Online Commentaries

GSDM family genes meet autophagy  
M. Tamura and T. Shiroishi  
e5–e7

New route for the activation of poly(ADP-ribose) polymerase-1: a passage that links poly(ADP-ribose) polymerase-1 to lipotoxicity?  
P. Bai and B. Csóka  
e9–e11

Research Papers

Salicylate activates AMPK and synergizes with metformin to reduce the survival of prostate and lung cancer cells ex vivo through inhibition of de novo lipogenesis  
177–187

Acyl-CoA-binding domain containing 3 modulates NAD+ metabolism through activating poly(ADP-ribose) polymerase 1  
Y. Chen, S. Bang, S. Park, H. Shi and S. F. Kim  
189–198

The focal adhesion kinase Pyk2 links Ca2+ signalling to Src family kinase activation and protein tyrosine phosphorylation in thrombin-stimulated platelets  
199–210

Oxygen reactivity of mammalian sulfite oxidase provides a concept for the treatment of sulfite oxidase deficiency  
A. A. Belaidi, J. Röper, S. Arjune, S. Krizowski, A. Trifunovic and G. Schwarz  
211–221

Nuclear cyclophilins affect spliceosome assembly and function in vitro  
B. M. Adams, M. N. Coates, S. R. Jackson, M. S. Jurica and T. L. Davis  
223–233

Directed cardiomyogenesis of human pluripotent stem cells by modulating Wnt/?-catenin and BMP signalling with small molecules  
235–241

Engineered protease inhibitors based on sunflower trypsin inhibitor-1 (SFTI-1) provide insights into the role of sequence and conformation in Laskowski mechanism inhibition  
S. J. de Veer, J. E. Swedberg, M. Akcan, K. J. Rosengren, M. Brattsand, D. J. Craik and J. M. Harris  
243–253

Tail wags the dog: activity of krait natriuretic peptide is determined by its C-terminal tail in a natriuretic peptide receptor-independent manner  
S. Sridharan and R. M. Kini  
255–266
Slc5a8, a Na\(^+\)-coupled high-affinity transporter for short-chain fatty acids, is a conditional tumour suppressor in colon that protects against colitis and colon cancer under low-fibre dietary conditions. Published as BJ Immediate Publication 18 May 2015, doi:10.1042/BJ20150242

A. Gurav, S. Sivaprakasam, Y. D. Bhutia, T. Boettger, N. Singh and V. Ganapathy

Thiol-disulfide exchange between the PDI family of oxidoreductases negates the requirement for an oxidase or reductase for each enzyme. Published as BJ Immediate Publication 19 May 2015, doi:10.1042/BJ20141423

O. B. N. Oka, H. Y. Yeoh and N. J. Bulleid

FOXO target gene CTDSP2 regulates cell cycle progression through Ras and p21Cip1/Waf1. Published as BJ Immediate Publication 20 May 2015, doi:10.1042/BJ20140831

E3 SUMO ligase AtSIZ1 positively regulates SLY1-mediated GA signalling and plant development. Published as BJ Immediate Publication 26 May 2015, doi:10.1042/BJ20141302

S.-I. Kim, B. S. Park, D. Y. Kim, S. Y. Yeu, S. I. Song, J. T. Song and H. S. Seo

Deletion of phospholipase A\(_2\) group IVc induces apoptosis in rat mammary tumour cells by the nuclear factor-κB/lipocalin 2 pathway. Published as BJ Immediate Publication 27 May 2015, doi:10.1042/BJ20150064

N. Nanashima, T. Yamada, T. Shimizu and S. Tsuchida
