Instructions to Authors

General policy
The Biochemical Journal publishes papers in English in all fields of biochemistry and cellular and molecular biology, and they make a significant contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. Novel theoretical contributions will be considered equally with papers dealing with experimental work. All work presented aims at the development of biochemical concepts rather than the mere recording of facts. Preliminary, confirmatory or inconclusive work will not be published. The Biochemical Journal will not publish material that has been wholly or largely published elsewhere, even as a preliminary communication or in an unreferred symposium proceedings or on the World Wide Web (WWW), equally, fragmentation of research into the 'least publishable unit' is discouraged.

Submission of paper
It implies that it has been approved by all the named authors, that all persons entitled to authorship have been so named, that it reports unpublished work that is not under consideration elsewhere, and that if the paper is accepted for publication the authors will transfer to the Biochemical Society the copyright in the paper, which will then not be published elsewhere in the same form, in any language, without the consent of the Society. Authors will be required to sign an undertaking to these effects.

Authors may suggest potential reviewers for their paper and that the journal is under no obligation to follow such suggestions. Authors may also specify the names of those they wish to be excluded from the review process, and such wishes are usually respected unless, in the opinion of the journal, such a request unreasonably excludes all the expertise available to it in that scientific area.

To allow the reviewers to assess possible overlap with previous work, all submitted papers must be accompanied by duplicate copies of the author's relevant published work, including that on the WWW, and all related papers in press or under editorial consideration in this or other journals.

The following types of paper are included in the journal.

Research Papers are the normal form of publication, and may be of any length that is justified by their content. However, because of pressure for space in the journal, no paper, whatever its scientific merits, will be accepted if it exceeds the mid point length required for, and if it is not shown to be clearly significant. A concise well-written paper tends to be published more rapidly.

Accelerated Publications (APs)
Accelerated Publications (APs) are short (normally four printed pages) papers bringing particularly novel and significant findings to the attention of the research community. It is intended that a decision on acceptance or rejection will be made within 10 working days of receipt, and publication of accepted APs in an issue will follow within 2 months. APs receive full but accelerated reviewing. The criteria of 'novelty and significance' are strictly enforced, and papers may be rejected solely on the grounds of lack of novelty and significance. APs are not a path to accelerated publication of sound but non-urgent material. Authors must include in their letter of submission a brief statement of why they believe their AP merits accelerated treatment.

Papers reporting nucleotide sequences only are not accepted. APs are not accompanied by duplicate copies of the paper. Before preparing papers for the journal, authors should consult a current issue to make themselves familiar with the general format, such as the use of cross-headings, layout of tables and figures and citation of references. A full page of text in the Biochemical Journal contains approximately 1200 words; when calculating the printed length of papers, allowance must be made for the space occupied by tables and figures and the number of text words reduced accordingly.

The numerical system of references must be used. A reference to 'unpublished work' must be accompanied by the names of all persons concerned; a reference to a 'personal communication' must be supported by written permission for the quotation from the person or persons concerned; both of these types of citation are permitted in the text only, not in the list of references.

Submit manuscripts online
Authors should submit manuscripts electronically using the online Submission and Review System available at http://www.BiochemJ.org/submit/

Immediate Publications
Manuscripts are published online in PDF format as soon as they are accepted, unless on submission the author requests that this not be done. Immediate Publications are listed in and accessible through Medline, and are freely available to anyone with Internet access.

Queries and correspondence
Authors in the Americas should address all queries and correspondence about their submission to: Dr Sharon Schendel, BJ USA, The Burnham Institute, 10901 N. Torrey Pines Road, La Jolla, CA 92037, U.S.A. (telephone +1 858 713 6283; fax +1 858 713 6284; editorial@biochemjusa.org). Authors in the U.K., the rest of Europe, Japan and the rest of the world should contact: The Publisher, Biochemical Journal, Portland Press Ltd, Third Floor, Eagle House, 16 Procter Street, London WC1V 6NX, U.K. (telephone +44 20 7280 4110; fax +44 20 7280 4169; email editorial@portlandpress.com).

Colour figures
The first colour figure is published at no charge provided that one author has been a member of the Biochemical Society for at least 2 years and that the use of colour is deemed scientifically necessary by the reviewers (a saving of £550). Subsequent colour figures in the same paper cost £300 each.

Multimedia adjuncts
The Biochemical Journal Online offers authors the opportunity to enhance their papers with multimedia adjuncts (e.g. time-lapse movies, three-dimensional structures, animated schemes). These will be submitted to peer review alongside the manuscript. To submit a paper with a multimedia adjunct, please attach the file when you submit your manuscript electronically. Preferred formats are QuickTime for time-lapse movies and PDB for structures. There is no extra charge associated with the publication of a multimedia adjunct online.

Other information

The Biochemical Journal is published and distributed by Portland Press Ltd on behalf of the Biochemical Society. It is published twice monthly from 393–400 (three parts each) will appear. The subscription also includes an author and key-word index.

Abstracted by:
BIOBASE, BIOSIS, CAB International, Chemical Abstracts Service, Current Contents, EMBASE, International Food Information Service, Medline/Index Medicus, ProQuest Information & Learning, Science Citation Index

Subscription rates
Institutional subscription rates for 2006 are shown below. Subscribers to the journal can subscribe additionally to Biochemical Society Transactions and Biotechnology and Applied Biochemistry on a joint subscription at a reduced rate. Terms are cash with order (US$ in N. America, £ sterling for rest of the world, or US$ equivalent at current rate of exchange; subscribers in the EU may pay in £ sterling or Euros), or against pro forma invoice. Orders should be sent to the address shown, or through your usual agent.

Single issues (print only)

VAT is charged on some supplies to subscribers within the UK, and to non-registered subscribers elsewhere in the EU. If in the EU please state your VAT number otherwise VAT may be charged at the appropriate national rate.

Electronic back archive
This is freely available to all users with Internet access.

Microfiche and back issues
Volumes 102–336 of the Biochemical Journal are available on microfiche. Back issues are also available. Further details may be obtained from the address below.

Subscription Department
Portland Customer Services
P.O. Box 32, Commerce Way
Colchester CO2 8HP, Essex, U.K.
(tel: 01206 796351; fax 01206 799331; email sales@portland-services.com)

Advertising
Enquiries about advertising should be addressed to: Mark Burgess, Editorial Department, Portland Press, Third Floor, Eagle House, 16 Procter Street, London WC1V 6NX, U.K. (telephone +44 20 7280 4110; fax +44 20 7280 4169; email editorial@portlandpress.com).

The paper and cover-boards used in this journal are sourced from sustainable, managed and renewed commercial forests, and are fully recyclable. The bleaching process used for the pulp is 100% ECF (elemental chlorine free).
Online Commentary

Unexpected similarity between the cytosolic West Nile virus NS3 and the secretory furin-like serine proteinases
Published on the Internet 23 December 2005, doi:10.1042/BJ20051787
(see accompanying paper pp. 503–511)

N.G. Seidah e1–e3

Research Papers

Identification of a mitochondrial transporter for pyrimidine nucleotides in Saccharomyces cerevisiae: bacterial expression, reconstitution and functional characterization
Published as BJ Immediate Publication 29 September 2005, doi:10.1042/BJ20051284

C.M.T. Marobbio, M.A. Di Noia and F. Palmieri 441–446

Kinetic, inhibition and structural studies on 3-oxoacyl-ACP reductase from Plasmodium falciparum, a key enzyme in fatty acid biosynthesis
Published as BJ Immediate Publication 14 October 2005, doi:10.1042/BJ20050932

Effects of N-linked glycosylation on the creatine transporter
Published as BJ Immediate Publication 19 September 2005, doi:10.1042/BJ20050957

N. Straumann, A. Wind, T. Leuenberger and T. Wallimann 459–469

Analysis of the hypoxia-sensing pathway in Drosophila melanogaster
Published as BJ Immediate Publication 21 September 2005, doi:10.1042/BJ20051064

N. Arquier, P. Vigne, E. Duplan, T. Hsu, P.P. Therond, C. Frelin and G. D’Angelo 471–480

A novel role for a Drosophila homologue of cGMP-specific phosphodiesterase in the active transport of cGMP
Published as BJ Immediate Publication 19 October 2005, doi:10.1042/BJ20051505

A novel ARF-binding protein (LZAP) alters ARF regulation of HDM2
Published as BJ Immediate Publication 21 September 2005, doi:10.1042/BJ20050980

J. Wang, X. He, Y. Luo and W.G. Yarbrough 489–501

Cleavage targets and the d-arginine-based inhibitors of the West Nile virus NS3 processing protease
Published as BJ Immediate Publication 17 October 2005, doi:10.1042/BJ20051374

Regulation of the sphingosine-recycling pathway for ceramide generation by oxidative stress, and its role in controlling c-Myc/Max function
Published as BJ Immediate Publication 4 October 2005, doi:10.1042/BJ20051083

The intersubunit lock-and-key motif in human glutathione transferase A1-1: role of the key residues Met1 and Phe92 in function and dimer stability
Published as BJ Immediate Publication 29 September 2005, doi:10.1042/BJ20051066

Herpes simplex virus type 1-encoded glycoprotein C contributes to direct coagulation Factor X–virus binding
Published as BJ Immediate Publication 7 October 2005, doi:10.1042/BJ20051313
J.R. Livingston, M.R. Sutherland, H.M. Friedman and E.L.G. Pryzdial
529–535

Proteomic analysis of mouse kidney peroxisomes: identification of RP2p as a peroxisomal nudix hydrolase with acyl-CoA diphosphatase activity
Published as BJ Immediate Publication 27 September 2005, doi:10.1042/BJ20050893
R. Ofman, D. Speijer, R. Leen and R.J.A. Wanders
537–543

Salivary agglutinin and lung scavenger receptor cysteine-rich glycoprotein 340 have broad anti-influenza activities and interactions with surfactant protein D that vary according to donor source and sialylation
Published as BJ Immediate Publication 28 September 2005, doi:10.1042/BJ20050695
545–553

Vasodilator-stimulated phosphoprotein (VASP) is phosphorylated on Ser157 by protein kinase C-dependent and -independent mechanisms in thrombin-stimulated human platelets
Published as BJ Immediate Publication 3 October 2005, doi:10.1042/BJ20050796
J.K.T. Wentworth, G. Pula and A.W. Poole
555–564

Minimal features of paxillin that are required for the tyrosine phosphorylation of focal adhesion kinase
Published as BJ Immediate Publication 27 October 2005, doi:10.1042/BJ20051241
R. Wade and S. Vande Pol
565–573

Reactivity of free thiol groups in type-I inositol trisphosphate receptors
Published as BJ Immediate Publication 21 September 2005, doi:10.1042/BJ20050889
S.K. Joseph, S.K. Nakao and S. Sukumvanich
575–582

Transport of polyamines in Drosophila S2 cells: kinetics, pharmacology and dependence on the plasma membrane proton gradient
Published as BJ Immediate Publication 26 October 2005, doi:10.1042/BJ20050981
R. Romero-Calderón and D.E. Krantz
583–589

Multiple functions of l0036 in the regulation of the pathogenicity island of enterohaemorrhagic Escherichia coli O157:H7
Published as BJ Immediate Publication 26 October 2005, doi:10.1042/BJ20051201
591–599

The differential role of Smad2 and Smad3 in the regulation of pro-fibrotic TGFβ1 responses in human proximal-tubule epithelial cells
Published as BJ Immediate Publication 27 October 2005, doi:10.1042/BJ20051196
