Instructions to Authors

● General policy The Biochemical Journal publishes papers in English in all fields of biochemistry and cellular and molecular biology provided that they make a significant contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. Novel theoretical contributions will be considered equally with papers dealing with experimental work. All work presented aims to advance the development of biochemical concepts rather than the mere recording of facts. Preliminary, confirmatory or inconclusive work will not be published. The Biochemical Journal will not publish material that has been wholly or largely published elsewhere, even as a preliminary communication or in an unreferred symposium proceedings or on the World Wide Web (WWW); equally, fragmentation of research into the ‘least publishable unit’ is discouraged.

Submission of a paper implies that it has been approved by all the named authors, that all persons entitled to authorship have been so named, that it reports unpublished work that is not under consideration elsewhere, and that if the paper is accepted for publication, the authors will transfer to the Biochemical Society the copyright in the paper, which will then not be published elsewhere in the same form, in any language, without the consent of the Society. Authors will be required to sign an undertaking to these effects.

Authors may suggest potential reviewers for their paper, but the journal is under no obligation to follow such suggestions. Authors may also specify the names of those they wish to be excluded from the review process, and may also specify the names of those they wish to be included.

● Procedure for submission These instructions do not replace the official Biochemical Journal Instructions to Authors (http://www.biochemj.org). Authors are encouraged to refer to these for overall guidelines on submitting a paper. Before preparing papers for the journal, authors should consult a current issue to make themselves familiar with the general format, such as the use of cross-headings, layout of tables and figures and citation of references. A full page of text in the Biochemical Journal contains approximately 1200 words; when calculating the printed length of papers, allowance must be made for the space occupied by tables and figures, and the number of text words reduced accordingly.

The numerical system of references must be used. A reference to ‘unpublished work’ must be accompanied by the names of all persons concerned; a reference to a ‘personal communication’ must be supported by written permission for the quotation from the person or persons concerned; both of these types of citation are permitted in the text only, not in the list of references.

● Submit manuscripts online Authors should submit manuscripts electronically using the Online Submission and Review System available at http://www.BiochemJ.org/submit/.

● Immediate Publications Manuscripts are published online in PDF format as soon as they are accepted, unless on submission the author requests that this not be done. Immediate Publications are listed in and accessible through Medline, and are freely available to anyone with Internet access.

● Queries and correspondence Authors in the Americas should address all queries and correspondence about their submission to: Dr Sharon Schendel, BJA USA, The Burnham Institute, 10901 N. Torrey Pines Road, La Jolla, CA 92037, U.S.A. (telephone +1 858 713 6283; fax +1 858 713 6284; e-mail editorial@biochemjusa.org). Authors in the U.K., the rest of Europe, Japan and the rest of the world should contact: The Publisher, Biochemical Journal, 59 Portland Place, London W1B 1GW, U.K. (telephone +44 20 7673 5873; fax +44 20 7323 1136; e-mail editorial@portlandpress.com).

● Colour figures The first colour figure is published at no charge provided that one author has been a member of the Biochemical Society for at least 2 years and that the use of colour is deemed scientifically necessary by the reviewers. Subsequent colour figures in the same paper cost £300 each.

● Multimedia adjuncts The Biochemical Journal Online is now able to offer authors the opportunity to enhance their papers with multimedia adjuncts (e.g. time-lapse movies, three-dimensional structures). These will be submitted to peer review alongside the manuscript. To submit a paper with a multimedia adjunct, please attach the file when you submit your manuscript electronically. Preferred formats are QuickTime for time-lapse movies and PDB files for structures. There is no extra charge associated with the publication of a multimedia adjunct online.

The Biochemical Journal is published and distributed by Portland Press Ltd on behalf of the Biochemical Society. It is published twelve months in advance of receipt of the manuscript (i.e. November 2003 to October 2004) and is available in both print and online (http://www.BiochemJ.org). Authors in the Americas should address all queries and correspondence about their submission to: Dr Sharon Schendel, BJA USA, The Burnham Institute, 10901 N. Torrey Pines Road, La Jolla, CA 92037, U.S.A. (telephone +1 858 713 6283; fax +1 858 713 6284; e-mail editorial@biochemjusa.org). Authors in the U.K., the rest of Europe, Japan and the rest of the world should contact: The Publisher, Biochemical Journal, 59 Portland Place, London W1B 1GW, U.K. (telephone +44 20 7673 5873; fax +44 20 7323 1136; e-mail editorial@portlandpress.com).

● Subscriptions Subscription Department Portland Customer Services P.O. Box 32, Commerce Way Colchester CO2 8BJ, Essex, U.K. (telephone 01206 790001; fax 01206- 799331; e-mail sales@portland-services.com).

● Advertising Advertising Enquiries about advertising in this journal should be addressed to Mark White or Philip Northcott, PRN Media Sales Ltd., Suite 209, P.O. Box 32, Commerce Way, Colchester CO2 8BJ, Essex, U.K. (telephone 01206 765732; e-mail: sales@prnmediasales.co.uk; ISDN: 01376 562673).

Other information

The Biochemical Journal is published and distributed by Portland Press Ltd on behalf of the Biochemical Society. It is published twelve months in advance of receipt of the manuscript (i.e. November 2003 to October 2004) and is available in both print and online (http://www.BiochemJ.org). Authors in the Americas should address all queries and correspondence about their submission to: Dr Sharon Schendel, BJA USA, The Burnham Institute, 10901 N. ## Reviews

**Multifaceted roles of β-arrestins in the regulation of seven-membrane-spanning receptor trafficking and signalling**  
S.K. Shenoy and R.J. Lefkowitz  
503–515

Published as BJ Immediate Publication 8 September 2003,  
DOI 10.1042/BJ20031076

**Regulation and organization of adenylyl cyclases and cAMP**  
D.M.F. Cooper  
517–529

Published as Immediate Publication 26 August 2003,  
DOI 10.1042/BJ20031061

## Accelerated Publication

**Binding of phosphatidylinositol 3,4,5-trisphosphate to the pleckstrin homology domain of protein kinase B induces a conformational change**  
531–538

Published as BJ Immediate Publication 10 September 2003,  
DOI 10.1042/BJ20031229

## Research Papers

**Adipocyte differentiation of 3T3-L1 preadipocytes is dependent on lipoxygenase activity during the initial stages of the differentiation process**  
539–549

Published as BJ Immediate Publication 14 August 2003,  
DOI 10.1042/BJ20030503

**Characterization of Amm VIII from Androctonus mauretanicus mauretanicus: a new scorpion toxin that discriminates between neuronal and skeletal sodium channels**  
551–560

Published as BJ Immediate Publication 11 August 2003,  
DOI 10.1042/BJ20030688

**Lyso-glycosphingolipids mobilize calcium from brain microsomes via multiple mechanisms**  
E. Lloyd-Evans, D. Pellet, C. Riebeling and A.H. Futerman  
561–565

Published as BJ Immediate Publication 13 August 2003,  
DOI 10.1042/BJ20030613

**Ceramide induces a loss in cytosolic peroxide levels in mononuclear cells**  
D.C. Phillips and H.R. Griffiths  
567–579

Published as BJ Immediate Publication 23 July 2003,  
DOI 10.1042/BJ20030893

**Quantitative screening of advanced glycation endproducts in cellular and extracellular proteins by tandem mass spectrometry**  
581–592

Published as BJ Immediate Publication 29 July 2003,  
DOI 10.1042/BJ20030763

**Structure and transcriptional regulation of the Nat2 gene encoding for the drug-metabolizing enzyme arylamine N-acetyltransferase type 2 in mice**  
S. Boukouvala, N. Price, K.E. Plant and E. Sim  
593–602

Published as BJ Immediate Publication 6 August 2003,  
DOI 10.1042/BJ200303812

**Proteolysis of type I inositol 1,4,5-trisphosphate receptor in WB rat liver cells**  
M.T. Khan and S.K. Joseph  
603–611

Published as BJ Immediate Publication 20 August 2003,  
DOI 10.1042/BJ20030828
Mechanism of horseradish peroxidase inactivation by benzhydrazide: a critical evaluation of arylhydrazides as peroxidase inhibitors
Published as BJ Immediate Publication 18 July 2003, DOI 10.1042/BJ20021936
S.M. Aitken, M. Ouellet, M.D. Percival and A.M. English 613–621

Eukaryotic translation-initiation factor eIF2β binds to protein kinase CK2: effects on CK2α activity
Published as BJ Immediate Publication 5 August 2003, DOI 10.1042/BJ200303915

Stable dimeric assembly of the second membrane-spanning domain of CFTR (cystic fibrosis transmembrane conductance regulator) reconstitutes a chloride-selective pore
Published as BJ Immediate Publication 7 August 2003, DOI 10.1042/BJ200303974
M. Ramjeesingh, F. Ugwu, C. Li, S. Dhani, L.J. Huan, Y. Wang and C.E. Bear 633–641

Calpain cleavage of the B isoform of Ins(1,4,5)P₃ 3-kinase separates the catalytic domain from the membrane anchoring domain
Published as BJ Immediate Publication 7 August 2003, DOI 10.1042/BJ200303905
K. Pattini, T.H. Millard and G. Banting 643–651

Characterization of the lipid-binding domain of the Plasmodium falciparum CTP-phosphocholine cytidylyltransferase through synthetic-peptide studies
Published as BJ Immediate Publication 8 August 2003, DOI 10.1042/BJ20031011
M.-P. Larvor, R. Cerdan, C. Gumila, L. Maurin, P. Seta, C. Roustan and H. Vial 653–661

Caspase processing activates atypical protein kinase Cζ by relieving autoinhibition and destabilizes the protein
Published as BJ Immediate Publication 30 July 2003, DOI 10.1042/BJ20030502
L. Smith, Z. Wang and J.B. Smith 663–671

Site-directed mutagenesis of the active site of diacylglycerol kinase ζ: calcium and phosphatidylserine stimulate enzyme activity via distinct mechanisms
Published as BJ Immediate Publication 1 August 2003, DOI 10.1042/BJ20030765

Isolation and characterization of haemoporin, an abundant haemolymph protein from Aplysia californica
Published as BJ Immediate Publication 31 July 2003, DOI 10.1042/BJ20030726
E. Jaenicke, P.J. Walsh and H. Decker 681–688

Characterization of a new p94-like calpain form in human lymphocytes
Published as BJ Immediate Publication 25 July 2003, DOI 10.1042/BJ20030766
R. De Tuilio, R. Stifanese, F. Salamino, S. Pontremoli and E. Melloni 689–696

Rapid agonist-evoked coupling of type II Ins(1,4,5)P₃ receptor with human transient receptor potential (hTRPC1) channels in human platelets
Published as BJ Immediate Publication 11 August 2003, DOI 10.1042/BJ20030823
S.L. Brownlow and S.O. Sage 697–704

Free fatty acids induce cell differentiation to infective forms in Trypanosoma cruzi
Published as BJ Immediate Publication 30 July 2003, DOI 10.1042/BJ20030726

Co-incident signalling between μ-opioid and M₃ muscarinic receptors at the level of Ca²⁺ release from intracellular stores: lack of evidence for Ins(1,4,5)P₃ receptor sensitization
Published as BJ Immediate Publication 25 July 2003, DOI 10.1042/BJ20030608

Variation of the axial haem ligands and haem-binding motif as a probe of the Escherichia coli c-type cytochrome maturation (Ccm) system
Published as BJ Immediate Publication 6 August 2003, DOI 10.1042/BJ20030782
J.W.A. Allen and S.J. Ferguson 721–728
