Obituary Notice (Alexander Thomas Cameron, 1882-1947) ......................................................... 1
Aggregate formation in soil. 1. Influence of some bacterial polysaccharides on the binding of soil particles.
   By M. J. GEOHEGAN and R. C. BRIAN. (With four figures) .................................................... 5
Aggregate formation in soil. 2. Influence of various carbohydrates and proteins on aggregation of soil
   particles. By M. J. GEOHEGAN and R. C. BRIAN .............................................................................. 14
Antipyretic action and catalase activity. By J. WILLIAMSON and E. A. RUDGE .................................. 15
Note on the manometric determination of succinic and α-ketoglutaric acids. By H. A. KREBS and L. V.
   EGGLESTON ........................................................................................................................................ 17
New Zealand fish oils. 5. Composition of the fats of the school shark (Galeorhinus australis, Macleay). By
   A. P. OLIVER and F. B. SHORLAND ................................................................................................. 18
Studies on suramin (antrypol, Bayer 205). 6. Further observations on the determination of suramin in
   whole blood and serum. By H. M. DEWEY and A. WORMALL .......................................................... 24
The fractionation of potato starch. By R. H. HOPKINS and B. JELINEK .............................................. 28
   (With two figures) ............................................................................................................................... 32
The distribution and interrelationships of the alkaloids in the bark of Cinchona Ledgeriana. By H. F. BIRCH
   and L. R. DOUGHTY. (With three figures) ...................................................................................... 38
The effect of some thiol compounds upon trypsin, chymotrypsin and chymotrypsinogen. By R. A.
   PETERS and R. W. WAKELIN. With an addendum on examination of chymotrypsin in the ultracentrifuge.
   By R. CECEIL. (With five figures) ................................................................................................... 45
Quantitative determination of glutamine and glutamic acid. By H. A. KREBS. (With one figure) ......... 51
The recovery of l-nicotine from animal tissues and its colorimetric micro-estimation. By A. R. TRIM.
   (With four figures) ............................................................................................................................ 57
Decomposition and synthesis of cozymase by bacteria. By H. MCLWAIN and D. E. HUGHES ............... 60
The amylase content of the starch present in the growing potato tuber. By T. G. HALSALL, E. L. HIRST,
   J. K. N. JONES and F. W. SANSOME ............................................................................................... 70
The sorption of DDT and its analogues by chitin. By K. A. LORD .......................................................... 72
Studies on biological methylation. 11. The action of moulds on inorganic and organic compounds of
   arsenic. By M. L. BIRD, F. CHALLENGER, P. T. CHARLTON and J. O. SMITH .......................... 78
The chemical and immunological properties of phosphorylated proteins. By J. C. BOURSNELL, H. M.
   DEWEY and A. WORMALL ............................................................................................................. 84
Studies in the biochemistry of micro-organisms. 77. A survey of fungal metabolism of inorganic
   sulphates. By H. RAISTRICK and J. M. VINCENT ............................................................................. 90
Studies on ruminant saliva. 1. The composition and output of sheep’s saliva. By E. I. MCDougall.
   (With Plate 1) .................................................................................................................................... 99
Studies in vitamin A. 6. Conversion in vivo of vitamin A aldehyde (retinene,) to vitamin A1. By J. GLOVER,
   T. W. GOODWIN and R. A. MORTON. (With two figures) .............................................................. 109
The composition and reactivity of medullated keratins. By S. BLACKBURN ......................................... 114
Studies on the liver catalase of normal and cancerous rats. By H. WEIL-MALHERBE and R. SCHADE.
   (With three figures) .......................................................................................................................... 118
The β-glucuronidase activity of ox spleen and the assay of β-glucuronidase preparations. By G. T.
   MILLS. (With six figures) .................................................................................................................. 125
The colorimetric estimation of stilboestrol, hexoestrol and their glucuronides in urine. By F. H. MALFRE.
   (With one figure) .............................................................................................................................. 132
The fifth coagulation factor (‘Factor V’). Preparation and properties. By P. A. OWREN. (With two figures) 136
CONTENTS

The detection of creatine and creatinine by partition chromatography. By G. A. Maw 139
The fate of ingested creatinine in the rat. By G. A. Maw. (With three figures) 142
The effect of fertilizers on the levels of nitrogen, phosphorus, protease, and pectase in healthy tobacco leaves. By M. Holden and M. V. Tracey 147
The effect of infection with tobacco-mosaic virus on the levels of nitrogen, phosphorus, protease, and pectase in tobacco leaves and on their response to fertilizers. By M. Holden and M. V. Tracey 151
Glycerylphosphorylcholine and choline glycerophosphate. By M. Aloisi and P. Buffa. (With Plate 2 and two figures) 157

Proceedings of the Biochemical Society

Hydrolysis of organic compounds by polarized radiation. By E. S. Semmens i
Pteroylglutamic acid deficiency induced in rats by succinylsulphathiazole and the inactivity of anti-pernicious anaemia preparations. By E. Kodic and K. J. Carpenter ii
A polarographic study of pteroylglutamic acid and related compounds. By K. J. Carpenter and E. Kodicke ii
2-Methyl-1:4:5-trihydroxyanthraquinone, a metabolic product of Penicilium islandicum Sopp. By B. H. Howard iii
The kinetics of growth of Bact. lactis aerogenes in the presence of phenol, alcohols, ketones and acetates. By S. Dogley, L. O. Freeman and J. O’G. Tatton iv
Identification of the uronic acid from oestrio1 ‘Monoglucuronide’ as glucuronic acid. By J. K. Grant and G. F. Marrian v
The bacterial oxidation of phenol to β-ketoacidipic acid. By B. A. Kilby v
Studies on formic hydrogenlyase in Escherichia coli. By J. Lascelles vi
Metabolism of aryl sulphides. I. Conversion of p-methylthioaniline to p-methylsulphonylaniline in the mouse. By F. L. Rose and A. Spinks vii
Metabolism of aryl sulphides. II. Simultaneous determination of p-methylthioaniline and p-methylsulphonylaniline in biological material. By A. Spinks vii
Sulphur compounds of Allium. Detection of n-propylthiol in the onion. The fission and methylation of diallyl disulphide in cultures of Scopulariopsis brevicaulis. By F. Challenger and D. Greenwood ix
The faecal lipoids of rats fed on a high cholesterol diet. By R. P. Cook, N. Polgar and R. O. Thompson ix
A study of the peptides of cystine in partial acid hydrolysates of wool. By R. Consden and A. H. Gordon x
The oxidation of L-ornithine in the presence of belladonna polyphenolase. By W. O. James and H. Beeveres xi
Observations on the structure of sarmentogenin. By W. Klyne xi
The administration, storage and metabolism of vitamin A. By J. Glover and R. A. Morton xii
The enzymic hydrolysis of triacetin (glyceryl triacetate). By P. Holton xiii
The effects of a relative deficiency of lysine and tryptophan in the diet of an insect, Tribolium confusum. By G. Fraenkel xiv
The rate of enzymic hydrolysis of phosphoric esters by prostatic phosphatase. By G. E. Delory xiv
The specificity of the human erythrocyte cholinesterase. By D. H. Adams and V. P. Whittaker xiv
The effect of sulphhydryl-combining reagents on the activity of the succinic oxidase system. By E. C. Slater xv
Further observations on the effect of cetyl trimethyl ammonium bromide on the bacterial decarboxylation of glutamate and glutamine. By D. E. Hughes xv
Methods for estimating total serum protein. By B. B. Lloyd, H. M. Sinclair and M. C. K. Tweedie xvii
Estimations of serum protein in famine oedema. By B. B. Lloyd, H. M. Sinclair and M. C. K. Tweedie xvii
Hydrolysis of organic compounds by polarized raditions. By E. S. Semmens xviii
Pipeette for use with the Van Slyke-Neill manometric apparatus. By J. C. Eaton xviii
Enzymic formation of pressor amines. By H. Blaschko, P. Holton and G. H. Sloane Stanley xviii
Chromatography of liver extracts. By E. Lester Smith and L. F. J. Parker xviii
