New Zealand fish oils. 6. Seasonal variations in the composition of New Zealand groper (Polyprion oxygeneios) liver oil. By F. B. Shorland. (With two figures) 673

Efficiency of oxidative phosphorylation during the oxidation of pyruvate. By W. Bartley. (With three figures) 677

Changes in lens during the formation of X-ray cataract in rabbits. By A. Pirie, R. van Heyningen and J. W. Boag 682

The metabolism of 35S-labelled 2-thiolhistidine and ergothioneine in the rat. By H. Heath 689

Two selective inhibitors of cholinesterase. By L. Austin and W. K. Berry. (With five figures) 695

Appendix—A note on the reaction with inhibitors of enzymes which are inhibited by excess substrate. By W. K. Berry 700

Hydrolysis of benzoylcholine derivatives by cholinesterase in serum. By W. E. Ormerod. (With three figures) 701

Proceedings of the Biochemical Society

The metabolism of pyruvate, lactate and glucose by sheep-rumen epithelium. By R. J. Pennington and T. M. Sutherland xxvii

The influence of acetamide on the citrate accumulation after fluoracetate poisoning. By S. Gitter xxvii

The catalytic effect of molybdate on the hydrolysis of organic phosphates. By W. Weil-Malherbe xxviii

The use of specific inhibitors in the estimation of the pseudo cholinesterase in nervous tissue. By B. J. Bayliss and A. Todrick xxix

The development of the cholinesterases in the brain and spinal cord of the young rat. By B. J. Bayliss and A. Todrick xxxix

The variation with age of the hydrolysis of choline esters by rat tissues. By J. E. Risley and D. R. Davies xxx

The purine and pyrimidine content of some deoxynucleic acids from tumours. By D. L. Woodhouse xxx

The effect of nucleic acids and other compounds on the coagulation of serum albumin by heat. By D. Hamer xxx

An amidase of rabbit liver. By H. G. Bray, K. White and P. B. Wood xxxi

The metabolism of 2:3:4:6-tetrachloronitrobenzene and pentachloronitrobenzene in the rabbit. By J. J. Betts, S. P. James and W. V. Thorpe xxxi

The kinetics of ethereal sulphate formation in tissue slices. By H. G. Bray, A. Hodgkinson and K. White xxxii

The enzymic decomposition of blood-group H substance derived from pig mucin. By M. J. Crumpton and W. T. J. Morgan xxxiii

The serological inactivation of the human blood-group substances by an enzyme preparation obtained from Trichomonas foetus. By W. M. Watkins xxxiii

The structure of 'insoluble' laminarin. By S. Peat, W. J. Whelan and H. G. Lawley xxxiii

β-Methyl fructoside as a substrate in transfructosylation. By W. J. Whelan and D. M. Jones xxxiv

The biosynthesis of fat and cholesterol in vitro by ovarian tissues of the laying hen. By G. Popjak and A. Tietz xxxv

Fatty-acid synthesis in slices and homogenates of rat mammary gland. By G. Popjak and A. Tietz xxxv

The actions of α-amylases. By R. H. Hopkins and R. Bird xxxvi

Bromsulphalein retention in choline deficiency and replacement in the rat. By N. D. Ahmad and A. C. Frazer xxxvi

Studies on the effects of chlorine dioxide on gluten. By A. C. Frazer, P. Meredith and H. G. Sammons xxxvii

Chemical studies on the gonadotrophin in urine of post-menopausal women. By W. R. Butt and R. E. Deriaz xxxviii

Studies of the inositol-containing lipids of soya bean. By E. Chargaff and J. N. Hawthorne xxxviii

X-ray diffraction studies on nerve myelin. By J. B. Finean xxxix

Qualitative chromatography of long-chain fatty acids. By R. G. Baker xxxix
