General policy The Biochemical Journal publishes papers in English in all fields of biochemistry and molecular biology, provided that they make a sufficient contribution to knowledge in these fields. Papers may include new results obtained experimentally, description of new experimental methods of biochemical importance, or new interpretations of existing results. Novel theoretical contributions will be considered, although these papers should also contain some experimental testing of the theory. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Preliminary, confirmatory or inconclusive work will not be published. The Biochemical Journal will not publish material that has been wholly or largely published elsewhere, even as a preliminary communication or in unrefereed symposium proceedings or on the World Wide Web (WWW); equally, fragmentation of research into the ‘least publishable unit’ is discouraged.

Submission of a paper implies that it has been approved by all the named authors, that all persons entitled to authorship have been so named, that it reports unpublished work that is not under consideration elsewhere, and that the paper is accepted for publication the authors will transfer to the Biochemical Society the copyright in the paper, which will then not be published elsewhere in the same form, in any language, and of all related papers in press or under editorial consideration in this or other journals.

Authors may suggest potential reviewers for their paper, but the Journal is under no obligation to follow such suggestions. Authors may also specify the names of those they wish to be excluded from the review process, and such wishes are usually respected unless, in the opinion of the journal, such a request unreasonably excludes all the expertise available to it in that scientific area.

To allow the reviewers to assess possible overlap with previous work, all submitted papers must be accompanied by duplicate copies of the author’s relevant published work, including that on the WWW, and of all related papers in press or under editorial consideration in this or other journals.

The following types of paper are included in the journal.

Research Papers are the normal form of publication, and may be of any length that is justified by their content. However, because of pressure for space in the journal, no paper, whatever its scientific content, will be accepted if it exceeds the minimum length required for precision in describing the experiments and clarity in interpreting them. As a guide, most Research Papers published in the Biochemical Journal are of between six and eight printed pages. A concise well-written paper tends to be published more rapidly.

Accelerated Publications (APs) are short (normally four printed pages) papers bringing particularly novel and significant findings to the attention of the research community. It is intended that a decision on submission or rejection decision will be made within 10 working days of receipt, and publication of accepted APs in an issue will follow within 2 months. APs receive full but accelerated reviewing. The criteria of ‘novelty and significance’ are strictly enforced, and papers may be rejected solely on the grounds of lack of novelty and significance. APs are not a path to accelerated publication of issue, or rejection of non-urgent material. Authors must include in their letter of submission a brief statement of why they believe their AP merits accelerated treatment. Colour figures will be published free of charge in APs, provided the use of colour is deemed scientifically necessary by the reviewers.

Reviews will usually be solicited, although unsolicited reviews will be considered for publication. Prospective writers of reviews should first consult the Reviews Editor or the Editorial Office, and should enclose a short (one page) summary of the area they propose to cover.

Procedure for submission These instructions do not replace the official Biochemical Journal Instructions to Authors (http://www.biochemj.org). Authors are encouraged to refer to these for overall guidelines on submitting a paper. Before preparing papers for the journal, authors should consult a current issue to make themselves familiar with the general format, such as the use of crossheadings, layout of tables and figures and citation of references. A full page of text in the Biochemical Journal contains approximately 1200 words; when calculating the printed length of papers, allowance must be made for the space occupied by tables and figures and the number of text words reduced accordingly.

The numerical system of references must be used. A reference to ‘unpublished work’ must be accompanied by the names of all persons concerned: a reference to a ‘personal communication’ must be supported by written permission from the person or persons concerned: both of these types of citation are permitted in the text only, not in the list of references.

Submit manuscripts online Authors should submit manuscripts electronically using the Online Submission and Review System available at http://www.biochemj.org/submit/

Immediate Publications Manuscripts are published online in PDF format as soon as they are accepted, unless on submission the author requests that this not be done. Immediate Publications are listed in and accessible through PubMed.

Open access option – Opt2Pay Choose to make your paper open access. For more information see www.biochemj.org.

Queries and correspondence Authors in the Americas should address all queries and correspondence about their submission to: Dr Shavon Hendel, BJ U.S. address to the Sir Robert Williams Institute for Medical Research, 10901 N. Torrey Pines Road, La Jolla, CA 92037, U.S.A. (telephone +1 858 795 5263; fax +1 858 795 5264; email editorial@biochemj.cn). Authors in the U.K., the rest of Europe, Japan and the rest of the world should contact: The Publisher, Biochemical Journal, Portland Press Limited, Third Floor, Charles Darwin House, 12 Roger Street, London WC1N 2JU, U.K. (telephone +44 20 7685 2410; fax +44 20 7685 2469; email editorial@portlandpress.com).

Colour figures Colour figures are published free of charge provided that the corresponding author on the published paper has been a Full or Early Career member of the Biochemical Society for at least 2 years and that the use of colour is deemed scientifically necessary by the reviewers. Otherwise the charge is £360 to cover all colour figures in the paper.

Multimedia adjuncts The Biochemical Journal Online offers authors the opportunity to enhance their papers with multimedia adjuncts (e.g. time-lapse movies, three-dimensional structures, animated schemes). These will be submitted to peer review alongside the manuscript. To submit a paper with a multimedia adjunct, please attach the file when you submit your manuscript electronically. Preferred formats are QuickTime for time-lapse movies, three-dimensional structures, animated schemes. These will be submitted to peer review alongside the manuscript. To submit a paper with a multimedia adjunct, please attach the file when you submit your manuscript electronically. Preferred formats are QuickTime for time-lapse movies, three-dimensional structures, animated schemes. To submit a multimedia adjunct, please attach the file when you submit your manuscript electronically. Preferred formats are QuickTime for time-lapse movies, three-dimensional structures, animated schemes.

COPE The Biochemical Journal is a member of the Committee on Publication Ethics and endorses its guidelines, which are available at http://publicationethics.org.uk

Microfiche and back issues Volumes 102–406 of the Biochemical Journal are available on microfiche. Back issues are also available. Further details may be obtained from the address below.

Subscription Department Portland Customer Services Third Floor, Charles Darwin House, 12 Roger Street, London WC1N 2JU, U.K. (telephone 020 76852444; fax 020 76852468; email sales@portland-services.com).

Advertising Enquiries about advertising should be addressed to marketing@portlandpress.com.

The paper and cover boards used in this journal are sourced from sustainable, managed and renewable commercial forests, and are fully recyclable. The bleeding process used for the pulp is 100% ECF (elemental chlorine free).
Reviews

Oncogene dependency and the potential of targeted RNAi-based anti-cancer therapy
R. Yan, A. Hallam, P.G. Stockley and J. Boyes
Published on the Internet 13 June 2014, doi:10.1042/BJ20140173
1–13

Mechanisms of transcriptional regulation by WT1 (Wilms’ tumour 1)
E. Toska and S.G.E. Roberts
Published on the Internet 13 June 2014, doi:10.1042/BJ20131587
15–32

Research Papers

The glycation site specificity of human serum transferrin is a determinant for transferrin’s functional impairment under elevated glycaemic conditions
Published as BJ Immediate Publication 10 April 2014, doi:10.1042/BJ20140133
33–42

Genome-wide profiling reveals a role for T-cell intracellular antigens TIA1 and TIAR in the control of translational specificity in HeLa cells
I. Carrascoso, C. Sánchez-Jiménez and J.M. Izquierdo
Published on the Internet 13 June 2014, doi:10.1042/BJ20140227
43–50

The sea anemone toxin AdE-1 modifies both sodium and potassium currents of rat cardiomyocytes
N. Nesher, E. Zlotkin and B. Hochner
Published as BJ Immediate Publication 22 April 2014, doi:10.1042/BJ20131454
51–59

Roundabout 1 exists predominantly as a basal dimeric complex and this is unaffected by binding of the ligand Slit2
L. Zakrys, R.J. Ward, J.D. Pediani, A.G. Godin, G.J. Graham and G. Milligan
Published as BJ Immediate Publication 27 March 2014, doi:10.1042/BJ20140190
61–73

Soya bean Gα proteins with distinct biochemical properties exhibit differential ability to complement Saccharomyces cerevisiae gpa1 mutant
S. Roy Choudhury, Y. Wang and S. Pandey
Published as BJ Immediate Publication 2 April 2014, doi:10.1042/BJ20131341
75–85

Alternative substrates reveal catalytic cycle and key binding events in the reaction catalysed by anthranilate phosphoribosyltransferase from Mycobacterium tuberculosis
Published as BJ Immediate Publication 9 April 2014, doi:10.1042/BJ20140209
87–98

The cardiac ryanodine receptor luminal Ca2+ sensor governs Ca2+ waves, ventricular tachyarrhythmias and cardiac hypertrophy in calsequestrin-null mice
Published as BJ Immediate Publication 23 April 2014, doi:10.1042/BJ20140126
99–106

Inactivation of mammalian Ero1α is catalysed by specific protein disulphide-isomerases
C. Shepherd, O.B.V. Oka and N.J. Bulleid
Published as BJ Immediate Publication 23 April 2014, doi:10.1042/BJ20140234
107–113

Differential conformational dynamics in the closely homologous FK506-binding domains of FKBP51 and FKBP52
S.M. Mustafi, D.M. LeMaster and G. Hernández
Published as BJ Immediate Publication 22 April 2014, doi:10.1042/BJ20140232
115–123
Role of AMACR (α-methylacyl-CoA racemase) and MFE-1 (peroxisomal multifunctional enzyme-1) in bile acid synthesis in mice

Published as BJ Immediate Publication 16 April 2014, doi:10.1042/BJ20130915

Drp1 stabilizes p53 on the mitochondria to trigger necrosis under oxidative stress conditions in vitro and in vivo

Published as BJ Immediate Publication 23 April 2014, doi:10.1042/BJ20131438

X. Guo, H. Sesaki and X. Qi

Ceramide synthase 4 deficiency in mice causes lipid alterations in sebum and results in alopecia

Published as BJ Immediate Publication 17 April 2014, doi:10.1042/BJ20131242
