

**Review**

- Cross-talk unfolded: MARCKS proteins** 1–12  
*by A. Arbuzova, A.A.P. Schmitz and G. Vergères*

**Research Communication**

- Reciprocal regulation of capacitative and non-capacitative Ca<sup>2+</sup> entry in A7r5 vascular smooth muscle cells: only the latter operates during receptor activation Z. Moneer and C.W. Taylor 13–21

**Research Papers**

- Inhibition of mitochondrial calcium-independent phospholipase A<sub>2</sub> (iPLA<sub>2</sub>) attenuates mitochondrial phospholipid loss and is cardioprotective S.D. Williams and R.A. Gottlieb 23–32
- Role of Rac and Cdc42 in lysophosphatidic acid-mediated cyclo-oxygenase-2 gene expression A. Hahn, H. Barth, M. Kress, P.R. Mertens and M. Goppelt-Struebe 33–40
- Structural and functional characterization of the human and mouse fibulin-1 gene promoters: role of Sp1 and Sp3 M. Castoldi and M.-L. Chu 41–50
- Induction of glutathione synthesis by oxidized low-density lipoprotein and 1-palmitoyl-2-arachidonoyl phosphatidylcholine: protection against quinone-mediated oxidative stress D.R. Moellering, A.-L. Levenon, Y.-M. Go, R.P. Patel, D.A. Dickinson, H.J. Forman and V.M. Darley-Usmar 51–59
- Phytanic acid, a novel activator of uncoupling protein-1 gene transcription and brown adipocyte differentiation A. Schlüter, M.J. Barberá, R. Iglesias, M. Giralt and F. Villarroya 61–69
- A dominant-negative isoform lacking exons 11 and 12 of the human hypoxia-inducible factor-1 $\alpha$  gene Y.-S. Chun, E. Choi, T.-Y. Kim, M.-S. Kim and J.-W. Park 71–79
- Lipid deprivation increases surfactant phosphatidylcholine synthesis via a sterol-sensitive regulatory element within the CTP: phosphocholine cytidyltransferase promoter R.K. Mallampalli, A.J. Ryan, J.L. Carroll, T.F. Osborne and C.P. Thomas 81–88
- Active-site mutagenesis of a Lys<sup>49</sup>-phospholipase A<sub>2</sub>: biological and membrane-disrupting activities in the absence of catalysis R.J. Ward, L. Chioato, A.H.C. de Oliveira, R. Ruller and J.M. Sá 89–96
- Regulation of phosphatidylcholine and phosphatidylethanolamine synthesis in rat hepatocytes by 5-aminoimidazole-4-carboxamide ribonucleoside (AICAR) M. Houweling, W. Klein and M.J.H. Geelen 97–104
- Less hydrophobic phosphatidylcholine species simplify biliary vesicle morphology, but induce bile metastability with a broad spectrum of crystal forms M. Sakomoto, S. Tazuma and K. Chayama 105–112
- Specific increase in leptin production in obese (*falfo*) rat adipose cells S. Turban, I. Hainault, J. Trucculo, J. Andre, P. Ferre, A. Quignard-Boulangé and M. Guerre-Millo 113–118
- The distinct methods by which manganese and iron regulate the Nramp transporters in yeast M.E. Portnoy, L.T. Jensen and V.C. Culotta 119–124
- CD38 is the major enzyme responsible for synthesis of nicotinic acid-adenine dinucleotide phosphate in mammalian tissues E.N. Chini, C.C.S. Chini, I. Kato, S. Takasawa and H. Okamoto 125–130

Purification, characterization, gene cloning and preliminary X-ray data of the exo-inulinase from <i>Aspergillus awamori</i>	M. Arand, A.M. Golubev, J.R.B. Neto, I. Polikarpov, R. Wattiez, O.S. Korneeva, E.V. Eneyskaya, A.A. Kulminskaya, K.A. Shabalin, S.M. Shishliannikov, O.V. Chepurnaya and K.N. Neustroev	<b>131–135</b>
Selective determination of mitochondrial chelatable iron in viable cells with a new fluorescent sensor	F. Petrat, D. Weisheit, M. Lensen, H. de Groot, R. Sustmann and U. Rauen	<b>137–147</b>
Polyamines are required for the initiation of rat liver regeneration	L. Alhonen, T.-L. Räsänen, R. Sinervirta, J.J. Parkkinen, V.-P. Korhonen, M. Pietilä and J. Jänne	<b>149–153</b>
Stabilin-1 and -2 constitute a novel family of fasciclin-like hyaluronan receptor homologues	O. Politz, A. Gratchev, P.A.G. McCourt, K. Schledzewski, P. Guillot, S. Johansson, G. Svineng, P. Franke, C. Kannicht, J. Kzhyshkowska, P. Longati, F.W. Velten, S. Johansson and S. Goerd	<b>155–164</b>
Fluorescence resonance energy transfer between coumarin-derived mitochondrial F <sub>1</sub> -ATPase $\gamma$ subunit and pyrenylmaleimide-labelled fragments of IF <sub>1</sub> and c subunit	A. Baracca, S. Barogj, S. Paolini, G. Lenaz and G. Solaini	<b>165–171</b>
Mass-spectrometric analysis of agonist-induced retinoic acid receptor $\gamma$ conformational change	V.J. Peterson, E. Barofsky, M.L. Deinzer, M.I. Dawson, K.-C. Feng X.-k. Zhang, M.R. Madduru and M. Leid	<b>173–181</b>
Re-evaluation of primary structure, topology, and localization of Scamper, a putative intracellular Ca <sup>2+</sup> channel activated by sphingosylphosphocholine	R. Schnurbus, D. De Pietri Tonelli, F. Grohovaz and D. Zacchetti	<b>183–189</b>
The C-terminal domain, but not the interchain disulphide, is required for the activity and intracellular trafficking of aminopeptidase A	L.D. Ofner and N.M. Hooper	<b>191–197</b>
Differentiation-dependent mechanisms of transcriptional regulation of the catalytic subunit of phosphorylase kinase	A.M. O'Mahony and D.A. Walsh	<b>199–211</b>
Complete sequence, recombinant analysis and binding to laminins and sulphated ligands of the N-terminal domains of laminin $\alpha$ 3B and $\alpha$ 5 chains	J.H.O. Garbe, W. Göhring, K. Mann, R. Timpl and T. Sasaki	<b>213–221</b>
Expression of <i>Drosophila melanogaster</i> xanthine dehydrogenase in <i>Aspergillus nidulans</i> and some properties of the recombinant enzyme	B. Adams, D.J. Lowe, A.T. Smith, C. Scazzocchio, S. Demais and R.C. Bray	<b>223–229</b>
Allotopic antagonism of the non-peptide atrial natriuretic peptide (ANP) antagonist HS-142-1 on natriuretic peptide receptor NPR-A	H. Poirier, J. Labrecque, J. Deschênes and A. DeLéan	<b>231–237</b>
Interactions of <i>Porphyromonas gingivalis</i> with oxyhaemoglobin and deoxyhaemoglobin	J.W. Smalley, A.J. Birss, R. Withnall and J. Silver	<b>239–245</b>
Ceramide and sphingosine have an antagonistic effect on the plasma-membrane Ca <sup>2+</sup> -ATPase from human erythrocytes	C. Colina, V. Cervino and G. Benaim	<b>247–251</b>
Metal imbalance and compromised antioxidant function are early changes in prion disease	A.M. Thackray, R. Knight, S.J. Haswell, R. Bujdoso and D.R. Brown	<b>253–258</b>
Effect of C-domain N-glycosylation and deletion on rat pancreatic $\alpha$ -amylase secretion and activity	Y. Doyon, W. Home, P. Daull and D. LeBel	<b>259–264</b>
