A COMPLETE, COMPREHENSIVE INDUSTRIAL GLASS SERVICE

Joblings Visibleflow
Pipeline and “Quickfit” Industrial Plant in “Pyrex” glass are now being marketed solely through Q.V.F. Ltd., Mill Street, Stone, Staffs. Products of both Jobling’s and “Quickfit” are made from “Pyrex” brand glass and they can be built into complete Industrial Units for the service of industry the world over.

Really new

THE LOW INERTIA WARBURG APPARATUS

Cheaper
More compact
Silent

Takes normal manometers and flasks.

Every manometer shakes individually with a sprung semi-rotary movement and can be arrested for reading by gripping it.

Every manometer can be brought opposite the operator.

Temperature $\pm 0.01^\circ$C. at $37^\circ$C.

Cooler available if required.

for

METALLURGISTS

The identification and estimation of the rare earths is a common problem not easily solved by normal chemical methods. Curves similar to those shown are quickly reproduced with the help of the SP.600 Spectrophotometer making a detailed, accurate analysis a matter of routine. The technique can be extended to all metallurgical problems that can be solved by colorimetric methods.

Please write for new illustrated leaflet describing the instrument in detail.

ANTIBIOTICS

By F. A. Robinson

This new book summarizes the essential facts about antibiotics with the minimum of detail. In addition to utilizing material drawn from a wide variety of scientific disciplines, the author has given special attention to his own particular interests in the biochemistry, chemistry, and bacteriology of the antibiotics. Written at degree level, this book will be invaluable to students and of considerable interest to chemists, biochemists, microbiologists, and others who require a balanced picture of the antibiotics as a whole.

NEW ITEMS—NOT IN OUR 1953 CATALOGUE

Podophyllotoxin .......................... 54/- G
Polyvinyl alcohol (viscosity of 4% aqueous soln. 1 cps.) ............. 34/- K
alloPregnanediol ............. 120/- G
n-Propyl mercaptan .......... 22/- H
iso-Propyl mercaptan ........ 22/- H
Propyl-p-hydroxy benzolate .... 15/- H
iso-Propyl nitrate ........ 28/- K
Protease .......................... 9/- D
Pteroyl-triglutamic acid (20 mg. amp.) 30/- amp.
Pyridine-4-aldehyde-hydrate ...... 62/- H
Pyridine-3-sulphonic acid .... 12/- D
Pyridoxal hydrochloride ...... 136/- G
Pyridyl-2-carbinol ........ 11/- D
Pyridyl-3-carbinol .......... 27/- H
Pyridyl-4-carbinol ........ 13/- D
2-Pyridyl hydroxy methyl sulphonil acid ........ 36/- H
3-Pyridyl hydroxy methyl sulphonil acid ........ 12/- D
4-Pyridyl hydroxy methyl sulphonil acid ........ 31/- H
Quinhydrone ......................... 15/- H
Resazurin tablets for milk test (in bottles of 100) ...... 10/-
Sarsasapogenin ............. 25/- G
Sodium benzoate ............ 50/- D
Sodium methoxide ........ 48/- K
Sodium taurocholate ...... 29/- H
Spermine phosphate ......... 34/- G
Succinamide ......................... 34/- H
Succinyl sulphathiazole ...... 54/- H
Sulphamic acid ............. 35/- K
\(\beta\)-1:2:3:4-Tetra-O-acetyl-6-O-tri phenylmethyl glucose .................. 10/- G
3:3'4:4'-Tetra-amino-diphenyl HCl (3:3'-dibromo-benzidine HCl) .......... 20/- G
Tetra-n-butyl titanate .......... 76/- G
Tetraethyl-ethylene diamine .......... 32/- H
Tetraglycine hydroperoxidid ........ 52/- H
Tetra-hydro-2-methyl-quinoline .......... 67/- H
Tetra-iodo-thiophene .......... 25/- H
Tetraocetyl acid .............. 45/- H
Thionine (Lathu's violet) ...... 12/- D
Thiouronium chloride .......... 80/- D
Thiouria dioxide (formamidine sulphonil acid) .......... 76/- K
Thorium nitrate (pure) ........ 63/- K
Thymol phthaline ............. 14/- H
2:4:5-Triamino-6-hydroxy-pyrimidine dihydrochloride .......... 97/- D
4:5:6-Triamino-pyrindine .......... 60/- G
Trichloro-acetonitrile .......... 33/- K
2:4:6-Trichlorophenol (m.p. 64/65° C.) .......... 33/- K
Tri-n-decylamine .......... 190/- H
Tri-n-decyl acid ........ 6/- G
Triethylene melamine (TEM) .......... 15/- D
Triglycine-malic acid (m.p. 246–9° C.) .......... 27/- H
Tripeptilin ......................... 18/- G
2:4:6-Triphenyl-s-triazine ........ 41/- D
Trypsin lyophilised ex beef pancreas (5–8 northrup units per mg.) .......... 59/- G
\(\alpha\)-Tryptophan ........ 35/- G
Tyrothricin ......................... 12/- G
Uramil (5-amino-barbituric acid) .......... 18/- D
\(n\)-Valeric anhydride .......... 55/- H
Vitamin B\(_{12}\) (100 mg. amp.) .......... 320/- d
Xanthopterin (2-amino-4 : 6 dihydroxypteridine) .......... 120/- G
L-Xylose .......................... 16/- G

1954 list available

\(\beta\)-Glucose ......................... 27/- D
Glutamic acid dehydrogenase .......... 120/- d
L-Gulonic lactone (--5° C) .......... 60/- H
Hexane-1, 2, 6-triol .............. 60/- H
Histone (ex calf thymus nuclei) .......... 140/- d
allo-Hydroxy-d-proline .......... 140/- G
3-Hydroxy-tartrazine HCl .......... 55/- G
Lactobionic acid, Ca salt .......... 30/- D
pt-Leucyl-glycine .......... 28/- D
Lysozyme ......................... 140/- G
\(\alpha\)-Naphthyl acetate .......... 20/- G
L-Ornithine HCl (optically standardised) 60/- G
pt-Pantoxy lactone .......... 11/- D
Patulin ......................... 24/- G
Pepsin, 2 x crys. .............. 80/- G
D(-)-3-Phosphoglyceric acid, Ca salt .......... 16/- G
Phthiocol ......................... 23/- G
\(\alpha\)-Ribo-nolactone .......... 45/- D
Ribo-nucleic-acid, no protease .......... 240/- d
\(\alpha\)-Serine (optically standardised) .......... 160/- G
L-Serine (optically standardised) .......... 140/- G
pt-Tartaric acid .......... 24/- D
L-Tartaric acid .......... 24/- G

\(\alpha\)-Naphthyl acetate .......... 20/- G
L-Ornithine HCl (optically standardised) 60/- G
pt-Pantoxy lactone .......... 11/- D
Patulin ......................... 24/- G
Pepsin, 2 x crys. .............. 80/- G
D(-)-3-Phosphoglyceric acid, Ca salt .......... 16/- G
Phthiocol ......................... 23/- G
\(\alpha\)-Ribo-nolactone .......... 45/- D
Ribo-nucleic-acid, no protease .......... 240/- d
\(\alpha\)-Serine (optically standardised) .......... 160/- G
L-Serine (optically standardised) .......... 140/- G
pt-Tartaric acid .......... 24/- D
L-Tartaric acid .......... 24/- G

Trypsinogen, 1 x crys.
(approx. 50% MgSO\(_4\)) .......... 150/- G
Uricase, powder .......... 150/- G
HOWAT, HENRY T. and SCHOFIELD, B. The effect of urogastrone, enterogastrone and mepyramine maleate on gastric and pancreatic secretion.

COOLEY, G. Some observations on impurities present in samples of Evan’s Blue (T 1824) and their influence on blood-volume determinations effected by the dye method.
