FORTHCOMING PAPERS

It is hoped to publish the following papers in the next issue of the Biochemical Journal:
The faith of a master in biochemistry. The first Hopkins Memorial Lecture. By Sir Rudolph A. Peters
Studies on sulphatases. 23. The enzymic desulphation of tyrosine O-sulphate. By K. S. Dodgson, F. A. Rose and N. Tudball
The fermentation of lactic acid by a Gram-negative coccus. By J. N. Ladd
Transglucosidase activity of rumen strains of Streptococcus bovis: structure of the dextran produced from sucrose. By R. W. Bailey
The anaerobic metabolism of citrate in rat liver. By W. Bartley, M. Sobrinho-Simões, Brenda M. Notton and Grazia Montesi
The identity of natural and synthetic ββ-dimethylacrylylcholine. By V. P. Whittaker
The in vitro enzymic hydroxylation of steroids. 5. Hydrogen transport in ox-adrenocortical mitochondria in relation to steroid hydroxylation. By J. K. Grant and K. Mongkolkul
The effect of haemorrhage on the incorporation of [3-14C]glycine into steroctin. By C. H. Gray and J. J. Scott
The isolation of a sixth Kober chromogen from the urine of pregnant women and its identification as 18-hydroxy-oestronc. By K. H. Loke, G. F. Marrian and Elizabeth J. D. Watson
Comparative detoxication. 6. The metabolism of 6-amino-4-nitro-o-cresol and 4:6-dinitro-o-cresol in locusts. By Teresa Kikal and J. N. Smith
Formation of collagen hydroxyproline in vitro. By N. M. Green and D. A. Lowther
Studies on the preparation and isoelectric point of staphylococcal α-haemolysin. By L. O. Butler
Studies on gastric proteolysis. 1. The proteolytic activity of human gastric juice and pig and calf gastric mucosal extracts below pH 5. By W. H. Taylor
A quantitative method for the chromatographic separation of 17-oxo steroid sulphates from 17-oxo steroid glucuronides; with observations on the behaviour of conjugated corticosteroids on the same system. By J. J. Bairlow and A. E. Kellie
Seasonal changes of the catechol compounds present in rat tissues. By Katharine A. Montagu
The relationship of fermentation to cell structure in yeast. By A. Rothstein, D. H. Jennings, C. Demis and M. Bruce
Respiratory enzyme studies in Tetrahymena pyriformis. 4. Stabilization of electron-transport components. By H. J. Eichel
The absorption of cystine and cysteine from rat small intestine. By M. W. Neil
The carbohydrate complexes of bronchial secretion. By T. D. Brogan
Acidic peptides of the lens. 5. S-Sulphotoglutathione. By S. G. Waley
A specific colorimetric method for estimation of phlorhizin in biological fluids. By F. A. Jenner and D. H. Smyth
Glucuronide synthesis in foetal liver and other tissues. By G. J. Dutton
Incorporation of amino acids into some subcellular fractions of hepatic tissues of the rat. By P. N. Campbell and Oloa Greengard
A comparison of the serum proteins of normal rats with those of rats bearing liver tumours. By P. N. Campbell, Barbara A. Kernot and I. M. Roitt
Mitochondria from embryonic tissues of the chick:
  1. Preparation, characterization and some enzymic properties. By N. H. Carey and G. D. Greville
Distribution of phosphorus compounds in blowfly thoracic muscle. By G. M. Price and S. E. Lewis
Observations on the molecular weight and chemical composition of nisin A. By G. C. cheeseman and N. J. Berridge
Separation of glycerylphosphoryl inositol and related compounds on ion-exchange columns. By J. N. Hawthorne and G. Hübscher
The respiration of cardiovascular tissues of the developing chick and adult fowl. By M. C. Bhattacharya and J. D. B. MacDougall
NOTES FOR CONTRIBUTORS

Papers submitted for publication in the Biochemical Journal should be written concisely. The sections below concerning the preparation of the typescript give only general indications. Authors are urged to consult the more detailed Suggestions to Authors, Chemical Nomenclature and Abbreviations, Symbols, Usages and Conventions, which was published in May 1957 (Biochem. J. 1957, 66, 1); also Notes on Preparation of Illustrations, which was published in January 1956 (Biochem. J. 1956, 62). Copies of these two pamphlets may be obtained from the Editorial Office (Biochemical Journal), The Lister Institute, Chelsea Bridge Road, London, S.W. 1, price 1s. 6d. (Suggestions to Authors) and 1s. (Notes on Preparation of Illustrations) post free.

Strict observance of the requirements of the Biochemical Journal will shorten the period between the receipt of a paper and its publication.

Communications. Papers submitted for publication should be sent to the Secretary to the Editorial Board (Biochemical Journal), The Lister Institute of Preventive Medicine, Chelsea Bridge Road, London, S.W. 1.

Abstracts. Authors are requested to submit with their typescript an abstract suitable for inclusion in International Abstracts of Biological Sciences. This abstract will not appear in the Biochemical Journal but will be edited before being passed for publication in the Abstracts.

The abstract should outline as briefly as possible the results and definitive conclusions of the work submitted. Details of methods are generally not required. A paper of average length should be abstracted in about 100 words. The abstract should be typed in double spacing on a separate quarto sheet in the following form: title; name(s) of author(s); Biochem. J. (space for year, volume and page reference); address (for reprint applications); abstract. For example:

Reprints. Where at least one author of a paper is a member of the Biochemical Society, twenty-five reprints are supplied free of cost. An author may purchase additional reprints if he notifies the Press on the appropriate form immediately the proof of the paper is received. Communications about the purchase of reprints should be addressed to the University Press, Cambridge.

General. It is the policy of the Biochemical Journal to publish papers in all fields of biochemistry—plant, animal and microbiological—provided that they describe results which make a new and fundamental contribution to biochemical knowledge, or that they describe methods applicable to biochemical problems. Submission of a paper to the Editorial Board will be held to imply that it reports unpublished work, that it is not under consideration for publication elsewhere, and that if accepted for the Biochemical Journal it will not be published elsewhere in the same form, either in English or in any other language, without the consent of the Editorial Board.

Contributors who reside abroad may nominate somebody in Great Britain who is willing to correct the proofs of their papers. Proofs are also sent to all authors residing abroad, if necessary by airmail, whether or not they have nominated a proof reader.
in Great Britain; if these are returned immediately, it will normally be possible to incorporate corrections in the final proof. The method of correcting proofs given in B.S. 1219 or B.S. 1219C (obtainable from the British Standards Institution) is preferred.

Papers should be headed by an informative title, by the names of the authors and by the name and address of the Laboratory where the work was performed. Female authors should use one given name and the surname, and male authors should use initials and surname only. Descriptive material about the author, e.g. Beit Memorial Fellow, or details of financial support, should appear as a footnote on the first page or, preferably, in the acknowledgements at the end of the paper.

Typescripts should bear the name and address of the person to whom the proof of the paper is to be sent, and should give also a shortened version of the title, not exceeding forty-five letters and spaces in length, suitable for a running title in the published pages of the work.

If a paper that has been returned to an author for revision is not resubmitted within six months, it will be deemed to be a new paper and the date of receipt altered accordingly. A revised paper containing a significant amount of new material will also be redated.

A paper should be written only when a piece of work is rounded off. Preliminary or abortive experiments should not be described.

It would help the editors if the author, when submitting a paper which is part of a series, would enclose reprints of the immediately preceding parts.

**Form of papers submitted for publication.** Papers should be in double-spaced typing on sheets of uniform size with wide margins. Top copies only should be submitted. The paper should be written in English.

The onus of preparing a paper in a form suitable for sending to press lies in the first place with the author, who should first consult the detailed *Suggestions to Authors, Chemical Nomenclature and Abbreviations, Symbols, Usages and Conventions*. Authors should also refer to a current issue of the *Journal* in order to make themselves familiar with the typographical conventions, use of cross-headings, lay-out of tables, citation of references, etc. The need for editorial revision of a badly prepared typescript will lead to delay in publication. Papers on specialized subjects should be presented so that they are intelligible to the ordinary reader of the *Journal*. Sufficient information should be included to permit repetition of the experimental work.

Generally, papers should be divided clearly into sections, as follows: (a) introduction, containing the reasons for doing the work; (b) Experimental methods: with chemical papers the experimental part may appear towards the end, but otherwise should follow the introduction; (c) Results: these should be given concisely; the use of both tables and figures to illustrate the same results will only rarely be permitted; only illustrative protocols should be included; (d) Discussion: it is desirable that the presentation of the results should be separated from the discussion of their significance; this section should be strictly limited to discussion, and should not recapitulate results; (e) a Summary, about 3% of the length of the paper: the paragraphs of the Summary should be numbered; (f) acknowledgements; (g) References. The arrangement suggested for sections (b)–(d) is not binding on authors; other ways of arrangement are sometimes more suitable.

**Illustrations.** Diagrams that do not conform with the directions given in *Notes on Preparation of Illustrations* may have to be redrawn by the Press and the expense charged to the author. Legends and captions should be written so that the general meaning of each illustration can be understood without reference to the text, and so that the exact experimental conditions used to obtain the results illustrated are made clear. Illustrations requiring reproduction as half-tone plates should be avoided whenever possible. Photographs or drawings of paper chromatograms, particularly one-dimensional, are not generally published.

**Tables.** Tables should have headings which make their general meaning comprehensible without reference to the text. Conditions specific to the particular experiment should be stated. Reference to the text for general experimental methods is permissible provided that there is no ambiguity. The units in which the results are expressed, e.g. g./100 ml., should be given at the top of each column, and not repeated on each line of the table.

Tables should be typed on separate sheets and their approximate position in the text indicated. Words or numerals should be repeated on successive lines: ‘ditto’ or ‘,,’ are not to be used.

**Footnotes.** These should be avoided in the text as far as possible.
INDEX TO VOLUME 70

THE BIOCHEMICAL JOURNAL

Edited for
THE BIOCHEMICAL SOCIETY

Index of Subjects

Note. Entries marked with an asterisk (*) refer to communications made in title only. Pages in Proceedings of the Biochemical Society are distinguished by p.

Acacia species, leucoanthocyanins in wood of (Roux, D. G. & Evelyn, S. R.) 344

Acetate, radioactive, incorporation of, into β-carotene, by illuminated etiolated maize seedlings (Goodwin, T. W.) 612

Acetoacetate, formation of, in homogenates of mammary gland (Terner, C.) 402

Acetoin see Acetilmethanolbin

6-O-Acetyl-d-galactopyranose, synthesis of (Duff, R. B. & Farmer, V. C.) 515

6-O-Acetyl-d-glucopyranose, identification of, in Bacillus megaterium cultures (Duff, R. B. & Farmer, V. C.) 515

6-O-Acetyl-d-glucopyranose, infrared spectra of (Duff, R. B. & Farmer, V. C.) 515

6-O-Acetyl-d-glucopyranose, metabolism of, by strains of Bacillus megaterium and other soil organisms (Duff, R. B. & Webley, D. M.) 520

6-O-Acetyl-d-glucopyranose, synthesis of (Duff, R. B. & Farmer, V. C.) 533

[2-14C]Acetilmethanolbin (acetoin), incorporation of, into ring A of riboflavin by Eremothecium ashbyii (Goodwin, T. W. & Treble, D. H.) 14p

Acyl-coenzyme A as cofactor in pyruvate oxidation (Peel, J. D.) 7p

Adenosine 5'-phosphate, permeability of isolated rat-liver mitochondria at 0° to (Amoore, J. E.) 718

Adenosine triphosphate, permeability of isolated rat-liver mitochondria at 0° to (Amoore, J. E.) 718

Adenosine triphosphate, reactivation of aged liver microsomes by Mn++, Mg++ and (Gosselin, L. & Popjak, G.) 19p

Adrenaline, association of, with blood platelets (Weil-Malherbe, H. & Bone, A. D.) 14

Aerobacter aerogenes, aminopterin inhibition in (Webb, M.) 472

Aloine, accumulation of, during inhibition by aminopterin in Aerobacter aerogenes and its utilization on recovery (Webb, M.) 472

Aloine, effect of various metabolites on incorporation of, into protein of rat diaphragm in vitro (Manchester, K. L. & Young, F. G.) 397

Albumin, plasma, catabolism of, by perfused rat liver (Cohen, S. & Gordon, A. H.) 544

Amino acid composition of a corticotrophin-releasing factor (Schally, A. V., Safran, M. & Zimmermann, B.) 97p

Amino acids, bound, in protein-free extracts of Italian ryegrass (Syng, R. L. M. & Wood, J. C.) 321

Amino acids, content of, in chlorotic and healthy leaves (DeKock, P. C. & Morrison, R. L.) 266

Amino acids, effect of insulin on incorporation of, into protein of normal rat diaphragm in vitro (Manchester, K. L. & Young, F. G.) 397

Amino acids, kinetic aspects of uptake of, by carrot tissue (Birt, L. M. & Hird, F. J. R.) 286

Amino acids, labelled, effect of various metabolites on incorporation in vitro of, into protein of normal rat diaphragm (Manchester, K. L. & Young, F. G.) 397

[14C]Amino acids, labelling by, of cell-sap protein in a cell-free system from guinea-pig liver (Sinkin, J. L.) 305

d-Amino acids, uptake of, by carrot (Birt, L. M. & Hird, F. J. R.) 277

[14C]Amino acids, use of, to study dynamics of antibody secretion (Askonas, B. A. & Humphrey, J. H.) 212

Amino groups, free, reaction of, in native and denatured ovalbumin towards fluorodinitrobenzene (Steven, F. S. & Tristram, G. R.) 179

5-Amino-4-imidazolecarboxamide riboside, presence of, in Aerobacter aerogenes cultures (Webb, M.) 472

β-Aminolevulic acid, formation of, by particles obtained from chicken erythrocytes (Laver, W. G., Neuberger, A. S. & Mefriend, S.) 741

β-Aminolevulic acid, formation of, from glycine and succinyl-coenzyme A by particles from chicken erythrocytes (Gibson, K. D., Laver, W. G. & Neuberger, A.) 71

β-Aminolevulic acid, relationship of tricarboxylic acid cycle to synthesis of, in avian erythrocyte preparations (Brown, E. G.) 313

Aminopterin, factorial experiment to study factors which reverse inhibition by (Biggers, J. D. & Webb, M.) 487

Aminopterin, inhibition by, in Aerobacter aerogenes (Webb, M.) 472

ε-(Aminosuccinyl)-lysine, formation of, from ε-aspartyl-lysine from bacitracin A and from cell walls of lactobacilli (Swallow, D. L. & Abraham, E. P.) 364

Anthocyanins, spectral methods of characterization of (Harborne, J. B.) 22

Antibody, formation of, by isolated perfused lungs of immunized rabbit (Askonas, B. A. & Humphrey, J. H.) 212

Armeria maritima see Thrift

Artemisia catalactus, cytotoxins and respiratory enzymes in mitochondria from spadix of (Bellant, D. S.) 381

Ascorbic acid, distribution of, in normal and leukemic human blood (Bartham, P. & Howard, A. N.) 163

Ascorbic acid, effect of cyanide on biosynthesis of, by an enzyme preparation from goat liver (Chatterjee, I. B., Ghosh, J. J., Ghosh, N. C. & Guha, B. C.) 509

Aromatic acid, synthesis of ε-aspartyl-lysines and of isochexylamides of (Swallow, D. L., Lockhart, I. M. & Abraham, E. P.) 359

ε-Aspartyl-lysine from bacitracin A, formation of ε-(aminosuccinyl)-lysine from (Swallow, D. L. & Abraham, E. P.) 364

ε-Aspartyl-lysines of aspartic acid, synthesis of (Swallow, D. L., Lockhart, I. M. & Abraham, E. P.) 359

Azetidine-2-carboxylic acid, isolation of, in Polygonum multiflorum (Fowden, L. & Bryant, M.) 626

Bacillus megaterium, identification of 6-O-acetyl-d-glucopyranose in (Duff, R. B. & Farmer, V. C.) 515

Bacillus megaterium, metabolism of 6-O-acetyl-d-glucopyranose and other monocarboxylics by strains of (Duff, R. B. & Webley, D. M.) 520

Bacillus sphaciaerius, changes in total vitamin B4 and pyridoxal phosphate content of cells of, during growth and sporulation (Powell, J. F.) 91

Bacitracin A, formation of ε-(aminosuccinyl)-lysine from ε-aspartyl-lysine from (Swallow, D. L. & Abraham, E. P.) 364
Barium, concentration of, in eye tissue (Sowden, E. M. & Pirie, A.) 716
Barium in non-skeletal tissues (Sowden, E. M.) 712
Barley, interchange of terminal carbon atoms of glucose promoted by cell-free extracts of scutella of (Shibko, S. & Edelman, J.) 12r
Bean root, changes in the cell-wall components of, during development (Fuller, K. W.) 18r
Benzoic acids, metabolic formation of, from α-halogenoalkylbenzenes and related alcohols in the rabbit (Bray, H. G., James, S. P. & Thorpe, W. V.) 570
Benzyl chloride, formation of mercapturic acid from (Knight, R. H. & Young, L.) 111
Bile salts, conjugated, of certain primates (Wiggins, H. S. & Wootton, I. D. P.) 349
Bilirubin glucuronide, synthesis of, in animal and human liver (Lathe, G. H. & Walker, M.) 705
Blood, human, normal and leukæmic, distribution of ascorbic acid in (Barkhan, P. & Howard, A. N.) 163
Calcium, metabolism of, in calves (Smith, R. H.) 201
Canavanine and related compounds in Leguminosae (Bell, E. A.) 617 ‘Carbamylphosphatase’ in Escherichia coli (Krebs, H. A., Jensen, P. K. & Eggleston, L. V.) 397
Carbazole reaction for uronic acids and acidic polyaccharides (Bowness, J. M.) 107
Carbon atoms, terminal, of glucose, interchange of, promoted by cell-free extracts of barley scutella (Shibko, S. & Edelman, J.) 12r
Carbon dioxide, uptake of ascorbic acid by (Goodwin, T. W.) 612
Carboxylic acids, configuration of, by illuminated Escherichia coli (Horne, K. J.) 39
Carboxylic acids, terminal, of glucose, interchange of, promoted by cell-free extracts of barley scutella (Shibko, S. & Edelman, J.) 12r
Carboxyl group of methionine, enzymic activation of (Rendi, M., Milia, A. & Fronticelli, C.) 62
Cardiolipin, constitution of (Gray, G. M. & Macfarlane, M. C.) 409
Carbon-14 incorporation of 14CO2, [2-14C]acetate and [2-14C]malonate into, by illuminated etiolated maize seedlings (Goodwin, T. W.) 612
Carotenoids, increased incorporation of, into β-carotene, by illuminated etiolated maize seedlings (Goodwin, T. W.) 612
Carboxyl group of methionine, enzymic activation of (Rendi, M., Milia, A. & Fronticelli, C.) 62
Cardiolipin, constitution of (Gray, G. M. & Macfarlane, M. C.) 409
β-Carotene, incorporation of 14CO2, [2-14C]acetate and [2-14C]malonate into, by illuminated etiolated maize seedlings (Goodwin, T. W.) 612
Carrot, kinetic aspects of uptake of amino acids by tissue of (Birt, L. M. & Hird, F. J. R.) 286
Carrot, uptake and metabolism of amino acids by slices of (Birt, L. M. & Hird, F. J. R.) 277
Casein, a source of proline for biosynthesis of (Barry, J. M.) 177
Catechins in oak bark (Hathway, D. E.) 34
Cell walls, formation of ε-(aminosuccinyl)-lysine from ε-aminopropyl-lysine from, of lactobacilli (Swallow, D. L. & Abraham, E. P.) 304
Cells, cultured, effect of X-irradiation on (Dickson, M., Paul, J. & Davidson, J. N.) 18r
Cell-sap protein, labelling by [14C]amino acids of, in a cell-free system from guinea-pig liver (Simkin, J. L.) 305
α-Cellulose, presence of, in cell wall of Chlorella (Northcote, D. H., Guidling, K. J. & Horne, R. W.) 391
Cell-wall, change in components of, during development of bean root (Fuller, K. W.) 18r
Chlorella pyrenoidosa, chemical composition and structure of cell wall of (Northcote, D. H., Goulding, K. J. & Horne, R. W.) 391
Chlorosis, metabolism of leaves with (DeKock, P. C. & Morrison, R. L.) 266, 272
Cholesterol, biosynthesis of, from mevalonic acid (Gosselin, L. & Popjak, G.) 19r
Choline, determination of, in phospholipids (Wheelon, L. W. & Collins, F. D.) 43
Chromobacterium violaceum, isolation of D-fucoseamine from the specific polymer charide of (Crumpston, M. J. & Davies, D. A. L.) 729
α-Chymotrypsin, oxidized, B chain of (Hartley, B. S.) 4r
Citrate, accumulation of, caused by DL-1-deoxy-1-fluoroglycerol (O’Brien, R. D. & Peters, R. A.) 188
Citrate, dl-1-deoxy-1-fluoroglycerol as cause of accumulation of, by O’Brien, R. D. & Peters, R. A.) 188
Citrate, permeability of isolated rat-liver mitochondria at 0° to (Amoore, J. E.) 718
Citruelline, effect of bacterial activator on phosphorylation of, by mammalian liver (Krebs, H. A., Jensen, P. K. & Eggleston, L. V.) 397
Coagulase, free, purification of (Duthie, E. S. & Haughton, G.) 125
Cobra venoms, relationship of certain enzymes in, to mechanism of action of these venoms (Radomska, J. L. & Deichmann, W. B.) 293
Cockroach nerve, phosphorus compounds of, and the effect of DDT (Heslop, J. P. & Ray, J. W.) 16r
Cod, icd, changes in non-phosphorylated lipids of (Lovern, J. A. & Olley, J.) 37
Cod, icd, changes in phospholipids of (Lovern, J. A., Olley, J. & Watson, H. A.) 2r
Cod, molecular weight and shape of fibrillar proteins of (Connell, J. J.) 81
Corticoids, urinary, effect of β-glucuronidase on hydrolysis of (Borrell, S.) 727
[Corticosterone, biosynthetic preparation of (Ayres, P. J., Pearlman, W. H. & Tait, J. F. & Tait, S. A. S.) 230
Corticotrophin-releasing factor, partial purification and amino acid composition of (Schally, A., Saffran, M. & Zimmerman, B.) 97
Creatine, enzymic phosphorylation of, by 1,3-diphosphoglyceric acid (Cori, O., Traverso-Cori, A., Lagarrigue, M. & Marcus, F.) 633
Crotone oil, tumour-promoting principle from (Lijinsky, W.) 5r
Cyanide, effect of, on biosynthesis of ascorbic acid by an enzyme preparation from goat liver (Chatterjee, I. B., Ghosh, J. J., Ghosh, N. C. & Guha, B. C.) 509
Cytochromes in mitochondria from spadix of Arum maculatum (Bendall, D. S.) 381
DDT see 1:1:1:Trichloro-2,2-di-(p-chlorophenyl)ethane
DL-1-Deoxy-1-fluoroglycerol, metabolism of (O’Brien, R. D. & Peters, R. A.) 188
Deoxyribonucleic acid–protein complexes, preparation of, from rat-liver homogenates (Kirby, K. S.) 260
Detergent, non-ionic, fractionation of proteins of microsomes of rat liver by means of (Cohn, P. & Butler, J. V.) 254
xy-Diaminobutyric acid, evidence for occurrence of, in Polygonatum multiflorum (Fowden, L. & Bryant, M.) 626
α-Diaminopimelic acid decarboxylase in Bacillus sphaericus (Powell, J. F.) 91
Diaphragm, rat, effect of insulin on incorporation of amino acids into protein of, in vitro (Manchester, K. L. & Young, F. G.) 353
Diaphragm, rat, effects of various metabolites on incorporation of labelled amino acids into protein of, in vitro (Manchester, K. L. & Young, F. G.) 297
Diaphragm, rat, isolated, effects of insulin, anaerobiosis and cell poisons on uptake of glucose and release of potassium by (Randle, P. J. & Smith, G. Howard) 480
Liver, mammalian, effect of bacterial activator on phosphorolysis of citrulline by (Kreb, H. A., Jensen, P. K. & Eggleston, L. V.) 397
Liver microsomes, aged, reactivation of, by Mn++, Mg++, and adenosine triphosphate (Gosselin, L. & Popjak, G.) 19r
Liver microsomes, rat, enzymic hydroxylation of naphthalene by (Booth, J. & Boyland, E.) 681
Liver mitochondria, rat, isolated, permeability of, at 9° to the metabolites pyruvate, succinate, citrate, phosphate, adenosine 5'-phosphate and adenosine triphosphate (Amoore, J. E.) 718
Liver, rat, fractionation of proteins of microsomes of, by means of non-ionic detergent (Cohn, P. & Butler, J. A. V.) 254
Liver, rat, inhibition of protein synthesis in, by dimethyl-nitrosamine in vivo (Magee, F. N.) 506
Liver, rat, preparation of deoxyribonucleic acid–protein complexes from homogenates of (Kirby, K. S.) 260
Locust, desert, formation of esterase inhibitor from schradan in fat body of (Fenwick, M. L.) 373
Locust (Schistocerca gregaria), desert, structure and metabolic properties of tissue preparations from (Bellamy, D.) 580
Lubrol W, fractionation of microsome proteins with (Cohn, P. & Butler, J. A. V.) 254
Lungs of immunized rabbits, perfused, isolated, formation of antibody by (Askonas, B. A. & Humphrey, J. H.) 212
Magnesium ions, apparent activation of heart-muscle transaminase by (Turner, J. M.) 9r
Magnesium, metabolism of, in calves (Smith, R. H.) 201
Magnesium, production of secondary potassium depletion, sodium retention, nephrocalcinosis and hypercalcemia by deficiency of (MacIntyre, I. & Davidson, D.) 456
Magnesium, reactivation of aged liver microsomes by adenosine triphosphate and ions of magnesium and manganese (Gosselin, L. & Popjak, G.) 19r
Maize seedlings, etiolated, illuminated, incorporation of 14CO2, [2-14C]acetate and [2-14C]mevalonate into β-carotene by (Goodwin, T. W.) 612
Malate, effect of silica on oxidation of, in rat-liver homogenates (Roussel, E. V. & Leonard, R. A.) 57
Malic dehydrogenase, inhibition of, by 2,6-dichlorophenolindophenol and 2,3-butanediol (Hughes, R. M. & Spragg, S. P.) 158
Malic dehydrogenase in developing chick embryo (Solomon, J. B.) 529
Mammalian gland, formation of acetoacetate in homogenates of (Terner, C.) 402
Manganese, reactivation of aged liver microsomes by adenosine triphosphate and ions of magnesium and manganese (Gosselin, L. & Popjak, G.) 19r
Mercapturic acids, metabolic formation of, from ω-hydroxymethylbenzene and related alcohols in the rabbit (Bray, H. G., James, S. P. & Thorpe, W. V.) 570
Metals, bivalent, catalysis of transphosphorylation by ions of (Lowenstein, J. M.) 222
Methionine, characteristics of enzymic carboxyl activation of (Rendi, R., Di Milia, A. & Fronticelli, C.) 62
2-Methyladenine, occurrence and distribution of, in ribonucleic acids (Littlefield, J. W. & Dunn, D. B.) 642
6-Methylaminopurine, occurrence and distribution of, in ribonucleic acids (Littlefield, J. W. & Dunn, D. B.) 642
Methylhydrazine as protein solvent (Bradbury, J. H.) 252
Methylhydrazine, reaction of peptides and insulin with (Bradbury, J. H.) 252
[2-14C]Mevalonate, incorporation of, into β-carotene by illuminated etiolated maize seedlings (Goodwin, T. W.) 612
INDEX OF SUBJECTS

745

Meralonic acid, biosynthesis of cholesterol from (Gosselin, L. & Popjak, G.) 19 p.
Microsomes, liver, aged, reactivation of, by Mn**, Mg** and adenosine triphosphate (Gosselin, L. & Popjak, G.) 19 p.
Microsomes, rat-liver, enzymic hydroxylation of naphthalene by (Booth, J. & Boyland, E.) 681
Microsomes, rat-liver, fractionation of proteins of, by means of a non-ionic detergent (Cohn, P. & Butler, J. A. V.) 254
Milk, estimation of iodine in (Rogers, K. & Poole, D. B.) 463
Mitochondria, cytochromes and respiratory enzymes in, from spadix of Arum maculatum (Bendall, D. S.) 381
Mitochondria, preparation and properties of, from Schisto-
cerca gregaria (Bellamy, D.) 590
Mitochondria, rat-liver, isolated, permeability of, at 0° to the metabolites pyruvate, succinate, citrate, phosphate, adenosine 5'-phosphate and adenosine triphosphate (Amoore, J. E.) 718
Mitosis, inhibition of, by reaction of maleic hydrazide with sulphhydryl groups (Hughes, C. & Spragg, S. P.) 205
Monothio- and fatty acids, determination of, in blood (Pikasa, N. A. & Nijhof, J.) 52
Monohalogenobenzences, formation of premercuric acid from (Knight, R. H. & Young, L.) 111
Muscle, diaphragm, effects of insulin, anaerobiosis and cell poisons on uptake of glucose and release of potassium by (Randle, F. J. & Smith, G. Howard) 490
Muscle transaminases, heart-, apparent activation of, by magnesium ions (Turner, J. M.) 9 p.
Myrobalans, cell-wall polysaccharides of (Hathaway, D. E. & Seakins, J. W. T.) 155
Naphthalene, enzymic hydroxylation of, by rat-liver micro-
somes (Booth, J. & Boyland, E.) 681
Naphthalene, formation of premercuric acid from (Knight, R. H. & Young, L.) 111
Nephrocacinosis, production of, by magnesium deficiency (MacIntyre, I. & Davidsson, D.) 456
Neurosporone, metabolism of, in Nicotinamide and ni-
tinamide (in Sun-daram, T. K., Rajagopalan, K. V. & Sarma, P. S.) 196
Neurotoxins, separation and properties of, from venom of tiger snake Notchis scutatus scutatus (Doery, H. M.) 535
Nicotinamide, metabolism of, in Neurospora crassa (Sun-
daram, T. K., Rajagopalan, K. V. & Sarma, P. S.) 196
Nicotinamide acid, metabolism of, in Neurospora crassa (Sun-
daram, T. K., Rajagopalan, K. V. & Sarma, P. S.) 196
Non-phosphorylated lipids of icid cod (Lovern, J. A. & Oliver, J. A.) 3 p.
Noradrenaline, association of, with blood platelets (Weil-
Malherbe, H. & Bone, A. D.) 14
Notchis scutatus scutatus see Tiger snake
Oak-bark tannins (Hathaway, D. E.) 34
Oestriol and 16-oepi-oestriol, isolation from pregnancy urine of precursors of (Layne, D. S. & Marrian, G. F.) 244
Organic acids, content of, in chlorotic and healthy leaves (DeKock, P. C. & Morrison, R. I.) 272
Osmotic pressure, high, media having, protection of Staphylococcus aureus from some effects of penicillin by (Hancock, R.) 15 p.
Ovalbumin, native and denatured, reactivity of free amino acids in, towards fluorodinitrobenzene (Steven, F. S. & Tristran, G. R.) 179
Oxaloacetate, sensitive method for estimation of (Kal-
nitak, G. & Tapley, D. F.) 28
α-Oxoglutarate, further studies on transamination with, in animal tissues (Rowell, E. V. & Corbett, K.) 7 p.
α-Oxoglutarate, inhibition of synthesis of 8-aminolevulinic acid from succinic-enzyme A and glycine by (Brown, E. G.) 313
16-Oxo-oestradiol-17β, isolation of, from urine of pregnant women (Layne, D. S. & Marrian, G. F.) 244
Panther, Indian, component acids and glycerides of depot fat of (Pathak, S. P. & Trivedi, B. N.) 103
Panthera pardus fuscus see Panther, Indian
Penicillamine, effect of, on synthesis of 8-aminolevulinic acid (Laver, W. G., Neuberger, A. & Udenfriend, S.) 4
Penicillin, protection of Staphylococcus aureus from some effects of, by media of high osmotic pressure (Hancock, R.) 15 p.
Penicillinase, bacterial, intermediates in the biosynthesis of (Pollock, M. R. & Kramer, M.) 665
Penicillium notatum phospholipase B preparation, hydro-
lysis of lecithin by (Dawson, R. M. C.) 539
Peptides, reaction of, with methylhydrazine (Bradbury, E.) 252
pH, effect of variations in, on activities of C-esterase (Ber-
glass, I. & Amon, S.) 339
Phenolic acids of Theobroma cacao, separation and identifi-
cation of, by paper chromatography (Griffiths, L. A.) 120
Phenylalanine, incorporation of, into microsome proteins (Cohn, P. & Butler, J. A. V.) 254
Phenylnfosazone, infrared spectrum of (Crumpton, M. J. & Davies, D. A. L.) 729
Phenylhydrazine, metabolism of (McIsaac, W. M., Parke, D. V. & Williams, R. T.) 688
Phenylhydrzones, metabolism of (McIsaac, W. M., Parke, D. V. & Williams, R. T.) 688
Phenylirhamnosazione, infrared spectrum of (Crumpton, M. J. & Davies, D. A. L.) 729
Phosphatase, acid, comparison of enzymic catalysis by, with non-enzymic catalysis at acid pH values (Morton, R. K.) 150
Phosphatases, substrate-specific, studies with (Morton, R. K.) 139
Phosphate esters in uterus (Cawkwell, J. M.) 248
Phosphate esters, spectrophotometric methods for estimation of (Morton, R. K.) 134
Phosphate, permeability of isolated rat-liver mitochondria at 0° to (Amoore, J. E.) 718
Phosphocreatine, enzymic synthesis of (Cori, O., Traverso-
cori, A., Lagarrigue, A. & Marcus, F.) 633
Phospholipase B preparation from Penicillium notatum, hydrolysis of lecithin by (Dawson, R. M. C.) 539
Phospholipids, ox-heart, separation and composition of (Gray, G. M. & Macfarlane, M. G.) 409
Phosphomonoesterases, alkaline, purified, studies with (Morton, R. K.) 139
Phosphorolysis, effect of bacterial activator on, of citrulline by mammalian liver (Kresig, H. A., Jensen, P. K. & Eggleton, L. V.) 397
Phosphorus, incorporation of, into fractions of Escherichia coli made by centrifuging and by chemical means (Wade, H. E. & Lovett, S.) 697
Phosphorylcholine, presence of, in extracts of rabbit uterus (Cawkwell, J. M.) 248
Phosphorylethanolamide, presence of, in extracts of rabbit uterus (Cawkwell, J. M.) 248
Plant flavokinase, studies on (Giri, K. V., Krishnaswamy, P. R. & Appaji Rao, N.) 66
Plasma, catabolism of albumin of, by perfused rat liver (Cohen, S. & Gordon, A. H.) 544

Plasma-clearing factor, production of, in vitro (Hall, D. A.) 5

Plasmalogens, ox-heart, structure of (Gray, G. M.) 425

Plasmalogens, presence of, in ox heart (Gray, G. M. & Macfarlane, M. G.) 409

Platelets, blood, association of adrenaline with (Weil-Malherbe, H. & Bone, A. D.) 14

Polyethenoid fatty acids, determination of, in blood (Pikaar, N. A. & Nijhof, J.) 52

*Polygonatum multiflorum*, isolation of azetidine-2-carboxylic acid and evidence for occurrence of *xy*-diaminobutyric acid in (Fowden, L. & Bryant, M.) 626

Polyphenoloxidase in oak cambium ( Hathway, D. E.) 34

Poly saccharide, specific, of *Chromobacterium violaceum*, isolation of fucosamine from (Crompton, M. J. & Davies, D. A. L.) 729

Poly saccharides, acidic, 5-formylfuroic acid and carbazole reaction for (Bowness, M. J.) 107

Poly saccharides, cell-wall, of myrobalans (Hathway, D. E. & Seskins, J. W. T.) 155

Poly saccharide characterization of, isolated from forest soils (Bennier, B.) 590

Potassium concentration of kidney-cortex slices, effect of low-sodium media on (Whittam, R. & Robinson, J. R.) 16

Potassium, effects of insulin, anaerobiosis and cell poisons on release of, by isolated rat diaphragm (Randle, P. J. & Smith, G. Howard) 490

Potassium, secondary depletion of, produced by magnesium deficiency (MacIntyre, I. & Davidson, D.) 456

Pregnancy, isolation of 16β-hydroxyoestrone and 16α-oestradiol-17β from urine in (Layne, D. S. & Marrian, G. F.) 244

Premencapturic acids, occurrence of (Knight, R. H. & Young, L.) 111

Proline, source of, for cassein biosynthesis (Barry, J. M.) 177

Protein, cell-sap, labelling by [14C]amino acids of, in a cell-free system from guinea-pig liver (Simkin, J. L.) 305

Protein, effect of insulin on incorporation of amino acids into, of rat diaphragm in vitro (Manchester, K. L. & Young, F. G.) 353

Proteins, effect of purine metabolites on incorporation in vitro of labelled amino acids into, of normal rat diaphragm (Manchester, K. L. & Young, F. G.) 297

Protein-lipid complexes, alcohol-stable, in egg yolk (McIndoe, W. M.) 8

Protein synthesis, inhibition of, in rat liver by dimethyl nitrosamine in vivo (Magee, F. N.) 606

Proteins, fibrillar, cod, molecular weight and shape of (Connell, J. D.) 41

Proteins of microsomes of rat liver, fractionation of, by means of a non-ionic detergent (Cohn, P., Butler, J. A. V.) 254

Pyridoxal phosphate, changes in content of, in cells of *Bacillus sphaericus* during growth and sporulation (Powell, J. F.) 91

Pyridoxal phosphate, toboxypirimidine phosphate as an inhibitor of bacterial enzyme systems requiring (Haughton, B. G. & King, H. K.) 660

Pyruvate, acetyl-coenzyme A as cofactor in oxidation of (Peel, J. L.) 7

Pyruvate, further studies on transamination with, in animal tissues ( Rowell, E. V. & Corbett, K.) 7

Pyruvate, permeability of isolated rat-liver mitochondria at 0° to (Amoore, J. E.) 718

Rattlesnake venoms, relationship of certain enzymes in, to mechanism of action of these venoms (Radomski, J. L. & Deichmann, W. B.) 293

Riboflavin, incorporation of [2-14C]acetyl methylcarbinol (acetoin) into ring A of, by *Eremothecium ashbyii* (Goodwin, T. W. & Treble, D. H.) 14

Ribonucleic acids, occurrence and distribution of thymine and three methylated-adenine bases in (Littlefield, J. W. & Dunn, D. B.) 642

Rye grass, Italian, bound amino acids in protein-free extracts of (Synge, R. L. M. & Wood, J. C.) 321

*Schinopsis* species, leucoanthocyanins in wood of (Roux, D. G. & Evelyn, S. R.) 34

*Schistoscoeca gregaria* see Locust

Schradan, production of esterase inhibitor from, in fat body of desert locust (Fenwick, M. L.) 373

Serine, determination of, in phospholipids (Collins, F. D. & Rowell, E. V.) 405

Serum, blood, microdetermination of fatty acids in (Pikaar, N. A. & Nijhof, J.) 52

Serum, estimation of iodine in (Rodgers, K. & Poole, D. B.) 463

Silica, soluble, effect of, on metabolism of rat-tissue preparations (Rowell, E. V. & Leonard, R. A.) 57

Skatole, association of malabsorption syndrome with certain anemias with presence in small intestine of bacteria forming (Horning, E. C. & Dalgliesh, C. E.) 13

Skatole, excretion of a sulphatoxy derivative of, in pathologic states in man (Dalgliesh, C. E., Kelly, W. & Horning, E. C.) 12

Sodium, effect of media low in, on the potassium concentration of kidney-cortex slices (Whittam, R. & Robinson, J. R.) 16

Sodium, effect of media with low concentration of, on potassium concentration of kidney-cortex slices (Whittam, R. & Robinson, J. R.) 16

Sodium, retention of, produced by magnesium deficiency (MacIntyre, I. & Davidson, D.) 456

Soils, forest, characterization of polysaccharides isolated from (Bennier, B.) 590

Spadix of *Arum maculatum*, cytochromes and respiratory enzymes in mitochondria from (Bendall, D. S.) 381

*Staphylococcus aureus*, inhibition of cell-wall synthesis in, by chemicals which cause accumulation of wall precursors (Park, J. T.) 2

*Staphylococcus aureus*, protection of, from some effects of penicillin by media of high osmotic pressure (Hancock, R.) 15

*Staphylococcus aureus*, purification of free coagulase of (Duthie, E. S. & Haughton, G.) 125

Starch, anaerobic synthesis of, from glucose in tobacco-leaf disks (Maclachlan, G. A. & Porter, H. K.) 11

*Streptococcus haemolyticus*, physicochemical properties of hyaluronic acid formed by (Blumberg, B. S., Ogston, A. G., Lowther, D. A. & Rogers, H. J.) 1

Strontium, concentration of, in eye tissue (Sowden, E. M. & Pirie, A.) 716

Strontium in non-skeletal tissues (Sowden, E. M.) 712

Sucinate, permeability of isolated rat-liver mitochondria at 0° to (Amoore, J. E.) 718

Sucinyl-coenzyme A formation of 5-amino-5-deoxyserine acid from, by particles from chicken erythrocytes (Gibson, K. D., Laver, W. G. & Neuberger, A.) 71

Sulphhydryl group, non-protein, influence of bacterial exotoxins on content of, in animal tissues (Gervering, J. & Long, D. A.) 652

Sulphphydryl groups, inhibition of mitosis by reaction of maleic hydradize with (Hughes, C. & Spragg, S. F.) 205

Tannins, condensed, biogenesis of, based on leucoanthocyanins (Roux, D. G. & Evelyn, S. R.) 34

Tannins, oak-bark (Hathway, D. E.) 34
Theobroma cacao, chromatographic separation and identification of phenolic acids and flavonoids of (Griffiths, L. A.) 120

Thetin–homocysteine transmethytransferase (Maw, G. A.) 168

Thrift (Armeria maritima), some observations on hydroxy-

pyrecolic acid from (Pawden, L.) 629

Thymine, occurrence and distribution of, in ribonucleic acids (Littlefield, J. W. & Dunn, D. B.) 642

Tiger snake (Notechis scutatus scutatus), separation and properties of neurotoxins from venom of (Doery, H. M.) 535

Tobacco-leaf disks, anaerobic synthesis of starch from glucose in (MacLachlan, G. A. & Porter, H. K.) 11

Toxopyrimidine phosphate as an inhibitor of bacterial enzyme systems that require pyridoxal phosphate (Haughton, B. G. & King, H. K.) 660

Transaminase, heart-muscle, apparent activation of, by magnesium ions (Turner, J. M.) 9

Transamination, further studies on, with pyruvate and α-oxoglutarate in animal tissues (Rowsell, E. V. & Corbett, K.) 7

Transphosphorylation, catalysis of, by bivalent metal ions (Lowenstein, J. M.) 222

Tricarboxylic acid cycle, nature of, in yeast (Stoppani, A. O. M., Conches, L., de Favelukes, S. L. S. & Sacerdoti, F. L.) 438

Tricarboxylic acid cycle, relationship of, to synthesis of 3-aminolevulic acid in avian-erythrocyte preparations (Brown, E. G.) 313

3α,6α,12α-Trihydroxycholanic acid and related substances (Haslwood, G. A. D.) 551

Triphosphopyridine nucleotide, reduced, role of, in production of esterase inhibitor from scradan in locust (Fenwick, M. L.) 373

Tumour-promoting principle from croton oil (Lijinsky, W.) 5

Tyrosine decarboxylase, of Streptococcus faecalis, inhibition of, by toxopyrimidine phosphate (Haughton, B. G. & King, H. K.) 660

Ubiquinone (Fahmy, N. I., Hemming, F. W., Morton, R. A., Paterson, J. Y. F. & Pennock, J. F.) 1

Ultraviolet light, effect on milk-fed calves of irradiation with (Smith, R. H.) 201

Uridine diphosphokinase in wheat seedlings (Keys, A. J.) 463

Urine, estimation of iodine in (Rodgers, K. & Poole, D. B.) 463

Urine, human, occurrence of androst-16-en-3α-ol in (Brooksbank, B. W. L., Haslewood, G. A. D., Pollock, J. A. & Hewett, C. L.) 14

Urine, isolation of 16β-hydroxyoestrone and 16-oxo-
estradiol-17β from, of pregnant women (Layne, D. S. & Marrian, G. F.) 244

Uronic acids, 5-formylfuroic acid and carbazole reaction for (Bowness, J. M.) 107

Uterus, phosphate esters in (Cawkwell, J. M.) 248

Valine, accumulation of, during inhibition by aminopterin in Aerolacter aerogenes and its utilization on recovery (Webb, M.) 472

Venom, separation and properties of neurotoxins from, of tiger snake (Doery, H. M.) 535

Venoms, cobra and rattlesnake, relationship of enzymes to mechanism of action of (Radomski, J. L. & Deichmann, W. B.) 293

Vitamin B₆, total, changes in, of Bacillus sphaericus during growth and sporulation (Powell, J. F.) 9

Vitamin D, dietary, effect of, on milk-fed calves (Smith, R. H.) 201

Water, estimation of iodine in (Rodgers, K. & Poole, D. B.) 463

Wheat seedlings, uridine diphosphokinase in (Keys, A. J.) 11

X-rays, effect of, on cultured cells (Dickson, M., Paul, J. & Davidson, J. N.) 18

Yeasts, assimilation of carbon dioxide by (Stoppani, A. O. M., Conches, L., de Favelukes, S. L. S. & Sacerdoti, F. L.) 438
