

Instructions to Authors

● **General policy** The *Biochemical Journal* publishes papers in English in all fields of biochemistry and cellular and molecular biology, provided that they make a sufficient contribution to knowledge in these fields. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. Novel theoretical contributions will be considered, although these papers should also contain some experimental testing of the theory. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Preliminary, confirmatory or inconclusive work will not be published. The *Biochemical Journal* will not publish material that has been wholly or largely published elsewhere, even as a preliminary communication or in unrefereed symposium proceedings or on the World Wide Web (WWW); equally, fragmentation of research into the 'least publishable unit' is discouraged.

Submission of a paper implies that it has been approved by all the named authors, that all persons entitled to authorship have been so named, that it reports unpublished work that is not under consideration elsewhere, and that if the paper is accepted for publication the authors will transfer to the Biochemical Society the copyright in the paper, which will then not be published elsewhere in the same form, in any language, without the consent of the Society. Authors will be required to sign an undertaking to these effects.

Authors may suggest potential reviewers for their papers, but the journal is under no obligation to follow such suggestions. Authors may also specify the names of those they wish to be excluded from the review process, and such wishes are usually respected unless, in the opinion of the journal, such a request unreasonably excludes all the expertise available to it in that scientific area.

To allow the reviewers to assess possible overlap with previous work, all submitted papers must be accompanied by duplicate copies of the author's relevant published work, including that on the WWW, and of all related papers in press or under editorial consideration in this or other journals.

The following types of paper are included in the journal.

Research Papers are the normal form of publication, and may be of any length that is justified by their content. However, because of pressure for space in the journal, no paper, whatever its scientific merits, will be accepted if it exceeds the

minimum length required for precision in describing the experiments and clarity in interpreting them. As a guide, most Research Papers published in the *Biochemical Journal* are of between six and eight printed pages. A concise well-written paper tends to be published more rapidly.

Accelerated Publications (APs) are short (normally four printed pages) papers bringing particularly novel and significant findings to the attention of the research community. It is intended that a decision on acceptance or rejection will be made within 10 working days of receipt, and publication of accepted APs in an issue will follow within 2 months. APs receive full but accelerated reviewing. The criteria of 'novelty and significance' are strictly enforced, and papers may be rejected solely on the grounds of lack of novelty and significance. APs are not a path to accelerated publication of sound but non-urgent material. Authors must include in their letter of submission a brief statement of why they believe their AP merits accelerated treatment. Colour figures will be published free of charge in APs, provided the use of colour is deemed scientifically necessary by the reviewers.

Reviews will usually be solicited, although unsolicited reviews will be considered for publication. Prospective writers of reviews should first consult the Reviews Editor, via the editorial office, and should enclose a short (one page) summary of the area they propose to cover.

● **Procedure for submission** These instructions do not replace the official *Biochemical Journal* Instructions to Authors (<http://www.biochemj.org>). Authors are encouraged to refer to these for overall guidelines on submitting a paper. Before preparing papers for the journal, authors should consult a current issue to make themselves familiar with the general format, such as the use of cross-headings, layout of tables and figures and citation of references. A full page of text in the *Biochemical Journal* contains approximately 1200 words; when calculating the printed length of papers, allowance must be made for the space occupied by tables and figures and the number of text words reduced accordingly.

The numerical system of references must be used. A reference to 'unpublished work' must be accompanied by the names of all persons concerned: a reference to a 'personal communication' must be supported by written permission for the quotation from the person or

persons concerned; both of these types of citation are permitted in the text only, not in the list of references.

● **Submit manuscripts online** Authors should submit manuscripts electronically using the Online Submission and Review System available at <http://www.biochemj.org>

● **Accepted Manuscripts** Accepted Manuscripts are published online in PDF format as soon as they are accepted, unless on submission the author requests that this not be done. Accepted Manuscripts are listed in and accessible through PubMed.

● **Open access option** For more information about making a paper open access, see www.portlandpresspublishing.com/content/open-access-policy

● **Queries and correspondence** Authors in China should contact: Dr Lin Huo, Institute of Biophysics, Chinese Academy of Sciences, Room 5202, 15 Datun Road, Chaoyang District, Beijing 100101 (telephone +86 10 64888573; email editorial@biochemj.cn). Authors in the rest of the world should contact: *Biochemical Journal*, Portland Press Limited, Third Floor, Charles Darwin House, 12 Roger Street, London WC1N 2JU, U.K. (telephone +44 20 7685 2410; fax +44 20 7685 2469; email editorial@portlandpress.com).

● **Colour figures** Colour figures are published free of charge provided that the use of colour is deemed scientifically necessary by the reviewers.

● **Multimedia adjuncts** The *Biochemical Journal* offers authors the opportunity to enhance their papers with multimedia adjuncts (e.g. time-lapse movies, three-dimensional structures, animated schemes). These will be submitted to peer review alongside the manuscript. To submit a paper with a multimedia adjunct, please attach the file when you submit your manuscript electronically. Preferred formats are QuickTime for time-lapse movies, PDB for structures and Flash for animated schemes. There is no extra charge associated with the publication of a multimedia adjunct online.

● **COPE** The *Biochemical Journal* is a member of the Committee on Publication Ethics and endorses its guidelines, which are available at <http://publicationethics.org.uk>

Other information

The *Biochemical Journal* is published and distributed by Portland Press Limited on behalf of the Biochemical Society. It is published twice monthly; in 2016 volume 473 (24 parts) will appear.

● **Abstracted by/indexed in:** BIOBASE, BIOSIS, CAB International, Chemical Abstracts Service, Current Contents, EMBASE, International Food Information Service, MEDLINE/Index Medicus, Proquest Information & Learning, PubMed and Science Citation Index.

● **Subscription rates** Institutional subscription rates for 2016 are shown below. The *Biochemical Journal* is available in a range of packages with other Portland Press journals at reduced rates (see www.biochemj.org/content/subscriptions-and-pricing or email licensing@portlandpress.com for further details). Terms are cash with order (US\$ in N. America, £ sterling for rest of the world, or US\$

equivalent at current rate of exchange; subscribers in the EU may pay in £ sterling or Euros), or against pro forma invoice. Orders should be sent to the address shown, to your usual agent or purchased online at www.portlandpress.com.

	N. America	Rest of world	Euro price
One year (24 issues)			
Print and online	US\$5740	£3240	€4850
Online only	US\$4590	£2590	€3880

Value Added Tax (VAT) on online-only and 'combined' subscriptions is due on supplies to subscribers within the UK, and to non-registered subscribers elsewhere in the EU. If in the EU please state your VAT number otherwise VAT may be charged at the appropriate national rate.

● **Electronic back archive** The archive of Portland Press journals is available to pur-

chase either as an annual subscription or for a perpetual access and annual hosting fee. Contact licensing@portlandpress.com for more information.

● **Subscription Department**
Portland Press Third Floor, Charles Darwin House, 12 Roger Street, London WC1N 2JU, U.K.
(telephone 020 76852444; fax 020 76852468; email licensing@portlandpress.com).

● **Advertising** Enquiries about advertising should be addressed to advertising@portlandpress.com.

● The paper and cover-boards used in this journal are sourced from sustainable, managed and renewed commercial forests, and are fully recyclable. The bleaching process used for the pulp is 100% ECF (elemental chlorine free).

Review Articles

- Molecular and cellular basis for the unique functioning of Nrf1, an indispensable transcription factor for maintaining cell homeostasis and organ integrity** Y. Zhang and Y. Xiang 961–1000

Version of Record published 8 April 2016,
doi:10.1042/BJ20151182

- Collagen structure: new tricks from a very old dog** J. Bella 1001–1025

Version of Record published 8 April 2016,
doi:10.1042/BJ20151169

Research Papers

- Discovery of a novel inhibitor of kinesin-like protein KIFC1 W. Zhang, L. Zhai, Y. Wang, R.J. Boohaker, W. Lu, V.V. Gupta, I. Padmalayam, R.J. Bostwick, E.L. White, L.J. Ross, J. Maddry, S. Ananthan, C.E. Augelli-Szafran, M.J. Suto, B. Xu, R. Li and Y. Li 1027–1035

Accepted Manuscript online 4 February 2016,
doi:10.1042/BJ20150992

- Human 3α -hydroxysteroid dehydrogenase type 3: structural clues of 5α -DHT reverse binding and enzyme down-regulation decreasing MCF7 cell growth B. Zhang, X.-J. Hu, X.-Q. Wang, J.-F. Thériault, D.-W. Zhu, P. Shang, F. Labrie and S.-X. Lin 1037–1046

Accepted Manuscript online 29 February 2016,
doi:10.1042/BCJ20160083

- A transcriptional repressive role for epithelial-specific ETS factor ELF3 on oestrogen receptor alpha in breast cancer cells V.N.R. Gajulapalli, V.S.K. Samanthapudi, M. Pulaganti, S.S. Khumukcham, V.L. Malisetty, L. Guruprasad, S.K. Chitta and B. Manavathi 1047–1061

Accepted Manuscript online 2 March 2016,
doi:10.1042/BCJ20160019

- Structural plasticity and *in vivo* activity of Cas1 from the type I-F CRISPR–Cas system M.E. Wilkinson, Y. Nakatani, R.H.J. Staals, S.N. Kieper, H.K. Opel-Reading, R.E. Mckenzie, P.C. Fineran and K.L. Krause 1063–1072

Accepted Manuscript online 29 February 2016,
doi:10.1042/BCJ20160078

- Small molecules reveal an alternative mechanism of Bax activation H. Brahmabhatt, D. Uehling, R. Al-awar, B. Leber and D. Andrews 1073–1083

Accepted Manuscript online 25 February 2016,
doi:10.1042/BCJ20160118

- Mechanism of chitosan recognition by CBM32 carbohydrate-binding modules from a *Paenibacillus* sp. IK-5 chitosanase/glucanase S. Shinya, S. Nishimura, Y. Kitaoku, T. Numata, H. Kimoto, H. Kusaoke, T. Ohnuma and T. Fukamizo 1085–1095

Accepted Manuscript online 2 March 2016,
doi:10.1042/BCJ20160045

- Sticky swinging arm dynamics: studies of an acyl carrier protein domain from the mycolactone polyketide synthase S. Vance, O. Tkachenko, B. Thomas, M. Bassuni, H. Hong, D. Nietlispach and W. Broadhurst 1097–1110

Accepted Manuscript online 26 February 2016,
doi:10.1042/BCJ20160041

Retraction

- Myostatin is a novel tumoral factor that induces cancer cachexia S. Lokireddy, I.W. Wijesoma, S. Bonala, M. Wei, S.K. Sze, C. McFarlane, R. Kambadur and M. Sharma 1111
