VERSATILITY plus FLEXIBILITY

B.T.L. unit metal laboratory furniture at present comprises nine different units which in various combinations can be made up into laboratories to suit a wide range of individual requirements. They also allow for replanning and developing laboratories as needs change. They simplify the estimation of costs. Delivery is speedy and installation simple. Write for folder (BJ3) giving full details.

THE BIOCHEM ABSORPTIOMETER

A RAPID DIRECT READING PHOTOELECTRIC INSTRUMENT for colorimetric analyses

Used with test-tubes or precision all-glass cells.

Specially suitable for vitamin A assay by the Carr-Price reaction.

Six-volt lamp run from battery or constant voltage transformer.

PHOTOELECTRIC EQUIPMENT

THE PORTABLE COLORIMETER

Combines in a robust case, the Colorimeter, Microammeter and power supply. This instrument provides a simple photoelectric means of accurately assessing the colour density of a liquid. Any variations can be immediately read on the logarithmic scale of the microammeter. A scientific apparatus with many applications in medical and chemical spheres.

PRICE 26 GUINEAS
Complete with filters, matched test tubes and accumulator.

A.C. MODEL 30 GUINEAS
Incorporating constant voltage transformer

Send for full details of this and other photoelectric equipment incorporating the famous "EEL" selenium cells.

The Royal Institute of Chemistry of Great Britain and Ireland

PATRON: H.M. THE KING

THE INSTITUTE OF CHEMISTRY was established in 1877 to provide the Government and the public with the means of recognising those who have been properly trained and proved to be competent to practise chemistry as a profession. In 1885 the Institute was granted a Royal Charter with authority to grant certificates of competency, and to register such persons. The aims of the Institute include the elevation of the profession and the maintenance of the efficiency, integrity and usefulness of persons practising the same, by compelling the observance of strict rules of membership and by setting up a high standard of scientific and practical efficiency. The designation "Royal" was conferred on the Institute by a Supplemental Charter in 1944.

Particulars of the Regulations and Examinations of the Institute can be obtained (free) on application to the Registrar

ESTABLISHED 1844
An improved
Bacteriological
Peptone

The new B.D.H. light Peptone is recommended for all media used in water examination, for tellurite media (in which it produces particularly good growth and differentiation of types), for media for Enterobacteria typhosa, the Salmonellas and Shigellas and for blood agar and plain nutrient agar for general use.

This material is freely available and is issued in four packings which can be supplied immediately from stock.

Research in Pharmacology and Chemotherapy

THE QUARTERLY JOURNAL OF PHARMACY AND PHARMACOLOGY

publics original research papers, and abstracts of the world's literature on pharmacology, chemotherapy, biochemistry, pharmacy, pharmacognosy and allied subjects. The following are examples of research papers included in the current issue:

Local Anesthetics and Enzyme-Hydrolyzing Enzymes
Part I, Inhibitory Action on Liver Esterase.

Editor: C. H. Hampshire, M.B., B.S., B.Sc., Ph.C., F.R.I.C.
Annual Subscription (including binding cover): 30s.
