Another Sigma First —

URIDINE DIPHOSPHO-GLUCURONIC ACID

Uridine Diphospho-Glucuronic Acid has been shown to be involved in Glucuronide Synthesis in detoxification processes

Also available with the Well-Known Sigma Purity

URIDINE DIPHOSPHOACETYL GLUCOSAMINE,
CYTIDINE DIPHOSPHOCHOLINE,
ADENOSINE TETRAPHOSPHATE,
6-PHOSPHOGLUCONATE

NOW AVAILABLE!
REAGENTS FOR THE DETERMINATION OF
CONGENITAL GALACTOSEMIA
Per Kalskar, Anderson, Kurahashi, Isselbacher
GALACTOSE-1-PHOSPHATE,
URIDINE DIPHOSPHOGLUCOSE,
URIDINE DIPHOSPHOGLUCOSE OXIDASE

(ii)
Active ‘tracers’

Several hundred isotopically labelled compounds are now produced regularly at Amersham. They include an unrivalled range of materials needed for tracer work in biology, pharmacology, medical diagnosis and therapy, and in many technical applications of chemical products—pesticides, weedkillers, hormones, and the like.

Most of these substances can be supplied from stock—or in the case of short-lived isotopes, at reasonable notice—and their specific activity and chemical purity are generally the highest available today.

Some examples from our current Carbon-14 production are:

- d-Ribose (G)
- Maltose (G)
- d-Sorbitol (G)
- Creatine-1-C14
- Orotic acid-6-C14
- p-Hydroxytryptamine (31-C14)
- Adipic acid-1, 6-C14
- dl-Phenylalanine-1-C14
- Sodium glycinate-1-C14
- Sodium isobutyrate-1-C14
- dl-Tartaric acid-1, 4-C14
- Sodium d-gluconate-1-C14
- d-Glucose-6-C14
- d-Ribose-1-C14
- 1, 2-Benzanthracene-9-C14
- Methylamine hydrochloride
- Ethane-1, 2-C14
- Methane
- d-Glucose-2-C14
- dl-2-Hydroxytryptophane (31-C14)
- 9, 10-Dimethyl-1, 2-benzanthracene-9-C14
- 1, 2, 5, 6-Dibenzanthracene-9-C14
- Progesterone-4-C14
- Linoleic acid-1-C14
- 2-Methyl-4-chlorophenoxy(acetic acid-1-C14)
- Fumaric acid-2, 3-C14
- Succinic acid-2, 3-C14
- Sarcosine-1-C14
- Sodium 2-ketoglutarate-5-C14
- Bromobenzene (G)
- Testosterone-4-C14
- Cholesterol-4-C14
- L-Histidine (2-ring-C14)

(G) = Generally labelled

DEPARTMENT OF CHEMISTRY
SESSION 1957-58

A course of 20 postgraduate lectures on "Biochemistry" (to be arranged in four groups) will be given by Dr E. M. Crook, M.Sc., A.R.I.C., and Professor F. L. Warren, M.A., D.Sc., on Mondays 7.15 to 8.30 p.m. during the period 7 October, 1957 to 17 March, 1958. The course is designed for students who possess a knowledge of chemistry to degree standard. Fee: £2 for whole course or 10s. for each group.

A leaflet giving details is obtainable from the Secretary.

APPARATUS

MODEL VB/14

This is the most convenient apparatus for micro-respiration work; its circular shape makes for ease and speed of operation and for economy of space. The unit is more compact than a rectangular bath of equal capacity, as it accommodates manometers round its entire periphery. The whole apparatus can be rotated around its base, so that any particular manometer can be brought directly in front of the operator, and the apparatus can be installed in any position (in a corner if need be) since only one side need be accessible.

The circular shape bath has proved ideal for maintaining a uniform temperature as there are no ‘dead spots’ to hinder circulation. Temperature is constant to within ±0.01°C. Shaking speed and amplitude are adjustable, and provision has been made for secure and positive mounting of the manometers—no wobbling!

A New Book
BIOCHEMICAL DISORDERS IN HUMAN DISEASE
Now available

The purpose of this book is to assemble, relate and interpret the known facts concerning biochemical disorders that underlie or are associated with human disease, presenting a coherent account of modern concepts both of diagnosis and treatment. The individual chapters are written by distinguished contributors from both sides of the Atlantic.

Two New Accessories

FOR THE SP. 500 ULTRAVIOLET SPECTROPHOTOMETER

SP.570
CONSTANT TEMPERATURE CELL HOUSING
Two standard optical cells up to 40 mm. light path are maintained at even temperature by circulating fluid. Stability limits are determined by the thermostat and circulation system used. The accessory has been used successfully at temperatures up to 65°C and (with dry air to prevent condensation) at -1°C.

PRICE: £30 (excluding circulatory equipment)
DELIVERY — August

SP.580
MICROCELL ACCESSORY
Four semi-microcells up to 40 mm. light path can be accommodated. The capacity of the 10 mm. microcell is 0.4 ml. approx. A range of auxiliary lenses and slits is built into the accessory which, without modification or dismantling, will accept the standard cell basket or the 10 cm. gas cells.

PRICE—£47. 10. 0
DELIVERY — November.
