Complete Culture Media

IN TWO ENTIRELY NEW FORMS*

* TABLETS * GRANULES

—for preparation of single tubes and small quantities of media. Each tablet when dissolved in water produces a convenient quantity.

—for larger scale preparations. Hard and of even size, the granules are less hygroscopic and easier to handle than spray-dried powder.

Both tablets and granules retain all the properties of the original medium, from which they are indistinguishable when reconstituted.

ADVANTAGES ARE APPARENT—
Big time-saving in preparation • No specialised equipment needed
Variability reduced to minimum • Easily portable for field work
Results reproducible from one laboratory to another when using media from central source • Economical, as only sufficient for immediate requirements need be used.

THE FOLLOWING ARE AMONG THE MEDIA AVAILABLE AS TABLETS AND GRANULES

Nutrient Broth • Nutrient Agar • McConkey Broth
McConkey Agar • Peptone Water • Glucose Peptone Broth
Glucose Peptone Agar • Agar-Agar

B.D.H. STAINS for microscopical use
The reputation of B. D. H. Standard Stains is world-wide. They are produced specifically for bacteriological, histological, pathological, zoological and botanical work and the carefully controlled methods used in preparing and testing them guarantee uniformity in the behaviour of different batches of material.
Copies of a useful 50-page booklet "B. D. H. Standard Stains", containing notes on staining methods and the treatment of material, with formulae for fixatives and stains, may be obtained on request.

The British Pharmaceutical Codex

1949

An authoritative and up-to-date book of reference prepared with the assistance of eight committees of experts representing all branches of medical and pharmaceutical knowledge and experience, and working under the general direction of the Council of the Pharmaceutical Society of Great Britain.

The book prescribes standards for and gives comprehensive details of the action, uses, and methods of administration of over 1000 substances used in medicine—vegetable and animal drugs, synthetic chemicals, antibiotics, biological products. Other sections provide information on blood products, surgical sutures, ligatures and dressings.

There are nearly 900 formulae of tested pharmaceutical preparations; appendices provide details of tests, reagents, methods of sterilisation, etc.

This edition supersedes the 1934 issue
Pp. xxv + 1563
Price 63s. (Inland postage 1s.)
