General policy

The Biochemical Journal publishes papers in English in all fields of biochemistry and cellular and molecular biology, and makes a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods, biochemical importance, or new interpretations of existing results. Novel theoretical contributions will be considered equally with papers dealing with experimental work. All work presented is aimed at the development of biochemical concepts rather than the mere recording of facts. Preliminary, confirmatory or inconclusive work will not be published. The Biochemical Journal will not publish material that has been wholly or largely published elsewhere, even as a preliminary communication or in an refereed symposium proceedings or on the World Wide Web (WWW); equally, fragmentation of research into the ‘least publishable unit’ is discouraged.

Submission of a paper implies that it has been approved by all the named authors, that all persons entitled to authorship have been so named, that it reports unpublished work that is not under consideration elsewhere, and that if the paper is accepted for publication, the authors will transfer to the Biochemical Society the copyright in the paper, which will then not be published elsewhere in the same form, in any language, without the permission of the Society. Authors will be required to sign an undertaking to these effects.

Authors may suggest potential reviewers for their papers, but the journal is under no obligation to follow such suggestions. Authors may also specify the names of those they wish to be excluded from the review process, and such requests will usually be respected unless, in the opinion of the journal, such a request unreasonably excludes all the expertise available to it in that scientific area.

To allow the reviewers to assess possible overlap with previous work, all submitted papers must be accompanied by duplicate copies of the author’s relevant published work, including that on the WWW, and of all related papers in press or under editorial consideration in this or other journals.

The following types of paper are included in the journal:

Research Papers

Research Papers are the normal form of publication, and may be of any length that is justified by their content. However, because of pressure for space in the journal, no paper, whatever its scientific merits, will be accepted if it exceeds the minimum length required for precision in describing the experiments and clarity in interpreting them. As a guide, most Research Papers published in the Biochemical Journal are of between six and eight printed pages. A concise well-written paper tends to be published more rapidly.

Accelerated Publications (APs) are short (normally four printed pages) papers bringing particularly novel and significant findings to the attention of the research community. It is intended that a decision on acceptance or rejection will be made within 10 working days of receipt, and publication of accepted APs in an issue will follow within 2 months. APs receive full but accelerated reviewing. The criteria of ‘novelty and significance’ are strictly enforced, and papers may be rejected solely on the grounds of lack of novelty and significance. APs are not a path to accelerated publication of sound but non-urgent material. Authors must include in their letter of submission a brief statement of why they believe their AP merits accelerated treatment. Papers reporting nucleotide sequences only are not acceptable as APs. Colour figures will be published free of charge in APs, provided the use of colour is deemed scientifically necessary by the referees.

Reviews will usually be solicited, although unsolicited reviews will be considered for publication. Prospective writers of reviews should first contact the Reviews Editor via the editorial office and should enclose a short (one page) summary of the area they propose to cover.

Procedure for submission

These instructions are identical to those of the Biochemical Journal: Inquiries to Authors (http://www.biochemj.org). Authors are encouraged to refer to these for overall guidelines on submitting a paper, but incorporated into the journal, authors should consult a current issue to make familiar with the general format, such as the use of crossheadings, layout of tables and figures and citation of references. A full page of text in the Biochemical Journal contains approximately 1200 words; when calculating the printed length of papers, allowance must be made for the space occupied by tables and figures and the number of text words reduced accordingly.

The numerical system of references must be used. Each cited ‘published work’ must be accompanied by the names of all persons concerned: a reference to ‘personal communication’ must be supported by written permission from the person or persons concerned; both of these types of citation are permitted in the text only, not in the list of references.

Submit manuscripts online

Authors should submit manuscripts electronically using the Online Submission and Review System available at http://www.biochemj.org/submit/

Immediate Publications

Manuscripts are published online in PDF format as soon as they are accepted, unless on submission the author requests that this not be done. Immediate Publications are listed in and accessible through Medline, and are freely available to anyone with Internet access.

Queries and correspondence

Authors in the Americas should address all queries and correspondence about their submission to: Dr Sharon Schendel, BJ USA, The Burnham Institute, 10901 N. Torrey Pines Road, La Jolla, CA 92037, U.S.A. (telephone +1 858 713 6283; fax +1 858 713 6294; email editorial@biochemjusa.org). Authors in the U.K., the rest of Europe, Japan and the rest of the world should contact: The Publisher, Biochemical Journal, Portland Press Ltd, Third Floor, Eagle House, 16 Procter Street, London WC1V 6NX, U.K. (telephone +44 20 7280 4110; fax +44 20 7280 4169; email editorial@portlandpress.com).

COPE

The Biochemical Journal is a member of the Committee on Publication Ethics and encourages its guidelines to be followed. Further details may be obtained from the address below.

Colour figures

Colour figures are published free of charge provided that the corresponding author on the published paper has been a member of the Biochemical Society for at least 2 years and that the use of colour is deemed scientifically necessary by the reviewers. Otherwise the charges are £550 for the first colour figure and £300 for each subsequent colour figure.

Multimedia adjuncts

The Biochemical Journal Online offers authors the opportunity to enhance their papers with multimedia adjuncts (e.g. time-lapse movies, three-dimensional structures, animated schemes). These will be submitted to peer review alongside the manuscript. To submit a paper with a multimedia adjunct, please attach the file when you submit your manuscript electronically. Preferred formats are QuickTime for time-lapse movies, PDB for structures and Flash for animated schemes. There is no extra charge associated with the publication of a multimedia adjunct online.

The Biochemical Journal is published and distributed by Portland Press Ltd on behalf of the Biochemical Society. It is published twice monthly; in 2007 volumes 401–408 (three parts each) will appear. The subscription also includes an author and key-word index.

Institutional subscription

Institutional subscription rates for 2007 are shown below. Subscribers to the Biochemical Journal can subscribe additionally to Biochemical Society Transactions and Biochemistry and Applied Biochemistry on a joint subscription at a reduced rate (see www.portlandpress.com for further details). Terms are cash with order (US$ in N. America, £ sterling for rest of the world, or US$ equivalent at current rate of exchange; subscribers in the EU may pay in £ sterling or Euros), or against pro forma invoice. Orders should be sent to the address shown, to your usual agent or purchased online at www.portlandpress.com.

US$ in N. America £ Sterling € Euros

Overseas rates include airmail delivery. Airmail delivery is not available at an additional cost of US$135/£70/€120.

Valued Added Tax (VAT) at online-only and ‘combined’ subscriptions at 17.5% is due on the subscription price. Subscribers in the EU are required to supply a VAT number to non-registered subscribers elsewhere in the EU. If in the EU please state your VAT number otherwise VAT may be charged at the appropriate national rate.

Electronic back archive

This is freely available to all users with Internet access.

Microfiche and back issues

Volumes 102–336 of the Biochemical Journal are available on microfiche. Back issues are also available. Further details may be obtained from the address below.

Advertising

Enquiries about advertising should be addressed to: Mark Burgess, Editorial Department, Portland Press Ltd, Third Floor, Eagle House, 16 Procter Street, London WC1V 6NX, U.K., tel.: +44 (0)20 7280 4110; fax: +44 (0)20 7280 4169; email: editorial@portlandpress.com.

The paper and cover-boards used in this journal are sourced from sustainable, managed and renewed commercial forests, and are fully recyclable. The bleaching process used for the pulp is 100% ECF (elemental chlorine free).
### Review

**Urinary-type plasminogen activator (uPA) and its receptor (uPAR) in squamous cell carcinoma of the oral cavity**  
Z. Shi and M.S. Stack  
153–159  
Published on the Internet 25 September 2007,  
doi:10.1042/BJ20071037

### Research Papers

**Ablation of a small transmembrane protein of Trypanosoma brucei (TbVTC1) involved in the synthesis of polyphosphate alters acidocalcisome biogenesis and function, and leads to a cytokinesis defect**  
J. Fang, P. Rohloff, K. Miranda and R. Docampo  
161–170  
Published as BJ Immediate Publication 18 July 2007,  
doi:10.1042/BJ20070612

**Activation-coupled membrane-type 1 matrix metalloproteinase membrane trafficking**  
171–177  
Published as BJ Immediate Publication 25 July 2007,  
doi:10.1042/BJ20070552

**Cytochrome c impaled: investigation of the extended lipid anchorage of a soluble protein to mitochondrial membrane models**  
E. Kalanxhi and C.J.A. Wallace  
179–187  
Published as BJ Immediate Publication 6 July 2007,  
doi:10.1042/BJ20070459

**Insights into polymer versus oligosaccharide synthesis: mutagenesis and mechanistic studies of a novel levansucrase from Bacillus megaterium**  
A. Homann, R. Biedendieck, S. Götze, D. Jahn and J. Seibel  
189–198  
Published as BJ Immediate Publication 4 July 2007,  
doi:10.1042/BJ20070600

**Domain mapping on the human metastasis regulator protein h-Prune reveals a C-terminal dimerization domain**  
199–205  
Published as BJ Immediate Publication 27 July 2007,  
doi:10.1042/BJ20070408

**Study of the mode of action of a polygalacturonase from the phytopathogen Burkholderia cepacia**  
C. Massa, M.H. Clausen, J. Stojan, D. Lamba and C. Campa  
207–217  
Published as BJ Immediate Publication 13 July 2007,  
doi:10.1042/BJ20061833

**Transcriptional regulation of phospholipid biosynthesis is linked to fatty acid metabolism by an acyl-CoA-binding-protein-dependent mechanism in Saccharomyces cerevisiae**  
S. Feddersen, T.B.F. Neergaard, J. Knudsen and N.J. Færgeman  
219–230  
Published as BJ Immediate Publication 26 June 2007,  
doi:10.1042/BJ20070315

**Regulation of multisite phosphorylation and 14-3-3 binding of AS160 in response to IGF-1, EGF, PMA and AICAR**  
231–241  
Published as BJ Immediate Publication 6 July 2007,  
doi:10.1042/BJ20070549

**Basic helix–loop–helix protein E47-mediated p21Waf1/Cip1 gene expression regulates apoptosis of intestinal epithelial cells**  
S. Bhattacharya, H. Guo, R.M. Ray and L.R. Johnson  
243–254  
Published as BJ Immediate Publication 9 July 2007,  
doi:10.1042/BJ20070293
