Germinating olive pollen grain showing a callose plug observed by differential interferential contrast plus confocal laser scanning microscopy. For further details, see Barral et al. (2005) Biochem. J. 390, 77–84.
Instructions to Authors

• General policy The Biochemical Journal publishes papers in English in all fields of biochemistry and cellular and molecular biology, which add new information, make a new contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. Novel theoretical contributions will be considered equally with papers dealing with experimental work. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Preliminary, confirmatory or inconclusive work will not be published. The Biochemical Journal will not publish material that has been wholly or largely published elsewhere, even as a preliminary communication or in unrefereed symposium proceedings or on the World Wide Web (WWW); equally, fragmentation of research into the ‘least publishable unit’ is discouraged.

Submission of a paper implies that it has been approved by all the named authors, that all persons entitled to authorship have been so named, that it reports unpublished work that is not under consideration elsewhere, and that if the paper is accepted for publication the authors will transfer to the Biochemical Society the copyright in the paper, which will then be published elsewhere in the same form, in any language, without the consent of the Society. Authors will be required to sign an undertaking to follow such suggestions. Authors may suggest potential reviewers for their papers, but the journal is under no obligation to follow such suggestions. Authors may also specify the names of those they wish to be excluded from the review process, and such requests will usually be respected unless, in the opinion of the journal, such a request unreasonably excludes all the expertise available to it in that scientific area.

To allow the reviewers to assess possible overlap with previous work, all submitted papers must be accompanied by duplicate copies of the author’s relevant published work, including that on the WWW, and of all related papers in press or under editorial consideration in this or other journals.

The following types of paper are included in the journal.

Research Papers are the normal form of publication, and may be of any length that is justified by their content. However, because of pressure for space in the journal, no paper, whatever its scientific merits, will be accepted if it exceeds 30 printed pages (excluding references, tables and figures). The maximum length permitted for abstracts is 300 words. The first colour figure is free; each extra will cost £300. It is expected that the length of the paper will be a direct reflection of the complexity of the research. Authors should be guided by the standards of the journal. All figures and tables must be accompanied by a short summary (one typed page) of their content.

Accelerated Publications (APs) are short (normally 3–8 printed pages) papers bringing particularly novel and significant findings to the attention of the research community. It is intended that a decision on acceptance or rejection will be made within 10 working days of receipt, and publication of accepted APs in an issue will follow within 2 months. APs receive full but accelerated review. The criteria of ‘novelty and significance’ are strictly enforced, and papers may be rejected solely on the grounds of lack of novelty and significance. APs are not a path to accelerated publication of sound but non-urgent material. Authors must include in their letter of submission a brief statement of why they believe their AP merits accelerated treatment. Research papers and Posters for discussion only are not acceptable as APs. One colour figure will be published free of charge in APs; subsequent figures will cost £300 each.

Reviews will usually be solicited, although unsolicited reviews will be considered for publication. Prospective writers of reviews should first consult the Reviews Editor, via the editorial office, and should enclose a short (one typed page) summary of the area they propose to cover.

• Procedure for submission These instructions do not replace the official Biochemical Journal Instructions to Authors (http://www.BiochemJ.org). Authors are encouraged to refer to these for overall guidelines on submitting a paper. Before preparing papers for the journal, authors should consult a current issue to make themselves familiar with the general format, such as the use of cross-headings, layout of tables and figures and citation of references. A full page of text in the Biochemical Journal contains approximately 1200 words; when calculating the printed length of papers, allowance must be made for the space occupied by tables, figures and the number of text words reduced accordingly. The numerical system of references must be used. A reference to ‘unpublished work’ must be accompanied by the names of all persons concerned: a reference to a ‘personal communication’ must be supported by written permission for the quotation from the person or persons concerned; both of these types of citation are permitted in the text only, not in the list of references.

• Submit manuscripts online Authors should submit manuscripts electronically using the Online Submission and Review System available at http://www.BiochemJ.org/submit/

• Immediate Publications Manuscripts are published online in PDF format as soon as they are accepted, unless on submission the author indicates a wish to have the manuscript considered for accelerated publication. Accelerated publication consumes 2 months from acceptance. Manuscripts are accepted, unless on submission the author indicates a wish to have the manuscript considered for accelerated publication. Accelerated publication consumes 2 months from acceptance. Manuscripts are accepted, unless on submission the author indicates a wish to have the manuscript considered for accelerated publication. Accelerated publication consumes 2 months from acceptance. Manuscripts are accepted, unless on submission the author indicates a wish to have the manuscript considered for accelerated publication. Accelerated publication consumes 2 months from acceptance. Manuscripts are accepted, unless on submission the author indicates a wish to have the manuscript considered for accelerated publication. Accelerated publication consumes 2 months from acceptance. Manuscripts are accepted, unless on submission the author indicates a wish to have the manuscript considered for accelerated publication. Accelerated publication consumes 2 months from acceptance.

• Queries and correspondence Authors in the Americas should address all queries and correspondence about their submission to Dr Sharon Schendel, BJ USA, The Burnham Institute, 10901 N. Torrey Pines Road, La Jolla, CA 92037, U.S.A. (telephone +1 858 713 6283; fax +1 858 713 6284; email editorial@biochemjusa.org). Authors in the U.K., the rest of Europe, Japan and the rest of the world should contact: The Publisher, Biochemical Journal, Portland Press Ltd, Third Floor, Eagle House, 16 Procter Street, London WC1V 6NX, U.K. (telephone +44 20 7280 4110; fax +44 20 7280 4169, email editorial@portlandpress.com).

• Colour figures The first colour figure is published at no charge provided that one author has been a member of the Biochemical Society for at least 2 years and that the use of colour is deemed scientifically necessary by the reviewers. Subsequent colour figures in the same article cost £500 each.

• Multimedia adjuncts The Biochemical Journal Online offers authors the opportunity to enhance their papers with multimedia adjuncts (e.g. time-lapse movies, three-dimensional structures, animated schemes). These will be submitted to peer review alongside the manuscript. To submit a paper with a multimedia adjunct, please attach the file when you submit your manuscript electronically. Preferred formats are QuickTime for time-lapse movies and PDB for structures. There is no extra charge associated with the publication of a multimedia adjunct online.

Other information

The Biochemical Journal is published and distributed by Portland Press Ltd on behalf of the Biochemical Society. It is published twice monthly; in 2005 volumes 386–392 (three parts each) will appear. The subscription also includes an author and key-word index.

• Abstracted/b index ed in: BIOBASE, BIOSIS, CAB International, Chemical Abstracts Service, Current Contents, EMBASE, International Food Information Service, Medline/Index Medicus, Proquest Information and Learning, Science Citation Index.

• Subscription rates Institutional subscription rates for 2005 are shown below. Subscribers to The Biochemical Journal can subscribe additionally to Biochemical Society Transactions and Biotechnology and Applied Biochemistry on a joint subscription at a reduced rate. Terms are cash in advance. Overseas, excluding rest of the world, or US$ equivalent at current rate of exchange; subscribers in the EU may pay in £ sterling or Euros), or against pro forma invoice. Orders should be sent to the address shown, or through your usual agent.

Overseas rates include airfreight delivery. Prior delivery is available at an additional cost of £150.

VAT is due on some supplies to subscribers within the UK, and to non-registered subscribers elsewhere in the EU. In the EU if the postal service is not available, the author may be charged at the appropriate national rate.

• Electronic back archive This is freely available to all users with Internet access.

• Microfiche and back issues Volumes 102–336 of the Biochemical Journal are available on microfiche. Back issues are also available electronically. Further details may be obtained from the address below.

• Subscription Department Portland Customer Services P.O. Box 32, Commerce Way Colchester CO2 8HP, Essex, U.K. (telephone 01206 796351; fax 01206 799331; email sales@portland-services.com).

• Advertising Enquiries about advertising should be addressed to Nicky Peacock, Mainline Media Ltd, The Barn, Oakley Hay Lodge Business Park, Great Folds Road, Great Oakley, Corby, Northamptonshire requests that this not be done. Immediate Publications are listed in and accessible through Medline, and are freely available to anyone with Internet access.

• Queries and correspondence Authors in the Americas should address all queries and correspondence about their submission to Dr Sharon Schendel, BJ USA, The Burnham Institute, 10901 N. Torrey Pines Road, La Jolla, CA 92037, U.S.A. (telephone +1 858 713 6283; fax +1 858 713 6284; email editorial@biochemjusa.org).
