Reviews

Casein kinase: the triple meaning of a misnomer  
A. Venerando, M. Ruzzene and L.A. Pinna  
141–156

The chain-flipping mechanism of ACP (acyl carrier protein)-dependent enzymes appears universal  
J.E. Cronan  
157–163

Research Papers

Kinase and channel activity of TRPM6 are co-ordinated by a dimerization motif and pocket interaction  
J. van der Wijst, M.G. Blanchard, H.I. Woodroof, T.J. Macartney, R. Gourlay, J.G. Hoenderop, R.J. Bindels and D.R. Alessi  
165–175

Trafficking modulator TENin1 inhibits endocytosis, causes endomembrane protein accumulation at the pre-vacuolar compartment and impairs gravitropic response in Arabidopsis thaliana  
177–185

Polyglycine hydrolases secreted by Pleosporineae fungi that target the linker region of plant class IV chitinases  
T.A. Naumann, D.T. Wicklow and N.P.J. Price  
187–198

Mitochondrial thiol oxidase Erv1: both shuttle cysteine residues are required for its function with distinct roles  
S.K. Ang, M. Zhang, T. Lodi and H. Lu  
199–210

Selectively targeting an inactive conformation of interleukin-2-inducible T-cell kinase by allosteric inhibitors  
211–222

Novel role of a family of major facilitator transporters in biofilm development and virulence of Candida albicans  
223–235

Structural and biochemical characterization of the KLHL3–WNK kinase interaction important in blood pressure regulation  
237–246

Human P450-like oxidation of diverse proton pump inhibitor drugs by ‘gatekeeper’ mutants of flavocytochrome P450 BM3  
247–259
