Molecular mechanisms involved in the regulation of cytokine production by muramyl dipeptide

M. WINDHEIM, C. LANG, M. PEGGIE, L. A. PLATER and P. COHEN

Volume 404 (2007), pp. 179–190

The results shown in Figure 5(D) and Figure 6 were not obtained using the TAK1 inhibitor (5Z)-7-oxo-zeaenol as stated in the published paper, but rather with the closely related compound L783277 (AnalytiCon Discovery GmbH, Potsdam, Germany), which was first described by Zhao et al. [1]. This compound was supplied to the authors in error; its structure and that of (5Z)-7-oxo-zeaenol are shown here.
