Instructions to Authors

General policy  The Biochemical Journal publishes papers in English in all fields of biochemistry and cellular and molecular biology, and encourages the development of biochemical concepts rather than the mere recording of facts. Preliminary, confirmatory or inconclusive work will not be published. The Biochemical Journal will not publish material that has been wholly or largely published elsewhere, even as a preliminary communication or in unrefereed symposium proceedings or on the World Wide Web (WWW); equally, fragmentation of research into the ‘least publishable unit’ is discouraged.

Submission of a paper implies that it has been approved by all the named authors, that all persons entitled to authorship have been so named, that it reports unpublished work that is not under consideration elsewhere, and that if the paper is accepted for publication the authors will transfer to the Biochemical Society the copyright in the paper, which will then not be published elsewhere in the same form, in any language, without the consent of the Society. Authors will be required to sign an undertaking to these effects.

Authors may suggest potential reviewers for their papers, but the journal is under no obligation to follow such suggestions. Authors may also specify the names of those they wish to be excluded from the review process, and such wishes are usually respected unless, in the opinion of the journal, such a request unreasonably excludes all the expertise available to it in that scientific area.

To allow the reviewers to assess possible overlap with previous work, all submitted papers must be accompanied by duplicate copies of the author's relevant published work, including that on the WWW, and of all related papers in press or under editorial consideration in this or other journals.

The following types of paper are included in the journal.

Research Papers are the normal form of publication, and may be of any length that is justified by their content. However, because of pressure for space in the journal, no paper, whatever its scientific merits, will be accepted if it exceeds the mid-summer required for precision in describing the experiments and clarity in interpreting them. As a guide, most Research Papers published in the Biochemical Journal are of between six and eight printed pages. A concise well-written paper tends to be published more rapidly.

Accelerated Publications (APs) are short (normally four to six printed pages) papers bringing particularly novel and significant findings to the attention of the research community. It is intended that a decision on acceptance or rejection will be made within 10 working days of receipt, and publication of accepted APs in an issue will follow within 2 months. APs receive full but accelerated reviewing. The criteria of 'novelty and significance' are strictly enforced, and papers may be rejected solely on the grounds of lack of novelty and significance. APs are not a path to accelerated publication of sound but non-urgent material. Authors must include in their letter of submission a brief statement of why they believe their AP merits accelerated treatment. Papers reporting nucleotide sequences only are not acceptable as APs. One colour figure will usually be published free of charge in APs; subsequent figures will cost £300 each.

Reviews will usually be solicited, although unsolicited reviews may be considered for publication. Prospective writers of reviews should first consult the Reviews Editor, via the editorial office, and should enclose a short (one page) summary of the area they propose to cover.

Procedure for submission These instructions do not replace the official Biochemical Journal Instructions to Authors (http://www.biochemj.org). Authors are encouraged to refer to these for overall guidelines on submitting a paper. Before preparing papers for the journal, authors should consult a current issue to make themselves familiar with the general format, such as the use of cross-headings, layout of tables and figures and citation of references. A full page of text in the Biochemical Journal contains approximately 1200 words; when calculating the printed length of papers, allowance must be made for the space occupied electronically tables and figures, and the number of text words reduced accordingly. The numerical system of references must be used. A reference to 'unpublished work' must be accompanied by the names of all persons concerned: a reference to a ‘personal communication’ must be supported by written permission for the quotation from the person or persons concerned; both of these types of citation are permitted in the text only, not in the list of references.

Submit manuscripts online Authors should submit manuscripts electronically using the Online Submission and Review System at http://www.BiochemJ.org/submit/

Immediate Publications Manuscripts are published online in PDF format as soon as they are accepted, unless on submission the author requests that this be not done. Immediate Publications are listed in and accessible through Medline, and are freely available to anyone with Internet access.

Queries and correspondence Authors in the Americas should address all queries and correspondence about their submission to: Dr Sharon Schendel, BJ USA, The Burnham Institute, 10901 N. Torrey Pines Road, La Jolla, CA 92037, U.S.A. (telephone +1 858 713 6283; fax +1 858 713 6563; editorial@biochemjusa.org). Authors in the U.K., the rest of Europe, Japan and the rest of the world should contact: The Publisher, Biochemical Journal, Portland Press Ltd, Third Floor, Eagle House, 16 Procter Street, London WC1V 6NX, U.K. (telephone +44 20 7280 4110; fax +44 20 7280 4169, email editorial@portlandpress.com).

Colour figures The first colour figure is published at no charge provided that one author has been a member of the Biochemical Society for at least 2 years and that the use of colour is deemed scientifically necessary by the reviewers (a saving of £550). Subsequent colour figures in the same paper cost £300 each.

Multimedia adjuncts The Biochemical Journal Online offers authors the opportunity to enhance their paper with multimedia adjuncts (e.g. time-lapse movies, three-dimensional structures, animated schemes). These will be submitted to peer review alongside the manuscript. To submit a paper with a multimedia adjunct, please attach the file when you submit your manuscript electronically. Preferred formats are QuickTime files for time-lapse movies and PDB for structures. There is no extra charge associated with the publication of a multimedia adjunct online.

Other information

The Biochemical Journal is published and distributed by Portland Press Ltd on behalf of the Biochemical Society. It is published twice monthly in 10 issues. One volume consists of 333–400 (three parts each) pages. The subscription also includes an author and key-word index.

Subscription rates Institutional subscription rates for 2006 are shown below. Subscribers to the electronic version can subscribe additionally to Biochemical Society Transactions and Biotechnology and Applied Biochemistry on a joint subscription at a reduced rate. Terms are cash with order (US$ in N. America, £ sterling for rest of the world, or US$ equivalent at current rate of exchange; subscribers in the EU may pay in £ sterling or Euros), or against pro forma invoice. Orders should be sent to the address shown, or through your usual agent.

Overseas rates include airfreight delivery. Priority delivery is available at an additional cost of £64.90/€80.

VAT is due on some supplies to subscribers within the UK, and to non-registered subscribers elsewhere in the EU. If in the EU please state your VAT number otherwise VAT may be charged at the appropriate national rate.

Electronic back archive This is freely available to all users with Internet access.

Microfiche and back issues Volumes 102–336 of the Biochemical Journal are available on microfiche. Back issues are also available. Further details may be obtained from the address below.

Advertising Enquiries about advertising should be addressed to: Nicky Peacock, Mainline Media Ltd, The Barn, Oakley Hay Lodge Business Park, Great Folds Road, Great Oakley, Corby, Northamptonshire NN18 9AS, U.K. (telephone 01536 747533; email Nickyppmm@aol.com).

The paper and cover-boards used in this journal are sourced from sustainable, managed and renewed commercial forests, and are fully recyclable. The breeding process used for the pulp is 100% ECF (elemental chlorine free).
Research Papers

A role for exosomes in the constitutive and stimulus-induced ectodomain cleavage of L1 and CD44
Published as BJ Immediate Publication 18 October 2005, doi:10.1042/BJ20051013

Kalata B8, a novel antiviral circular protein, exhibits conformational flexibility in the cystine knot motif
Published as BJ Immediate Publication 6 October 2005, doi:10.1042/BJ20051371
N.L. Daly, R.J. Clark, M.R. Plan and D.J. Craik 619–626

Bile-salt-stimulated lipase and mucins from milk of ‘secretor’ mothers inhibit the binding of Norwalk virus capsids to their carbohydrate ligands
Published as BJ Immediate Publication 2 November 2005, doi:10.1042/BJ20050898
N. Ruvöen-Clouet, E. Mas, S. Marionneau, P. Guillon, D. Lombardo and J. Le Pendu 627–634

Binding of 7-methoxy-4-(aminomethyl)-coumarin to wild-type and W128F mutant cytochrome P450 2D6 studied by time-resolved fluorescence spectroscopy
Published as BJ Immediate Publication 2 September 2005, doi:10.1042/BJ20051169

Interactive domains between pore loops of the yeast K+ channel TOK1 associate with extracellular K+ sensitivity
Published as BJ Immediate Publication 16 November 2005, doi:10.1042/BJ20051380
I. Johansson and M.R. Blatt 645–655

Transcriptional regulation of lysophosphatidic acid-induced interleukin-8 expression and secretion by p38 MAPK and JNK in human bronchial epithelial cells
Published as BJ Immediate Publication 3 October 2005, doi:10.1042/BJ20050791
B. Saatian, Y. Zhao, D. He, S.N. Georas, T. Watkins, E.Wm Spannhake and V. Natarajan 657–668

Computational evidence for protein-mediated fatty acid transport across the sarcolemma
Published as BJ Immediate Publication 6 October 2005, doi:10.1042/BJ20050899
M.W.J.M. Musters, J.B. Bassingthwaighte, N.A.W. van Riel and G.J. van der Vusse 669–678

Interactions between Hairy/Enhancer of Split-related proteins and the pancreatic transcription factor Ptf1-p48 modulate function of the PTF1 transcriptional complex
Published as BJ Immediate Publication 4 October 2005, doi:10.1042/BJ20051083
B. Ghosh and S.D. Leach 679–685

Identification of a novel amidase motif in neutral ceramidase
Published as BJ Immediate Publication 18 October 2005, doi:10.1042/BJ20050882
S. Galadari, B.X. Wu, C. Mao, P. Roddy, S. El Bawab and Y.A. Hannun 687–695

Extracellular NAD+ regulates intracellular calcium levels and induces activation of human granulocytes
Published as BJ Immediate Publication 14 October 2005, doi:10.1042/BJ20051302
S. Bruzzone, I. Moreschi, L. Guida, C. Usai, E. Zocchi and A. De Fiore 697–704

Unique translational modification of an invertebrate neuropeptide: a phosphorylated member of the adipokinetic hormone peptide family
Published as BJ Immediate Publication 7 November 2005, doi:10.1042/BJ20050735
G. Gäde, P. Šimek, K.D. Clark and L. Auerswald 705–713
Nur77 is phosphorylated in cells by RSK in response to mitogenic stimulation
Published as BJ Immediate Publication 13 October 2005, doi:10.1042/BJ20050967
A.D. Wingate, D.G. Campbell, M. Peggie and J.S.C. Arthur 715–724

Structure of the zinc finger domain encompassing residues 13–51 of the nucleocapsid protein from simian immunodeficiency virus
Published as BJ Immediate Publication 17 October 2005, doi:10.1042/BJ20051203
N. Morellet, H. Meudal, S. Bouaziz and B.P. Roques 725–732

Distinct roles for de novo versus hydrolytic pathways of sphingolipid biosynthesis in Saccharomyces cerevisiae
Published as BJ Immediate Publication 3 October 2005, doi:10.1042/BJ20050643
L.A. Cowart, Y. Okamoto, X. Lu and Y.A. Hannun 733–740

Multimers of the fibroblast growth factor (FGF)–FGF receptor–saccharide complex are formed on long oligomers of heparin
Published as BJ Immediate Publication 13 October 2005, doi:10.1042/BJ20050985

Spectroscopic analyses of the binding kinetics of 15d-PGJ2 to the PPARγ ligand-binding domain by multi-wavelength global fitting
Published as BJ Immediate Publication 19 October 2005, doi:10.1042/BJ20050930

Ligand specificities and structural requirements of two Tachypleus plasma lectins for bacterial trapping
Published as BJ Immediate Publication 17 October 2005, doi:10.1042/BJ20051108

Domain II plays a crucial role in the function of ribosome recycling factor
Published as BJ Immediate Publication 21 October 2005, doi:10.1042/BJ20050700
P. Guo, L. Zhang, H. Zhang, Y. Feng and G. Jing 767–777

Dual promoters control the cell-specific expression of the human cell death-inducing DFF45-like effector B gene
Published as BJ Immediate Publication 26 October 2005, doi:10.1042/BJ20051027
L. Da, D. Li, K.K. Yokoyama, T. Li and M. Zhao 779–788

Biochemical characterization of androgen receptor-interacting protein 4
Published as BJ Immediate Publication 10 October 2005, doi:10.1042/BJ20050823

Purification and characterization of the three Snf1-activating kinases of Saccharomyces cerevisiae
Published as BJ Immediate Publication 5 October 2005, doi:10.1042/BJ20051213
K. Elbing, R.R. McCartney and M.C. Schmidt 797–805

Correction
Distinct structure and activity recoveries reveal differences in metal binding between mammalian and Escherichia coli alkaline phosphatases (Volume 392, 2005, pp. 407–415)
L. Zhang, R. Buchet and G. Azzar 807
