenesulphonamide, catechol-4-sulphonamide as a metabolic product of, in the rabbit (Williams)
1109
p-Hydroxybenzenesulphonamide, conjugation and oxidation of, in the rabbit (Sammons, Shelswell & Williams)
537
p-Hydroxylaminobenzensulphonamide and p-aminophenol, alleged formation of, from sulphanilamide in vivo (Thorpe, Williams & Shelswell)
52
'Hydroxylysin' (Martin, Synge & Bell)
294
Immunochemistry, studies in (Morgan & Partridge)
1140
Indicators, pH at the surface of ovalbumin molecules, and the protein error with (Danielli)
470
Indole, photoelectric estimation of (Allsopp)
965
Injury, crushing, myohaemoglobin in urine of air raid casualties with (Bywaters, Delory, Rimington & Smiles)
1164
Injury, evidence, for proliferation-promoting intercellular hormone production by living cells as a response to (Loofbourouw, Dwyer & Cronin)
603
Insect cuticle, proteins of (Trim)
1088
Intercellular hormones, proliferation-promoting (Loofbourouw, Dwyer & Cronin)
603
Intestinal mucous membrane, metabolism of (Dickens & Weil-Malherbe)
7
Iron in biological materials, micro-estimation of (Thorpe)
672
Iron in plants, chlorophyll: iron ratio (Hill & Lehmann)
1190
Isotopic constitution of potassium in rat tissues (Lasnitzki & Brewer)
144
'Labile iron' in blood and its increase in choleglobin formation (Legge & Lemberg)
353
Lactate in muscle, a simplified estimation of (Johnson & Barger)
538
Laevulose and fatty acid, conversion of, into glucose (Stewart & Thompson)
245
Larva of, Dermestes vulpinus Fabr., sterol requirements of (Fraenkel, Reid & Blewett)
712
Larval stage of the death-watch beetle (Xestobium rufivillosum De G.), nitrogen metabolism in (Campbell)
1200
Latex, rubber, isolation of amino-acids from (Whitby & Greenberg)
640
Lead, blood, plasma-cell partition of (Tompsett & Anderson)
48
Lecithinase activity of Cl. welchii toxins (Macfarlane & Knight)
884
Leucine and valine, use of 3:5-dinitrobenzoyl derivatives in separating the isomers of (Town)
578
Lipoid pigments, isolation of, from palm oil (Hunter & Scott)
31
Liquid-liquid extraction, separation of the higher monoamino-acids by counter-current (Martin & Synge)
91
Liquid phases, a new form of chromatogram employing two (Martin & Synge)
1358
Lithium, absorption and excretion of, by man (Kent & McCance)
837
Liver extracts, ox, isolation of cholestane-3:5:6-triol and other substances from (Haslemwood)
708
Liver, rat, metabolism of, during carcinogenesis by butter yellow (Orr & Stickland)
479
INDEX OF SUBJECTS

Liver tissue from guinea-pigs on a restricted diet, action of l-ascorbic acid on the in vitro respiration of (Kellie & Zliva) 783; (Kellie & Snow) 787

Magnesium, skeletal, lability of (Duckworth & Godden) 816

Mammary gland, human, viscosity, protein distribution and 'gold number' of the antenatal and postnatal secretions of (Waller, Aschaffenburg & Grant) 272

Man, absorption and excretion of 'minor' elements by (Kent & McCance) 877

Manganese, absorption and excretion of, by man (Kent & McCance) 877

Mare's serum, pregnant, preparation of a stable concentrate of gonadotrophin from (Rimington & Rowlands) 736

Metabolic product of p-hydroxybenzenesulphonamide, catechol-4-sulphonamide as a (Williams) 1169

Metabolic product of species of Helminthosporium, catenarin a (Anslow & Raistrick) 1006

Metabolism, histidine, in toxaemia of pregnancy (Kapeller-Adler) 213

Metabolism, nitrogen, in the larval stage of the death-watch beetle (Xestobium rufivillosum De G.) (Campbell) 1200

Metabolism of intestinal mucous membrane (Dickens & Well-Malherbe) 7

Metabolism of polycyclic compounds (Boyland, Levi, Mawson & Roe) 154

Metabolism of rat liver during carcinogenesis by butter yellow (Orr & Stickland) 479

Metabolism of β-sitosterol (Rosenheim & Webster) 928

Metabolism of steroids (Haslewood) 708

Metabolism of vanillin and vanillic acid in the rabbit (Sammons & Williams) 1175

Metabolism, protein, in seed germination (Lugg & Weller) 1099

Metabolism, tissue, nicotinamide and cozymase in (Mann & Quastel) 502

Methionine and cystine in certain species of grassland herbage (Smith & Wang) 404

Methylation of wool with methyl sulphate and methyl halides (Blackburn, Carter & Phillips) 627

Micro-determination of higher monoamino-acids in proteins by application of a new form of chromatogram (Martin & Synge) 1358

Micro-organisms, biochemistry of (Anslow & Raistrick) 1006

Micro-organisms in sugar analysis, use of (Nicholson & Archibald) 721

Milk, milk, cow's, component acids of phosphatides in (Hilditch & Maddison) 24

Milks, human, and the prenatal secretions, viscosity of (Scott Blair) 267

Minerals, isolation and identification of, in lung residues and air-borne dusts from coal mines (Nagelschmidt & King) 152

Mines, coal, air-borne dust from, and minerals in lung residues, isolation and identification of (Nagelschmidt & King) 152

Monoamino-acids in proteins, application of a new form of chromatography to micro-determination of (Martin & Synge) 1388

Mucinase from testicular extracts and from Croalalus atrax venom (Madinatessa) 447

Mucins, degradation of, by ascorbic acid and hydrogen peroxide (Robertson, Ropes & Bauer) 903

Mucous membrane, intestinal, metabolism of (Dickens & Well-Malherbe) 7

Mucus, bovine cervical, during the oestrous cycle (Scott Blair, Folley, Malpress & Coppen) 1039

Muscle, a simplified estimation of lactate in (Johnson & Barger) 538

Muscle extract and aliphatic bases in cancer (Boyland) 1283

Myoglobin in the urine of certain air raid casualties (Bywaters, Delory, Rimington & Smiles) 1164

Narcotics, site of action of, in respiratory processes (Michaelis & Quastel) 518

Nickel, absorption and excretion of, by man (Kent & McCance) 877

Nicotinamide, cozymase and tissue metabolism (Mann & Quastel) 502

Nitrogen and calcium balances of rats, and faecal phosphatase excretion (Duckworth & Godden) 16

Nitrogen fixation, biological, mechanism of (Wys, Lind, Wilson & Wilson) 845

Nitrogen-fixing bacteria, protein production by, under conditions of continuous aeration (Allen) 801

Nitrogen metabolism in the larval stage of the death-watch beetle (Xestobium rufivillosum De G.) (Campbell) 1200

Nutrition, component acids of fats from sheep fed on high and low planes of (Hilditch & Pedelty) 932

Nutritional and other factors in active suspensions of Cl. acetobutylicum (Weizmann) (Davies & Stephenson) 1329

Nutritional investigation of the antibacterial action of acriflavine (McIlwain) 1311

Oestrous cycle, bovine cervical mucus during the (Scott Blair, Folley, Malpress & Coppen) 1039

Oil, palm, carotenoids (Hunter & Scott) 31; (Wilkinson) 824

Organic material, gravimetric method of estimation of bromide in (Behrman, Brinton & Walker) 967

Organisms of the groups Clostridium and Proteus, decarboxylation of amino-acids by (Gale) 66

Ovalbumin molecules, pH at the surface of, and the protein error with indicators (Danielli) 470

Ox liver extracts, isolation of cholestane-3β:6-6:triol and other substances from (Haslewood) 708

Oxaloacetate, enzymic decarboxylation of (Krampitz & Werkman) 595

Oxaloacetic acid, biological synthesis of (Krebs & Eggleston) 676

Oxidase, ascorbic acid, from cucumber (Meiklejohn & Stewart) 755

Oxidase system in tea manufacture (Roberta) 1200

<td>Rabbit, catechol-4-sulphonamide as a metabolic product of p-hydroxybenzenesulphonamide in (Williams)</td>
<td>1169</td>
</tr>
</tbody>
</table>
Rabbit, conjugation and oxidation of p-hydroxybenzenesulphonamide in the (Sammons, Williams & Shelswell) 1715
Rabbit, metabolism of vanillin and vanillic acid in the (Sammons & Williams) 1175
Rachitic bones, healing of, by vitamin D (Coward & Kassner) 979
Rat, albino, on normal diet, relation of unsaturated acids to tumour formation in the (Smedley-MacLean & Nunn) 983
Rat, epidermis of, on a fat-free diet (Williamson) 1003
Rat, fat-starved, influence of tumour growth on the storage of fat and of polyunsaturated acids in the (Smedley-MacLean & Hume) 996
Rat liver, metabolism of, during carcinogenesis by butter yellow (Orr & Stickland) 479
Rat, storage of fat in the fat-starved (Smedley-MacLean & Hume) 990
Rats, tissues, isotopic constitution of potassium in (Lasnitzki & Brewer) 144
Rats, vitamin A studies with (Braude, Foot, Henry, Kon, Thompson & Mead) 693
Rats, comparison between interlitter and intra-litter variation in, with respect to the healing of rachitic bones by vitamin D (Coward & Kassner) 979
Rats, fat-deficiency disease of (Smedley-MacLean & Nunn) 983; (Smedley-MacLean & Hume) 996
Rats, faecal phosphatase excretion and calcium and nitrogen balances of (Duckworth & Godden) 16
Rats, gonadectomized, correlation between sex hormones, thyroid hormones and desoxy-corticosterone as judged by their effects on the weights of organs of (Korenchevsky & Hall) 726
Rats, vitamin B₁-deficient, effects of protein rich diets on (Banerji) 1354
Respiration and fermentation of Ceylon tea (Sreerangachar) 1106
Respiration, in vivo, of liver tissue from guinea-pigs on a restricted diet, action of L-ascorbic acid on the (Kellie & Ziva) 783; (Kellie & Snow) 787
Respiration, relation of tea-fermentation to (Roberts) 1209
Respiratory processes, site of action of narcotics (Lasnitzki & Quastel) 518
Rubber, crepe, analysis of a product isolated from (Tristram) 413
Rubber latex, isolation of amino-acids from (Whitby & Greenberg) 640
Salts, effect of, on the action of testicular extracts on the viscosity of vitreous humour preparations (Madinaveitia & Quibell) 456
Scopulariopsis brevicaulis, behaviour of, towards choline (Simons) 749
Scoury and vitamin C (Ziva) 1240
Secretory activities of the alimentary tract, influence of dietary fibre on (Duckworth & Godden) 16
Seed germination, protein metabolism in (Lugg & Weller) 1099
Serum, colorimetric estimation of total cholesterol in (Ireland) 293
Serum gonadotrophin. 1. Preparation of a stable concentrate from pregnant mare’s serum (Rimington & Rowlands) 736
Serum phosphatase of cattle and sheep (Allcroft & Folley) 254
Sex hormones, thyroid hormones and desoxy-corticosterone, correlation between (Korenchevsky & Hall) 726
Sheep, serum phosphatase of (Allcroft & Folley) 254
Sheep body fats (Hilditch & Pedelty) 932; (Hilditch & Zaky) 940
Silicic acid, biochemistry of. 9. Isolation and identification of minerals in lung residues and air-borne dusts from coal mines (Nagel-schmidt & King) 152
Silver, absorption and excretion of, by man (Kent & McCance) 837
β-Sitosterol, metabolism of (Rosenheim & Webster) 928
Skeletal magnesium reserves, lability of (Duckworth & Godden) 816
Starvation and B₁-avitaminosis, adenyl deaminase activity in (Lu & Needham) 392
Steroids, metabolism of (Haslewood) 708
Sterol requirements of the larva of Dermestes vulpinus Fabr. (Fraenkel, Reid & Blewett) 712
Storage of fat and of polyunsaturated acids, influence of tumour growth on, in the fat-starved rat (Smedley-MacLean & Hume) 996
Storage of fat in the fat-starved rat (Smedley-MacLean & Hume) 990
Streptococci, purification and properties of a haemolysin produced by (Herbert & Todd) 1124
Streptolysin, a simple colorimetric estimation of haemolysin and its application to (Herbert) 1116
Succinic acid in yeast, formation of (Kleinzeiller) 495
Sugar analysis, use of micro-organisms in (Nicholson & Archibald) 721
Sulphanilamide, alleged formation of p-hydroxylamino-benzenesulphonamide and p-aminophenol from, in vivo (Thorpe, Williams & Shelswell) 52
Sulphanilamide and cholic acid, derivatives of (Haslewood) 1307
Sulphanilamide and its derivatives, determination of (Morris) 952
Sulphanilamide, estimation of, with special reference to sulpha-thiazole (Gardner & Dunn) 1231
Sulphanilamide, synthesis of some possible biological oxidation products of (Thorpe & Williams) 61
Sulpha-thiazole, estimation of (Gardner & Dunn) 1231
Sulphites, action of, on cystine disulphide linkages in wool (Elsworth & Phillips) 135
p-Sulphonamido phenyl glucuronide, characterization of (Sammons, Shelswell & Williams) 557
Surface chemistry of carotenoids (Danielli & Fox) 1388
Tea, Ceylon, respiration and fermentation of (Sreerangachar) 1106
Tea manufacture, fermentation process in (Roberts) 1299
Testicular extracts, concentration of the mucinase from (Madinaveitia) 447
Testicular extracts, β-glucosaminase activity of (East, Madinaveitia & Todd) 872
Testicular extracts, effect of salts on the action of, on the viscosity of vitreous humour preparations (Madinaveitia & Quibell) 456
Testicular extracts, hyaluronidase activity of (McClean & Hale) 159
1:4:5:7-Tetrahydroxy-2-methylanthraquinone, synthesis of (Onslow & Raistrick) 1006
Thiochrome test, estimation of vitamin B in, on foodstuffs and biological materials by the (Harris & Wang) 1050
Thymus nucleic acid, isolation of adenine-desoxyriboside from (Brady) 855
Thyroid hormones, sex hormones and desoxy-corticosterone, correlation between (Koren-Bensker & Hall) 726
Tin, absorption and excretion of, by man (Kent & McCance) 877
Tissue enzymes in vitro, effect of diphtheria toxin upon (Peters & Cunningham) 219
Tissue fats, glycerides of perinephric and external, from the same animal (Hilditch & Zaky) 940
Tissue, liver, from guinea-pigs on a restricted diet, action of l-ascorbic acid on the in vitro respiration of (Kellie & Zilva) 783; (Kellie & Snow) 787
Tissue metabolism, nicotinamide and cozymase (Mann & Quastel) 502
Tissue permeability, hyaluronidase activity of, agents that increase (McClean & Hale) 159
Tissues, animal, citric acid content of (Dickens) 1011
Tissues, rat, isotopic constitution of potassium in (Lasnitzki & Brewer) 144
Tobacco, chemistry of flue-curing of (Roberts) 1289
Toxaemia of pregnancy, histidine metabolism in (Kapeller-Adler) 213
Toxin, diphtheria, effect of, upon tissue enzymes in vitro (Peters & Cunningham) 219
Toxins, gas gangrene, biochemical of (van Heyningen) 1246, 1257
Toxins, lecithinase activity of Cl. welchii (Macfarlane & Knight) 884
Tryptophanase, effect of presence of glucose and amino-acids on formation of, by E. coli (Evans, Handley & Happold) 207
Tryptophanase-indeole reaction (Evans, Handley & Happold) 207
Tumour, citric acid content of (Dickens) 1011
Tumour formation, relation of unsaturated acids to, in the albino rat on normal diet (Smedley-Maclean & Nunn) 983
Tumour growth, influence of, on the storage of fat and of polyunsaturated acids in the fast-starved rat (Smedley-Maclean & Hume) 996
Unsaturated acids, relation of, to tumour formation in the albino rat on normal diet (Smedley-Maclean & Nunn) 983
Uric acid, colorimetric estimation of, in fowl’s excreta (Hutchinson) 81
Urine, determination of vitamin C in (Meiklejohn & Stewart) 761
Urine, excretion of vitamin A in (Lawrie, Moore & Rajagopal) 825
Urine, histidine in (Racker) 667
Urine of air raid casualties, myohaemoglobin in (Bywaters, Delory, Rimington & Smiles) 1164
Urine of patients with toxaemia of pregnancy, isolation of histidine from (Kapeller-Adler) 213
Urine, vitamin B in (Harris & Wang) 1069
Vaginal contents of the rat, determination of vitamin B, by means of its influence on (Coward & Morgan) 974
Vanillic acid, metabolism of, in the rabbit (Sammons & Williams) 1175
Vanillin, metabolism of, in the rabbit (Sammons & Williams) 1175
Valine and leucine, use of 3,5-dinitrobenzoyl derivatives in separating the isomers of (Town) 578
Vanadium, absorption and excretion of, by man (Kent & McCance) 837
Vegetables, dried, ascorbic acid content of (Beckley & Notley) 1396
Venom, Crotalus atrox, concentrations of the mucinase from (Madinaveitia) 447
Verdoxaemochromogen and choleglobin, formation of bile pigments from, and their isolation from erythrocytes (Lemberg, Lockwood & Legge) 363
Viscosity of human milks and the prenatal secretions (Scott Blair) 267
Viscosity of the antenatal and postnatal secretions of the human mammary gland (Waller, Aschaffenburg & Grant) 272
Viscosity of vitreous humour preparations, effect of salts on the action of testicular extracts on (Madinaveitia & Quibell) 456
Viscosity of vitreous humour preparations, reduction of, by ascorbic acid and some diazo compounds (Madinaveitia & Quibell) 453
Visual purple solutions, role of phospholipin in (Broda) 960
Vitamin A, excretion of, in urine (Lawrie, Moore & Rajagopal) 825
Vitamin A in blood and its relation to body reserves (Leong) 806
Vitamin A in human blood, estimation of (Yudkin) 551
Vitamin A studies with rats and pigs (Braude, Foot, Henry, Kon, Thompson & Mead) 693
Vitamin B1 and bacterial oxidations. 1. Dependence of acetic acid oxidation on vitamin B1 (Quastel & Webley) 192
Vitamin B1, dependence of bacterial acetic acid oxidation on (Quastel & Webley) 192
Vitamin B1, determination of, by means of its influence on the vaginal contents of the rat (Coward & Morgan) 974
Vitamin B1, effects of protein rich diets on rats deprived of (Banerji) 1354
Vitamin B in foodstuffs and biological materials, estimation of, by the thiochrome test (Harris & Wang) 1050
INDEX OF SUBJECTS

Vitamin B1 (thiamine), effect of, on fermentation of yeast (Laser) 488
Vitamin B1 in urine (Harris & Wang) 1068
Vitamin C and the development of scurvy (Zilva) 1240
Vitamin C in urine, determination of (Meiklejohn & Stewart) 761
Vitamin D, healing of rachitic bones by (Coward & Kassner) 979
Vitamin methods (Harris & Wang) 1050, 1068
Vitreous humour preparations, effect of salts on the action of testicular extracts on the viscosity of (Madinaveitia & Quibell) 456
Vitreous humour preparations, reduction of the viscosity of, by ascorbic acid and some diazo compounds (Madinaveitia & Quibell) 453
Wool, action of sulphites on the cystine disulphide linkages in (Elsworth & Phillips) 135
Wool, amino-acid composition of (Martin & Synge) 91
Wool, hydroxyamino-acid fraction of (Martin, Synge & Bell) 294
Wool, methylation of, with methyl sulphate and methyl halides (Blackburn, Carter & Phillips) 627
Xestobium rufovillosum De G., larval stage of, nitrogen metabolism in (Campbell) 1200
Yeast fermentation, effect of vitamin B1 on (Laser) 488
Yeast, formation of succinic acid in (Kleinzeller) 495
