Postmaster: Send address corrections to Biochemical Journal, c/o Mercury Airfreight International Ltd, 365 Blair Road, Avenel, NJ 07001, U.S.A.

Cover Illustration: Model of activated-state of the housefly voltage-gated sodium channel. Image kindly provided by Andrias O’Reilly and B. A. Wallace (Birkbeck College, University of London, U.K.).
Instructions to Authors

• General policy The Biochemical Journal publishes papers in English in all fields of biochemical and cellular and molecular biology, provided they make an important contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. Novel theoretical contributions will be considered equally with papers dealing with experimental work. All work presented is the responsibility of the author. The Biochemical Journal will not publish material that has been wholly or largely published elsewhere, even as a preliminary communication or in an refereed symposium proceedings or on the World Wide Web (WWW), equally, fragmentation of research into the ‘least publishable unit’ is discouraged.

Submission of paper implies that it has been approved by all the named authors, that all persons entitled to authorship have been so named, that it reports unpublished work that is not under consideration elsewhere, and that if the paper is accepted for publication the authors will transfer to the Biochemical Society the copyright in the paper, which will then be published elsewhere in the same form, in any language, without the consent of the Society. Authors will be required to sign an undertaking to these effects.

Authors may suggest potential reviewers for their papers and the journal will contact the named reviewers. Authors may also specify the names of those they wish to be excluded from the review process, and may also specify the names of those they wish to be included. Authors will be required to sign an undertaking to these effects.

Accelerated Publications (APs) are short (normally printed pages) papers bringing particularly novel and significant findings to the attention of the research community. It is intended that a decision on acceptance or rejection will be made within 10 working days of receipt, and publication of accepted APs in an issue will follow within 2 months. APs receive full but accelerated reviewing. The criteria of ‘novelty and significance’ are strictly enforced, and papers may be rejected solely on the grounds of lack of novelty and significance. APs are not a path to accelerated publication of sound but non-urgent material. Authors must include in their letter of submission a brief statement of why they believe their AP merits accelerated treatment. Papers reporting nucleotide sequences only are not accepted as APs. One colour figure will be published free of charge in APs; subsequent colour figures will cost £300 each.

Reviewers are usually solicited, although unsolicited reviews will be considered for publication. Prospective writers of reviews should first consult the Reviews Editor, via the editorial office, and should enclose a short (one page) summary of the area they propose to cover.

• Procedure for submission These instructions do not replace the official Biochemical Journal Instructions to Authors (http://www.biochemj.org). Authors are encouraged to refer to these for overall guidelines on submitting a paper. Before preparing papers for the journal, authors should consult a current issue to make themselves familiar with the general format, such as the use of cross-headings, layout of tables and figures and citation of references. A full page of text in the Biochemical Journal contains approximately 1200 words; when calculating the printed length of papers, allowance must be made for the space occupied by tables, text figures and the number of text words reduced accordingly.

The numerical system of references must be used. A reference to ‘unpublished work’ must be accompanied by the names of all persons concerned: a reference to a ‘personal communication’ must be supported by written permission for the quotation from the person or persons concerned; both of these types of citation are permitted in the text only, not in the list of references.

Submissions online Authors should submit manuscripts electronically using the Online Submission and Review System available at http://www.BiochemJ.org/submit/

• Immediate Publications Manuscripts are published online in PDF format as soon as they are accepted, unless on submission the author requests that this not be done. Immediate Publications are listed in and accessible through Medline, and are freely available to anyone with Internet access.

• Queries and correspondence Authors in the Americas should address all queries and correspondence about their submission to: Dr. Sharon Schendel, BJ USA, The Burnham Institute, 10901 N. Torrey Pines Road, La Jolla, CA 92037, U.S.A. (telephone +1 858 713 6283; fax +1 858 713 9682; email editorial@biochemjusa.org). Authors in the U.K., the rest of Europe, Japan and the rest of the world should contact: The Publisher, Biochemical Journal, Portland Press Ltd, Third Floor, Eagle House, 16 Procter Street, London WC1V 6NX, U.K. (telephone +44 20 7280 4110; fax +44 20 7280 4169, email editorial@portlandpress.com).

• Colour figures The first colour figure is published at no charge provided that one author has been a member of the Biochemical Society for at least 2 years and that the use of colour is deemed scientifically necessary by the reviewers (a saving of £500). Subsequent colour figures in the same paper cost £300 each.

Multimedia adjuncts The Biochemical Journal Online offers authors the opportunity to enhance their papers with multimedia adjuncts (e.g. time-lapse moves, three-dimensional structures, animated schemes). These will be submitted to peer review alongside the manuscript. To submit a paper with a multimedia adjunct, please attach the file when you submit your manuscript electronically. Preferably, the data should be QuickTime for time-lapse movies and PDB for structures. There is no extra charge associated with the publication of a multimedia adjunct online.

Other information

The Biochemical Journal is published and distributed by Portland Press Ltd on behalf of the Biochemical Society. It is published twice monthly (October to May: 333–400, three parts each) appear. The subscription also includes an author and key-word index.

• Abstracted/indexed in: BIOBASE, BIOSIS, CAB International, Chemical Abstracts Service, Current Contents, EMBASE, International Food Information Service, Medline/Index Medicus, ProQuest Information & Learning, Science Citation Index.

• Subscription rates Institutional subscription rates for 2006 are shown below. Subscribers to the Online submission can subscribe additionally to Biochemical Society Transactions and Biotechnology and Applied Biochemistry on a joint subscription at a reduced rate. Terms are cash with order (US$ in N. America, £ sterling for rest of the world, or US$ equivalent at current rate of exchange; subscribers in the EU may pay in £ sterling or Euros), or against pro forma invoice. Orders should be sent to the address shown, or through your usual agent.

Overseas rates include airfreight delivery. Priority delivery is available at an additional cost of £64.90 (€110). VAT is due on some supplies to subscribers within the UK, and to non-registered subscribers elsewhere in the EU. If in the EU please state your VAT number otherwise VAT may be charged at the appropriate national rate.

• Electronic back archive This is freely available to all users with Internet access.

• Microfiche and back issues Volumes 102–336 of the Biochemical Journal are available on microfiche. Back issues are also available. Further details may be obtained from the address below.

• Subscription Department Portland Customer Services P.O. Box 32, Commerce Way Colchester CO2 8HP, Essex, U.K. (telephone 01206 796351; fax 01206 799331; email sales@portland-services.com).

• Advertising Enquiries about advertising should be addressed to: Nicky Peacock, Mainline Media Ltd, The Barn, Oakley Hay Lodge Business Park, Great Folds Road, Great Oakley, Corby, Northamptonshire NN18 9AS, U.K. (telephone 01536 747533; email Nickyppmm@aol.com).

The paper and cover-boards used in this journal are sourced from sustainable, managed and renewable commercial forests, and are fully recyclable. The breathing process used for the pulp is 100% ECF (elemental chlorine free).
Review

Calcium-dependent and independent interactions of the S100 protein family
L. Santamaria-Kisiel, A.C. Rintaia-Dempsey and G.S. Shaw
Published on the Internet 15 May 2006, doi:10.1042/BJ20060195
201–214

Accelerated Publication

Regulation of prokaryotic adenylyl cyclases by CO2
A. Hammer, D.R.W. Hodgson and M.J. Cann
Published as BJ Immediate Publication 30 March 2006, doi:10.1042/BJ20060372
215–218

Online Commentaries

Sensing inorganic carbon: CO2 and HCO3–
J.A. Raven
Published on the Internet 15 May 2006, doi:10.1042/BJ20060574
(see accompanying paper pp. 215–218)
e5–e7

Cleavage, a real turn-off? HIV-mediated proteolysis of PAIP1
B. Collier and N.K. Gray
Published on the Internet 15 May 2006, doi:10.1042/BJ20060545
(see accompanying paper pp. 219–226)
e9–e11

HIV Tat-mediated transcriptional regulation of proteasome protein cleavage specificity
C. Aresté and D.J. Blackbourn
Published on the Internet 15 May 2006, doi:10.1042/BJ20060497
(see accompanying paper pp. 371–380)
e13–e15

Research Papers

HIV protease cleaves poly(A)-binding protein
E. Álvarez, A. Castelló, L. Menéndez-Arias and L. Carrasco
Published as BJ Immediate Publication 2 March 2006, doi:10.1042/BJ20060108
219–226

Transcript analysis reveals an extended regulon and the importance of protein–protein co-operativity for the Escherichia coli methionine repressor
F. Marincs, I.W. Manfield, J.A. Stead, K.J. McDowall and P.G. Stockley
Published as BJ Immediate Publication 6 March 2006, doi:10.1042/BJ20060221
227–234

Biological evaluation of tubulysin A: a potential anticancer and antiangiogenic natural product
G. Kaur, M. Hollingshead, S. Holbeck, V. Schauer-Vukatínović, R.F. Camalier, A. Dömling and S. Agarwal
Published as BJ Immediate Publication 20 February 2006, doi:10.1042/BJ20051728
235–242

A new Mad2-interacting domain of Cdc20 is critical for the function of Mad2–Cdc20 complex in the spindle assembly checkpoint
G. Mondal, R.N. Baral and S. Roychoudhury
Published as BJ Immediate Publication 24 February 2006, doi:10.1042/BJ20051914
243–253

Modelling insecticide-binding sites in the voltage-gated sodium channel
Published as BJ Immediate Publication 13 February 2006, doi:10.1042/BJ20051925
255–263
Wild-type and mutant ferroportins do not form oligomers in transfected cells
