The reactivity of the combined cystine of proteins other than wool. By H. Lindley .......................... 481
Preparation and antibacterial action of some compounds structurally related to glutamic acid. Their application in microbiological determination of small quantities of glutamine. By J. A. Roper and H. McIlwain. (With two figures) ............. 485
Relationships in streptococci between growth and metabolism of glutamine. By H. McIlwain, J. A. Roper and D. E. Hughes. (With ten figures) .......................... 492
The estimation of the leucine isomers in protein hydrolysates by infrared analysis. By S. E. Darmon, G. B. B. M. Sutherland and G. R. Tristram. (With five figures) .... 508
Studies on vitamin A. 5. The preparation of retinene, vitamin A aldehyde. By S. Ball, T. W. Goodwin and R. A. Morton. (With five figures) .......................... 516
Proteolytic activity of preparations of crystallized ribonuclease. By A. Kleczkowski. (With two figures) .... 523
The effects of various organic materials on soil nitrification. By H. Lees. (With one figure) ................. 528
The immobilization of mineral nitrogen in soils by different organic materials. By H. Lees. (With one figure) .... 531
The effects of zinc and copper on soil nitrification. By H. Lees. (With three figures) ......................... 534
Studies in detoxication. 16. The metabolism of acetylalnine in the rabbit. By J. N. Smith and R. T. Williams. (With one figure) ........................................ 538
The molecular weight of insulin and its dependence upon pH, concentration and temperature. By H. Gutfreund. (With four figures) .......................... 544
The distribution of acid-soluble phosphates in the fatty liver. By A. H. Ennor and L. A. Stocken. (With two figures) ........................................ 549
The estimation of creatine. By A. H. Ennor and L. A. Stocken. (With three figures) ......................... 557
The fermentation of cellulose in vitro by organisms from the rumen of sheep. By H. R. Marston. (With two figures) ........................................ 557
The estimation of sulphanilamide in plasma. By J. C. Gage, F. L. Rose and M. Scott. (With two figures) .......................... 574
Sexual differences in the storage and metabolism of iron. By E. M. Widdowson and R. A. McCance. (With one figure) ........................................ 577
A synthesis of dl-hydancarptic acid. By D. G. M. Diaper and J. C. Smith .......................... 581
The absorption of ammonia from the rumen of the sheep. By I. W. McDonald. (With one figure) ............. 584
The biochemistry of bacterial toxins. 2. The enzymic specificity of Clostridium welchii lecithinase. By M. G. Macfarlane ........................................ 587
The biochemistry of bacterial toxins. 3. The identification and immunological relations of lecinthinas present in Clostridium oedematis and Clostridium sordellii toxins. By M. G. Macfarlane ........................................ 590
The effect of alcohols on the hydrolysis of sodium phenolphthalein diphasphate by prostatic extracts. By J. Appleyard. (With one figure) ........................................ 596
Reversibility of a phosphoroclastic reaction. By J. Wilson, L. O. Krampitz and C. H. Werkman .......................... 598
The infrared examination of compounds related to ascorbic acid. By I. F. Trotter, H. W. Thompson and F. Wokes. (With one figure) ........................................ 601
The in vitro synthesis of glycogen in the diaphragm of normal and alloxan-diabetic rats. By E. Tuerkishe and E. Wehrheimer ........................................ 603
Hydrochloric acid production by isolated gastric mucosa. By R. E. Davies. With an appendix by R. E. Davies and F. J. W. Roughton. (With six figures) ............. 609
Production of ulcers in isolated frog gastric mucosa. By R. E. Davies and N. M. Longmuir. (With Plates 6 and 7 and seven figures) ........................................ 621
The isomeric transformation of urea into ammonium cyanate in aqueous solutions. By P. Dirnhuber and F. Schuëtz. (With one figure) ........................................ 628
The complexity of the hyaluronidases produced by micro-organisms. By H. J. Rogers. (With four figures) .......................... 633
Proceedings of the Biochemical Society

PAGE

The prosthetic groups of the intracellular haems of Corynebacterium diphtheriae and their relationship to the cytochromes. By W. A. Rawlinson and J. H. Hale.......................... xlivii
The respiratory quotient of the mammary gland. By S. J. Folley and T. H. French.......................... xlivii
Enzymic formation of (−)-nor-adrenaline. By H. Blaschko, P. Holton and G. H. Sloane Stanley.......................... xlviii
The amino-acids present in trypsin and the trypsin inhibitor from soybeans. By E. Work.......................... xlix
The absorption of vitamin A. By E. Eden and K. C. Sellers.......................... xlix
Inhibition of rat-liver succinoxidase by synthetic oestrogens and related substances. By E. M. Case and F. Dickens.......................... 1
Studies on the synthesis of ethereal sulphates in vivo. By J. C. Laidlaw and L. Young.......................... 1
The influence of thyroxine and 2,4-dinitrophenol on the succinoxidase activity of rat liver. By H. G. Williams-Ashman.......................... li
The isolation and partial purification of ‘Aerosporin’. By J. R. Catch and R. Friedmann.......................... lii
Antagonism by amino-acids of renal tubule damaging substances present in ‘Aerosporin’ preparations. By G. Brownlee and E. I. Short.......................... liii
Fractionation of diabetogenic pituitary extracts. By E. Reid and F. G. Young.......................... liv
Some characteristics of the nuclear enzymes of wheat. By R. G. Booth.......................... liv
The carcinogenic activity of N-ethyl-3:4:5:6-dibenzearbazole. By A. H. M. Kirby.......................... lv
The metabolism of stilboestrol and hexestrol in man. By F. H. Malfress.......................... lvi
The solubility of calcium phosphate and dental tissues in incubated mixtures of saliva and flours of different extraction rates. By G. N. Jenkins and M. G. Forster.......................... lvi
Accumulation of L-glutamic acid in isolated brain tissue. By J. R. Stern.......................... lvii
The purity of adenosinetriphosphate preparations by enzymic degradation. By K. Bailey.......................... lviii
The concentration of cozymase and total nicotinic acid in cat oxyntic cells. By N. M. Bradford, R. E. Davies, E. Ellis and D. E. Hughes.......................... lviii
The chemical nature of ‘Aerosporin’. III. The optical configuration of the leucine and threonine components. By T. S. G. Jones.......................... lix
The determination of amino-acids by polarographic reduction of their copper complexes. By T. S. G. Jones.......................... lix
The fate of N-acyl derivatives of ambamide and V335. By R. L. Hartles and R. T. Williams.......................... lx
Carbonic anhydrase as a tool in studying the mechanism of enzymic reactions involving H₂CO₃, CO₂ or HCO₃⁻. By H. A. Krebs.......................... lxi
A periodic classification in spiral form of the biological elements. By W. R. Fearon.......................... lxi
Tryptochrome: an oxidation derivative of tryptophan. By W. R. Fearon.......................... lxi
The urochrome complex: resolution of the pigments obtained by oxidation in presence of zinc. By W. R. Fearon.......................... lxi
Concerning the action of yeast carboxylase. By E. J. Conway and E. O’Malley.......................... lxi
Succinic acid in yeast. By T. Brady.......................... lxii
Evidence for an outer metabolic chamber in the yeast cell. By M. Downey and E. J. Conway.......................... lxii
Quantitative aspects of the storage of vitamin A. By A. W. Davies and T. Moore.......................... lxiii
Vitamin A in the intestine (pyloric caeca) of the halibut. By J. Glover and R. A. Morton.......................... lxiii
The source of the hydrogen ions in the high acid formation by yeast in presence of KCl. By E. J. Conway and T. Brady.......................... lxv
A spectrum of tests. By W. R. Fearon.......................... lxv
